The Moon Cleaner C. C. Brower, S. H. Marpel, 2018-11-14 When the unknown X lost her job and any way to make a living she only wanted her life back But she settled for revenge In a way she wouldn't expect cleaning up the elitist government messes Because having dead bodies around did no one any good And someone was on a purge in those self named royal houses that ran the moon colony cities Her particular mindset and training as a medical clinician allowed her to view death with a singular frame of mind While all the people she'd helped in that medical clinic gave her loyal fast friends among the down belows who did the mining and kept everything running The opportunity to now work for an ambitious executive who had a nasty habit of eliminating her bosses was just too good to pass up and maybe find out who had wrecked her life Get Your Copy Now

Experiments in Agency Supriya Baily, Farnoosh Shahrokhi, Tami Carsillo, 2017-04-13 This book is about teacher agency and leadership but it is also an experiment in shifting the balance of power in research and writing It is about making accessible the process of academic publishing in a way that capitalizes on the knowledge of people in diverse contexts and with novice eyes and is an experiment in sharing academic writing between master teachers and

doctoral students It is also a book on the power of action research and the belief we have as teacher educators about the transformative power of teachers in their own classrooms Pairing master teachers from ten countries who were part of the Teaching Excellence and Achievement Program with graduate students this book provides a framework to decolonize research practices in an effort to re envision research methodologies on a global scale The book also provides a tangible way to see how research processes support local transformation and direct engagement of those at the margins to play a greater role in the production of scholarly knowledge The cross national scope of this book with authors working in classrooms in countries as diverse as Turkey Chile and Bangladesh coupled work of novice US based scholars to engage in the conceptualizing researching data analysis and writing of chapters speaks to the importance of new voices in the field of research Additionally the combination of teacher research projects in the classroom juxtaposed with chapters that speak to the process of teacher research in a global context provides both theoretical and empirical foundations for teacher research

Pedagogic Frailty and Resilience in the University Ian M. Kinchin, Naomi E. Winstone, 2017-04-17 Pedagogic Frailty and Resilience in the University presents a theoretical model and a practical tool to support the professional development of reflective university teachers It can be used to highlight links to key issues in higher education Pedagogic frailty exists where the quality of interaction between elements in the evolving teaching environment succumbs to cumulative pressures that eventually inhibit the capacity to develop teaching practice Indicators of frailty can be observed at different resolutions from the individual to the departmental or the institutional Chapters are written by experts in their respective fields who critique the frailty model from the perspectives of their own research This will help readers to make practical links between established bodies of research literature and the concept of frailty and to form a coherent and integrated view of higher education This can then be explored and developed by individuals departments or institutions to inform and evaluate their own enhancement programmes This may support the development of greater resilience to the demands of the teaching environment In comparison with other commonly used terms we have found that the term frailty has improved resonance with the experiences of colleagues across the disciplines in higher education and elicits a personal sometimes emotional response to their professional situation that encourages positive dialogue debate and reflection that may lead to the enhancement of university teaching This book offers a particular route through the fractured discourses of higher education pedagogy creating a coherent and cohesive perspective of the field that may illuminate the experiences and observations of colleagues within the profession If we are to realise the promise of higher education we will need the concepts methods and reflections contained in this book Robert R Hoffman

Leadership Resilience Ginger Charles, 2016-04-22 Leadership is demanding and challenging How do leaders cope How do they remain fit and strong and thrive The authors of Leadership Resilience a business school academic and a police officer suggest that many challenges faced by leaders are similar to the challenges experienced by police officers The isolation the pressure not to show personal emotions the expectation that they

will deal effectively with confused frustrated and angry people and that they can deal with delivering bad news all contribute to the pressures bearing on leaders and police officers everywhere The authors argue that these challenges are more pronounced in policing and so more readily identifiable than in other leadership situations They explore challenges experienced by police officers look at how they cope with them and draw lessons for those undertaking leadership roles more generally Leadership Resilience provides accounts from police officers in their own words of difficult experiences they encounter They describe their feelings about what was important and how they coped with it Each account is followed by an analysis highlighting what is discussed and not discussed in the accounts and identifying lessons that can be drawn by leaders in other situations All is presented so that it is relevant to different cultures demanding different styles of leadership Analysis of the engaging experiences featured will help leaders struggling with the gap between leadership education and capability and the demands made of them to survive and thrive while maintaining their physical mental emotional and spiritual health

Reconstructing Church Todd Grant Yonkman, 2014-08-06 The general decline of American mainline Protestant churches today is well documented Church redevelopment imagining and actualizing new life for dying churches is a productive and vital response to congregational decline but it can be daunting Here is guidebook for church leaders to help them reinvigorate their churches with both practical advice and tested theory A comprehensive case study of Beneficent Congregational Church which successfully turned the tide and quadrupled its worship attendance provides inspiration as well as concrete strategies for church redevelopment The study indicates that successful and faithful church redevelopment involves a shift from a modern patronage ministry model to a postmodern plural ministry model Building on current church redevelopment literature by bringing selected Biblical and theological texts into conversation with leadership concepts systems theory social sciences and congregational studies this book creates a multidisciplinary transformative conversation The result is both strategic proposals for growing your church and a model for doing practical theology in your own ministry context Dedicated trained leadership in cooperation with the power of the Spirit can create the possibility of new life in dying congregations
