Politics And The Human Body Assault On Dignity:

A History of Political Murder in Latin America W. John Green, 2015-04-27 A sweeping study of political murder in Latin America This sweeping history depicts Latin America's pan regional culture of political murder Unlike typical studies of the region which often focus on the issues or trends of individual countries this work focuses thematically on the nature of political murder itself comparing and contrasting its uses and practices throughout the region W John Green examines the entire system of political murder the methods and justifications the perpetrators employ the victims and the consequences for Latin American societies Green demonstrates that elite and state actors have been responsible for most political murders assassinating the leaders of popular movements and other messengers of change Latin American elites have also often targeted the potential audience for these messages through the region's various dirty wars In spite of regional differences elites across the region have displayed considerable uniformity in justifying their use of murder imagining themselves in a class war with democratic forces While the United States has often been complicit in such violence Green notes that this has not been universally true with US support waxing and waning A detailed appendix exploring political murder country by country provides an additional resource for readers

Law, Mystery, and the Humanities Logan Atkinson, Diana Majury, 2008-01-01 The trans disciplinary study of law and the humanities is becoming a more widespread focus among scholars from a range of disciplines Complementary in several major ways concepts and theories of law can be used to formulate fresh ideas about the humanities and vice versa *Law Mystery and the Humanities* a collection of essays by leading scholars is based on the hypothesis that law has significant contributions to make to ongoing discussions of philosophical issues recurrent in the humanities The philosophical issues in question include the role of rationality in human experience the problem of dissent the persistence of suffering and the possibility of transcendence In each of these areas law is used to add complexity and offer divergent perspectives thus moving important questions in the humanities forward by introducing the possibility of alternative analysis Ranging from discussions of detective fiction Chomsky's universal grammar the poetry of Margaret Atwood the Great Plague of London and more *Law Mystery and the Humanities* offers a unique examination of trans disciplinary potential

Politics and the Human Body Jean Bethke Elshtain, J. Timothy Cloyd, 1995 Who or what determines the right to die Do advancing reproductive technologies change reproductive rights What forces influence cultural standards of beauty How do discipline punishment and torture reflect our attitudes about the human body In this challenging new book Jean Bethke Elshtain a nationally recognized scholar in political science and philosophy and J Timothy Cloyd a strong new voice in social and political science have assembled a collection of thought provoking essays on these issues written by some of the finest minds of our day

Human Rights and Private Wrongs Alison Brysk, 2013-04-15 *Human Rights and Private Wrongs* breaks new ground by considering a series of fascinating issues that are normally ignored by human rights specialists because they are too private to consider as policy issues children's labor migration refugee policy

towards unaccompanied minors financial matters of investor and business responsibility and complex questions involving access to the benefits of pharmaceutical research transnational organ trafficking and the control over genetic research

Encoding Capital Rodney Loepky, 2013-09-13 This book deals with the rapid changes in contemporary molecular biology particularly genome sciences and the manner in which they can be understood through the lens of political economy Specifically the work investigates the case of the United States led Genome Project HGP in order to show that even large scale basic science is closely bound up in the progression of capitalist social relations The work has in part been motivated by the lack of rigorous analysis of the HGP Most the existing literature tends to present either a chronological review of events surrounding the HGP or describe it thematically In contrast this book contributes to a needed discussion concerning the why and how of the HGP emergence It elucidates the features within capitalist social relations which have simultaneously enable the HGP and ensure its amenability to systemic demands The work s most compelling elements are both historical and analytical Historically it places the HGP within the context of wider political economic and social issues Related to this it puts forward an analytical explanatory understanding of the project s emergence making it a valuable tool for both political economists science society theorists and even bioethicists

Life, God, and Other Small Topics Eric Metaxas, 2011-10-13 This book is for the seeker in all of us the collector of wisdom and the person who asks What if from the author of Bonhoeffer Miracles and Martin Luther The Greek philosopher Socrates famously said that the unexamined life is not worth living Using this as a starting point Eric Metaxas created a forum encouraging successful professionals to actively think about life s bigger questions Thus Socrates in the City was born First presented to standing room only crowds in New York City and written by luminaries such as Dr Francis Collins Sir John Polkinghorne and Os Guinness these original essays grapple with extraordinary topics from Making Sense out of Suffering to Belief in God in an Age of Science No question is too big in fact the bigger the better because nowhere is it written that finding the answers to life s biggest questions shouldn t be exciting and even perhaps fun

Emotions, Politics and War Linda Åhäll, Thomas Gregory, 2015-07-03 A growing number of scholars have sought to re centre emotions in our study of international politics however an overarching book on how emotions matter to the study of politics and war is yet to be published This volume is aimed at filling that gap proceeding from the assumption that a nuanced understanding of emotions can only enhance our engagement with contemporary conflict and war Providing a range of perspectives from a diversity of methodological approaches on the conditions maintenance and interpretation of emotions the contributors interrogate the multiple ways in which emotions function and matter to the study of global politics Accordingly the innovative contribution of this volume is its specific engagement with

the role of emotions and constitution of emotional subjects in a range of different contexts of politics and war including the gendered nature of war and security war traumas post conflict reconstruction and counterinsurgency operations Looking at how we analyse emotions in war why it matters and what emotions do in global politics this volume will be of interest to students and scholars of critical security studies and international relations alike Politics of the Person as the Politics of Being David Walsh, 2015-12-15 Readers expecting a traditional philosophical work will be surprised and delighted by David Walsh's *Politics of the Person as the Politics of Being* his highly original reflection on the transcendental nature of the person A specialist in political theory Walsh breaks new ground in this volume arguing as he says in the introduction that the person is transcendence not only as an aspiration but as his or her very reality Nothing is higher That is what *Politics of the Person as the Politics of Being* strives to acknowledge The analysis of the person is the foundation for thinking about political community and human dignity and rights Walsh establishes his notion of the person in the first four chapters He begins with the question as to whether science can in any sense talk about persons He then examines the person's core activities free choice and knowledge and reassesses the claims of the natural sciences He considers the ground of the person and of interpersonal relationships including our relationship with God The final three chapters explore the unfolding of the person imaginatively in art in the personal time of history and in the space of politics *Politics of the Person as the Politics of Being* is a new way of philosophizing that is neither subjective nor objective but derived from the persons who can consider such perspectives The book will interest students and scholars in contemporary political philosophy philosophy of religion and any groups interested in the person personalism and metaphysics **Political Economy of Human Rights** Bas de Gaay Fortman, 2011-06-15 The plethora of literature produced over the past decade in response to the perceived failure of the human rights project to deliver results for billions of people living in adverse environments has usually focused on international legal standards and mechanisms with little regard for the root structural realities that constrain their implementation Hence a text that primarily focuses on the major challenge of realisation of human rights in the context of diverse realities is urgently needed This book then provides an analytical as well as inspirational text on human rights from a contextual perspective it offers a reconceptualisation of human rights as not merely legal resources but political tools as well After an introduction that familiarizes the reader with some of the key concepts used throughout the book is divided into six chapters The first two combine a critique of the overly legal use of human rights with a reconceptualisation of their potential as powerful tools outside of the legal context The next two chapters examine the nature of the structural challenges that face realisation both on the global and on the local level The last two chapters analyse two major areas of the human rights deficit the structural non implementation of the rights of the poor and the failing protection of non dominant collectivities Finally a concluding chapter elaborates on the main findings and insights gained The book combines rigorous juridical study with a focus on political economic analysis of rights in context Hence it aims at an interdisciplinary treatment of human rights as

opposed to current texts that have a tendency to be monodisciplinary The book should be of interest to students of human rights political economy law and conflict studies as well as those who work or research in these areas **The Palgrave Handbook of African Social Ethics** Nimi Wariboko, Toyin Falola, 2020-03-30 This Handbook provides a robust collection of vibrant discourses on African social ethics and ethical practices It focuses on how the ethical thoughts of Africans are forged within the context of everyday life and how in turn ethical and philosophical thoughts inform day to day living The essays frame ethics as a historical phenomenon best examined as a historical movement the dynamic ethos of a people rather than as a theoretical construct It thereby offers a bold incisive and fresh interpretation of Africa's ethical life and thought

Creating Human Nature Benjamin Gregg, 2022-10-20 Human genetic enhancement examined from the standpoint of the new field of political bioethics displaces the age old question of truth What is human nature This book displaces that question with another What kind of human nature should humans want to create for themselves To answer that question this book answers two others What constraints should limit the applications of rapidly developing biotechnologies What could possibly form the basis for corresponding public policy in a democratic society Benjamin Gregg focuses on the distinctly political dimensions of human nature where politics refers to competition among competing values on which to base public policy legislation and political culture This book offers citizens of democratic communities a broad perspective on how they together might best approach urgent questions of how to deal with the socially and morally challenging potential for human genetic engineering **Political Philosophy** Jean Hampton, 2018-02-12 In this sophisticated yet accessible text Hampton neatly synthesizes the classical tradition the giants of the modern period the dominant topics of the 20th century as well as the new questions and concerns that are just beginning to rewrite contemporary political philosophy Political philosophy perhaps even more than other branches of philosophy calls for constant renewal to reflect not just re readings of the tradition but also the demands of current events In this lively and readable survey Jean Hampton has created a text for our time that does justice both to the great traditions of the field and to the newest developments In a marvelous feat of synthesis she links the classical tradition the giants of the modern period the dominant topics of the twentieth century and the new questions and concerns that are just beginning to rewrite contemporary political philosophy Hampton presents these traditions in an engaging and accessible manner adding to them her own views and encouraging readers to critically examine a range of ideas and to reach their own conclusions Of particular interest are the discussions of the contemporary liberalism communitarianism debates the revival of interest in issues of citizenship and nationality and the way in which feminist concerns are integrated into all these discussions Political Philosophy is the most modern text on the topic now available the ideal guide to what is going on in the field It will be welcomed by scholars and students in philosophy and political science and it will serve as an introduction for readers from outside these fields **Doing Theology and Theological Ethics in the Face of the Abuse Crisis** Daniel J. Fleming, James F. Keenan SJ, Hans Zollner SJ, 2023-04-28 This volume is the fruit of a

theological laboratory initiated by the then Centre for Child Protection and the Catholic Theological Ethics in the World Church CTEWC called Doing Theology in the Face of Sexual Abuse Eventually those from the laboratory engaged those meeting for two years via virtual tables due to the COVID 19 pandemic In the end twenty six scholars offer insights on the crisis itself and pathways for moving forward There is a certain urgency about this volume which is not often reflected in works of theology or theological ethics The sheer scale of the undermining of human dignity through sexual abuse that has occurred within the church asks questions of these disciplines and scholars within them To what extent have we been blind to these issues Why have our efforts in theology and theological ethics been so slow to wrestle with this crisis How are theology and theological ethics implicated in the crisis And how might the disciplines be constructive in responding In this volume we encounter a diverse range of scholars from all around the world wrestling with these and other questions

Religion and Human Rights Wilhelm Gräb, Lars Charbonnier, 2015-05-19 Current processes of globalization are challenging Human Rights and the attempts to institutionalize them in many ways The question of the connection between religion and human rights is a crucial point here The genealogy of the Human Rights is still a point of controversies in the academic discussion Nevertheless there is consensus that the Christian tradition especially the doctrine that each human being is an image of God played an important role within the emergence of the codification of the Human Rights in the period of enlightenment It is also obvious that the struggle against the politics of apartheid in South Africa was strongly supported by initiatives of churchy and other religious groups referring to the Human Rights Christian churches and other religious groups do still play an important role in the post apartheid South Africa They have a public voice concerning all the challenges with which the multiethnic and economically still deeply divided South African society is faced with The reflections on these questions in the collected lectures and essays of this volume derive from an academic discourse between German and South African scholars that took place within the German South African Year of Science 2012 13
