The role of charitable funding in the provision of public services: the case of the English and Welsh National Health Service

The role of charity in the provision of public services is of substantial academic and practitioner interest, and charitable initiative within the English and Welsh National Health Service (NHS) has recently received considerable attention. This study provides rich insights into the role that NHS-linked charities present themselves as playing within the NHS. The dataset analysed is a novel construction of 3,250 detailed expenditure lines from 676 sets of charity accounts. Qualitative content analysis of itemised descriptions of expenditure allows us to explore how these charities portray their activities. We distinguish between expenditures that can be framed as supplementary to government funding (such as amenities and comforts) and items that suggest charitable effort is substituting for government support (such as funding for clinical equipment). We also consider the claims being made through these representations, and suggest that the distinctiveness of the charity and NHS spheres are currently under question. We argue that, through their representational practices, charities are both shaping and blurring the expected roles of government and charity. Acceptance of the benefits that charitable initiative does provide, in terms of innovation, pluralism and participation, must be tempered with the realisation that charitable funds are playing a role in service provision that is not guided by clear policy, and that this has the potential to widen existing inequalities within a key public service.

Key words charity • voluntary sector • third sector • public services • charitable funding; National Health Service (NHS) • England • Wales

Introduction

At the time of its inception in 1948, the UK's National Health Service (NHS) was conceived as a state-funded and centrally-planned health service, drawing its funding from taxation, rather than through the prior patchwork of local initiatives

Politics Of The National Health Service:

The Politics of the National Health Service Rudolf Klein, 1983 **Creating the National Health Service** Marvin Rintala, 2003 The origins of the NHS are the subject of this study that presents evidence on the key players who participated in the founding of the system The author also traces those who opposed the NHS The National Health Service Charles Webster, 2002 The foundation of the National Health Service on 5 July 1948 was a momentous development in the history of the United Kingdom Issues of health care touch the lives of everyone and the NHS has come to be regarded as the cornerstone of the welfare state and as a model for state organised health care systems elsewhere Yet throughout its history the Service has existed in an atmosphere of crisis Charles Webster's political history is an entirely new and original examination of the NHS from its inception through to its management under the first term of the current Labour government providing the necessary framework for assessing its future as we enter the new millennium *A National Health Service?* John Mohan, 1995-03-20 This book contrasts the proposals of the Royal Commission of the late 1970s with the very different set of priorities enshrined in the 1989 White Paper and describes how the changes between the two documents came about It argues that the NHS reforms should be seen not as the inevitable product of technical developments nor as a consensus response to narrowly managerial difficulties within the NHS but rather as part of a wider political strategy towards state provision of welfare The book strongly emphasises the uneven geographical impacts of post 1979 changes a topic usually underplayed by analysts of social policy and draws heavily on previously unpublished material **Introducing Comparative Politics** Stephen Orvis, Carol Ann Drogus, 2019-12-30 *Introducing Comparative Politics The Essentials* is focused on core concepts and the big picture questions in comparative politics Who rules What explains political behavior Where and why Stephen Orvis and Carol Ann Drogus demonstrate the strengths and weaknesses of commonly debated theories structures and beliefs and push students to apply their understanding While detailed case studies can go in depth on specific countries and political systems this book distills its country material into the narrative increasing global awareness current event literacy and critical thinking skills Adapted from the authors *Introducing Comparative Politics Fifth Edition The Essentials* version offers the same framework for understanding comparative politics in a briefer format allowing you to teach the course the way you want to teach it **The political economy of health care** Tudor Hart, Julian, 2010-09-01 With a foreword by Tony Benn Drawing on clinical experience dating from the birth of the NHS in 1948 Julian Tudor Hart a politically active GP in a Welsh coal mining community charts the progress of the NHS from its 19th century origins in workers mutual aid societies to its current forced return to the market His starting point is a detailed analysis of how clinical decisions are made He explores the changing social relationships in the NHS as a gift economy how these may be affected by reducing care to commodity status and the new directions they might take if the NHS resumed progress independently from the market This edition of this bestselling book has been entirely rewritten with two new chapters and includes new material

on resistance to that world wide process The essential principle in the book is that patients need to develop as active citizens and co producers of health gain in a humanising society and the author s aim is to promote it wherever people recognise that pursuit of profit may be a brake on rational progress

Epistemic Resistance, Radical Politics, Positionality Yorgos Karagiannopoulos,Vasiliki Polykarpou,Alexios Stamatiadis-Bréhier,2025-05-06 What can philosophy learn from social movements The authors from different philosophical paradigms from both analytic and continental traditions as well as different non philosophical disciplines such as the sociology and history of social movements bring out the unique theoretical and political importance of social movements The underlying motivation of this volume is bridging the abstract realm of philosophy with the concrete realm of social reality The contributions of this volume adopt two ways to accomplish this The first involves looking at social movements themselves and drawing relevant philosophical conclusions e g Gallegos Ordorica examines the role the caracoles used by the Zapatistas The second interprets or describes certain social movements through the lens of philosophical categories e g B lek draws from hinge epistemology Yunchang appeals to Agamben s notion state of emergency as it applied to anti lockdown protests in Beijing This book is for all people who are interested in social movements themselves as well as people who wish to explore the philosophical dimensions of these movements
