Rollercoaster A Cancer Journey:

Strength for the Cancer Journey Deborah Barr, 2020-07-07 Though the Road is Long You Don't Have to Walk Alone There's nothing easy about having cancer. For most people, cancer is a hard, reluctant journey through rugged, unfamiliar terrain. Ultimately, however, there are really only two ways to face cancer: in our own strength or with the help and strength that God supplies. Strength for the Cancer Journey provides empathetic daily reminders that God is present for anyone facing the challenges of cancer. Each of these thirty devotionals draws upon anecdotes and insights from God's Word to help readers invite God into the realities, uncertainties, and frustrations of their cancer experience. While cancer is a journey no one wants to take, no one ever has to walk that road alone. This devotional book will help both patients and caregivers to engage deeply with God, gaining new strength for the cancer journey.

Data Analytics in Cognitive Linguistics Dennis Tay, Molly Xie Pan, 2022-05-09 Contemporary data analytics involves extracting insights from data and translating them into action. With its turn towards empirical methods and convergent data sources, cognitive linguistics is a fertile context for data analytics. There are key differences between data analytics and statistical analysis as typically conceived. Though the former requires the latter, it emphasizes the role of domain-specific knowledge. Statistical analysis also tends to be associated with preconceived hypotheses and controlled data. Data analytics, on the other hand, can help explore unstructured datasets and inspire emergent questions. This volume addresses two key aspects in data analytics for cognitive linguistic work. Firstly, it elaborates the bottom-up guiding role of data analytics in the research trajectory and how it helps to formulate and refine questions. Secondly, it shows how data analytics can suggest concrete courses of research-based action, which is crucial for cognitive linguistics to be truly applied. The papers in this volume impart various data analytic methods and report empirical studies across different areas of research and application. They aim to benefit new and experienced researchers alike.
