A Locker Room of Her Own David C. Ogden, Joel Nathan Rosen, 2013-06-03 Female athletes are too often perceived as interlopers in the historically male dominated world of sports. Obstacles specific to women are of particular focus in *A Locker Room of Her Own*. Race, sexual orientation and the similar qualities ancillary to gender bear special exploration in how they impact an athlete's story. Central to this volume is the contention that women in their role as inherent outsiders are placed in a unique position even more complicated than the usual experiences of inequality and discord associated with race and sports. The contributors explore and critique the notion that in order to be considered among the pantheon of athletic heroes one cannot deviate from the traditional demographic profile that of the white male. These essays look specifically and critically at the nature of gender and sexuality within the contested nexus of race, reputation and sport. The collection explores the reputations of iconic and pioneering sports figures and the cultural and social forces that helped to forge their unique and often problematic legacies. Women athletes discussed in this volume include Babe Didrikson Zaharias, the women of the AAGPBL, Billie Jean King, Venus and Serena Williams, Marion Jones, Chris Evert and Martina Navratilova, Sheryl Swoopes, Florence Griffith Joyner, Roberta Gibb and Kathrine Switzer and Danica Patrick.

The American Marathon Pamela Cooper, 1998-04-01 Boston established a footrace but New York City created a marathon culture that annually draws tens of thousands of runners to each of the major American events. *The American Marathon* is the first in-depth study of the marathon as a cultural performance that has as much power to unite communities across lines of race, ethnicity, class and gender as it does to empower individuals. This book encompasses more than a century from the fledgling days of the footrace in the 1890s to the popular contemporary marathons that have become corporate sponsored institutions. Run in New York City in 1896 and continued in Boston for the next ten years, the marathon quickly became the event of the working class athletes, particularly Irish Americans. Other urban ethnic groups, Italians, Jews and African Americans who were unwelcome into the elite WASP athletic clubs, formed their own running organizations. Once emblematic of the immigrant experience, the marathon evolved to express middle class nationalism as these immigrants were being assimilated. During the 1930s, the Great Depression restricted footracing and anti-Semitism left important coaches and runners without access to team support. The New York Pioneer Club, begun in 1936 as an African American team, brought the tremendous energy of post-World War II Harlem to the American marathon of the 1950s. Besides examining the ethnic influence on marathoning, Cooper also explores the impact of the Cold War on this sport when fitness and endurance became matters of national pride. She shows how the Road Runners Club of America first brought women and large numbers of participant runners into long distance footraces and finally how corporate sponsorship and direct payments to athletes profoundly changed the nature of this once amateur sport.

Dope Daniel M. Rosen,2008-06-30 Since the dawn of athletic competition during the original Olympic Games in Ancient Greece athletes as well as their coaches and trainers have been finding innovative ways to gain an edge on their competition Some of those performance enhancement methods have been within the accepted rules while other methods skirt the gray area between being within the rules and not while still other methods break the established rules In modern times doping the use of performance enhancing drugs has been one method athletes and their trainers have used to beat their competition The history of sports doping during the modern era can be traced through the events and scandals of the times in which the athletes lived From the use of amphetamines and other stimulants in the early 20th century to the use of testosterone and steroids by both the USSR and the United States during Cold War era Olympics games to blood doping and EPO to designer drugs the history of doping in sports closely follows the medical and technological advances of our times In the early 21st century the possibility of genetically engineered athletes looms The story of doping in sports over the last century offers clues to where the battle over performance enhancement will be fought in the years to come Documents Related to the Investigation of Senator Robert Packwood
