Reconceiving Structure in Contemporary Music Judy Lochhead, 2015-06-19 This book studies recent music in the western classical tradition offering a critique of current analytical theoretical approaches and proposing alternatives The critique addresses the present fringe status of recent music sometimes described as crossover postmodern post classical post minimalist etc and demonstrates that existing descriptive languages and analytical approaches do not provide adequate tools to address this music in positive and productive terms Existing tools and concepts were developed primarily in the mid 20th century in tandem with the high modernist compositional aesthetic and they have changed little since then The aesthetics of music composition on the other hand have been in constant transformation Lochhead proposes new ways to conceive musical works their structurings of musical experience and time and the procedures and goals of analytic close reading These tools define investigative procedures that engage the multiple perspectives of composers performers and listeners and that generate conceptual modes unique to each work In action they rebuild a conceptual methodological and experiential place for recent music These new approaches are demonstrated in analyses of four pieces Kaija Saariaho's *Lonh* 1996 Sofia Gubaidulina's *Second String Quartet* 1987 Stacy Garrop's *String Quartet no 2 Demons and Angels* 2004 05 and Anna Clyne's *Choke* 2004 This book defies the prediction of classical music's death and will be of interest to scholars and musicians of classical music and those interested in music theory musicology and aural culture

The Oxford Handbook of Technology and Music Education S. Alex Ruthmann,Roger Mantie,2017-07-06 Few aspects of daily existence are untouched by technology

Learning and teaching music are no exceptions and arguably have been impacted as much or more than other areas of life. Digital technologies have come to affect music learning and teaching in profound ways influencing how we create, listen, share, consume, interact and conceptualize musical practices and the musical experience. For a discipline as entrenched in tradition as music education, this has brought forth myriad views on what does and should constitute music learning and teaching. To tease out and elucidate some of the salient problems, interests and issues, *The Oxford Handbook of Technology and Music Education* critically situates technology in relation to music education from a variety of perspectives: historical, philosophical, socio-cultural, pedagogical, musical, economic, policy, organized around four broad themes: Emergence and Evolution, Locations and Contexts, Social and Cultural Issues, Experiencing, Expressing, Learning and Teaching, and Competence, Credentialing and Professional Development. Chapters from a highly diverse group of junior and senior scholars provide analyses of technology and music education through intersections of gender, theoretical perspective, geographical distribution and relationship to the field. *The Oxford Handbook of Technology and Music Education's* dedication to diversity and forward-facing discussion promotes contrasting perspectives and conversational voices rather than reinforce traditional narratives and prevailing discourses. *Beyond Subculture* Rupa Huq, 2007-01-24. Using case studies and first-hand interviews with consumers and producers including Noel Gallagher and Talvin Singh, Rupa Huq investigates a series of musically centred global youth cultures and re-examines the link between music and subcultures.
