Knowledge in the Blood Jonathan D. Jansen, 2009-04-07 This book tells the story of white South African students how they remember and enact an Apartheid past they were never part of How is it that young Afrikaners born at the time of Mandela's release from prison hold firm views about a past they never lived rigid ideas about black people and fatalistic thoughts about the future Jonathan Jansen the first black dean of education at the historically white University of Pretoria was dogged by this question during his tenure and Knowledge in the Blood seeks to answer it Jansen offers an intimate look at the effects of social and political change after Apartheid as white students first experience learning and living alongside black students He reveals the novel role pedagogical interventions played in confronting the past as well as critical theory's limits in dealing with conflict in a world where formerly clear cut notions of victims and perpetrators are blurred While Jansen originally set out simply to convey a story of how white students changed under the leadership of a diverse group of senior academics Knowledge in the Blood ultimately became an unexpected account of how these students in turn changed him The impact of this book's unique wide ranging insights in dealing with racial and ethnic divisions will be felt far beyond the borders of South Africa

Bowman, Elen Stokes, Arie Rip, 2017-09-01 The embedding of any new technologies in society is challenging The evolving state of the scientific art often unquantifiable risks and ill defined developmental trajectories have the potential to hinder innovation and or the commercial success of a technology There are however a number of tools that can now be utilized by stakeholders to bridge the chasm that exists between the science and innovation dimensions on the one hand and the societal dimensions on the other This edited volume will draw together leading researchers from the domains of law philosophy political science public administration and the natural sciences in order to demonstrate how tools such as for example constructive technology assessment regulatory governance and societal scenarios

may be employed by stakeholders to assist in successfully embedding new technologies into society This volume will focus primarily on the embedding of two emergent and emerging technologies nanotechnologies and synthetic biology Government industry and the epistemic community continue to struggle with how best to balance the promised benefits of an emerging technology with concerns about its potential impacts There is a growing body of literature that has examined these challenges from various cultural scientific and jurisdictional dimensions There is however much work that still needs to be done this includes articulating the successes and failures of attempts to the societal embedding of technologies and their associated products This edited volume is significant and timely as unlike other books currently on the market it shall draw from real work experiences and experiments designed anticipate the societal embedding of emerging technologies This empirical work shall be supported by robust theoretical underpinnings

Private Property and Public Power Debbie Becher, 2014-08-12 News media reports on eminent domain often highlight outrage and heated protest But these accounts Debbie Becher finds obscure a much more complex reality of how Americans understand property Private Property and Public Power presents the first comprehensive study of a city s acquisitions exploring how and why Philadelphia took properties between 1992 and 2007 for private redevelopment Becher uses original data collected from city offices and interviews with over a hundred residents business owners community leaders government representatives attorneys and

appraisers to explore how eminent domain really works Surprisingly the city took over 4 000 private properties and these takings rarely provoked opposition When conflicts did arise community residents businesses and politicians all appealed to a shared notion of investment to justify their arguments about policy It is this social conception of property as an investment of value committed over time that government is responsible for protecting Becher s findings stand in stark contrast to the views of libertarian and left leaning activists and academics but recognizing property as investment she argues may offer a solid foundation for more progressive urban policies
