Politics Of Harmony Land Dispute Strategies In Swaziland:

The Politics of Harmony Laurel L. Rose, 1992-01-31 Laurel Rose analyzes how traditional ruling elites in Swaziland as in other parts of Africa use harmony ideologies to downplay and resolve land disputes Such disputes could be used by foreign development agents or indigenous new elites as justification for implementing land tenure changes including a reduction of traditional elites power based upon land control Swazi commoners accept the cultural value and legitimacy of most harmony ideologies but they adopt various strategies when disputing about particular land rights in order to produce more favorable outcomes This book is unusual in its focus on political rather than economic dimensions of land tenure and disputes It searches for links between individual concerns with land use rights and national concerns with land policy It also examines gender and leadership issues associated with land showing how women and new elites threaten land interests of men and traditional leaders

Political Thought and the Public Sphere in Tanzania Emma Hunter, 2015-04-27 Political Thought and the Public Sphere in Tanzania is a study of the interplay of vernacular and global languages of politics in the era of decolonization in Africa Decolonization is often understood as a moment when Western forms of political order were imposed on non Western societies but this book draws attention instead to debates over universal questions about the nature of politics concept of freedom and the meaning of citizenship These debates generated political narratives that were formed in dialogue with both global discourses and local political arguments The United Nations Trusteeship Territory of Tanganyika now mainland Tanzania serves as a compelling example of these processes Starting in 1945 and culminating with the Arusha Declaration of 1967 Emma Hunter explores political argument in Tanzania s public sphere to show how political narratives succeeded when they managed to combine promises of freedom with new forms of belonging at local and national level

Political Identity and Conflict in Central Angola, 1975-2002 Justin Pearce, 2015-07-02 This book examines the internal politics of the war that divided Angola for more than a quarter century after its independence. It emphasises the Angolan people's relationship to the rival political forces that prevented the development of a united nation, an aspect of the conflict that has received little attention in earlier studies. Drawing upon interviews with farmers, town dwellers, soldiers and politicians in Central Angola, Justin Pearce examines the ideologies about nation and state that elites deployed in pursuit of hegemony and traces how people responded to these attempts at politicisation. The book not only demonstrates the potency of the rival conceptions of state and nation in shaping perceptions of self interest and determining political loyalty but also shows the ways in which allegiances could and did change for much of the Angolan population in response to the experience of military force

East African Doctors John Iliffe, 1998-08-27 John Iliffe's 1998 book is a history of the African medical profession in Uganda, Kenya and Tanzania from the earliest training of modern medical staff in the 1870s to the present day. Based on extensive research and dealing exclusively with African doctors, it offers an understanding of professionalisation in the Third World. It describes the recruitment and education of doctors, their understanding and practice of modern medicine, the struggle for international recognition of their qualifications and efforts to develop East African medical systems after independence and their experiences during a period of political and economic difficulty. The book ends with an account of the significant work of East African doctors in the study and control of AIDS. This is a major contribution to the social history of Africa and to the social history of medicine more broadly.

Path to Genocide in Rwanda Omar Shahabudin McDoom, 2021-03-11 The shocking characteristics of Rwanda's genocide in 1994 have etched themselves indelibly on the global conscience. The Path to Genocide in Rwanda combines extensive original field data with some of the best existing evidence to evaluate the myriad theories behind the genocide and to offer a rigorous and comprehensive explanation of how and why it occurred and why so many Rwandans participated in it. Drawing on interviews with over three hundred Rwandans, Omar Shahabudin McDoom systematically compares those who participated in the violence against those who did not. He contrasts communities that experienced violence early with communities where violence began late, as well as communities where violence was limited with communities where it was massive. His findings offer new perspectives on some of the most troubling questions concerning the genocide while also providing a broader engagement with key theoretical debates in the study of genocides and ethnic conflict.
