Politics Of School Decentralization:

The Politics of School Decentralization George R. LaNoue, Bruce L. R. Smith, 1973 Study of the issues related to the decentralization of educational administration in the USA and the consequences thereof for urban area educational systems examines the political behaviour of community level interest groups in confronting such problems as educational bureaucracy the education of minority group children racial conflict in the schools etc References **Decentralization of Education**

Edward B. Fiske, 1996-01-01 This book identifies and examines the political dimensions of decentralization Decentralization programs vary from country to country but there are common threads and fundamental questions in all situations The book covers the following themes and topics 1 a case study of school decentralization in Colombia over a period of more than two decades 2 why decentralization is political 3 why countries decentralize 4 what decentralization accomplishes 5 the importance of developing consensus and 6 how to begin building consensus Contains 32 references EH **Another Way**

Rebecca Clothey, Kai Heidemann, 2018-11-01 Drawing on a variety of methodological and theoretical perspectives the case studies compiled in *Another Way Decentralization Democratization and the Global Politics of Community Based Schooling* offer a comparative look at how global processes of educational decentralization have both helped and hindered the development of community based schools in local level settings across Europe Africa Asia and the Americas On the one hand the book shows how increased decentralization is often perceived as essential to assuring robust levels of democratization community participation and social justice in education On the other hand it is also shown how processes of educational decentralization are often experienced in local communities as a mechanism of increased austerity privatization and segregation **Final Report of the Politics of School Decentralization Project** Dan A. The Politics of Educational Decentralisation in Indonesia Irsyad Zamjani, 2021-12-10 The Politics of Educational Decentralisation in Indonesia A Quest for Legitimacy is a well written analytically sharp and compelling study of educational decentralisation in Indonesia Irsyad Zamjani provides fresh insights into this important topic The author treats educational reform as a window into much deeper questions about power the government's responsibility to its citizens and social change in Indonesia His findings should interest academics as well as practitioners with an interest in educational reform Professor Christopher Bjork Vassar College New York This is a remarkable book which should appeal not only to Indonesian scholars but also to educationists and political scientists to name just a few By tracing the path of decentralisation in the Indonesian educational reform in the early 2000s Zamjani shows how the central and municipal governments struggled in different ways to retain control over education in their domains through various mechanisms largely related to claims of legitimacy The study is grounded in new institutional theory and the interview and case study data provide a richness and depth in showing the dynamics of reform attempts Professor Lawrence J Saha Australian National University Canberra This book discusses the dynamics of educational

decentralisation in post reform Indonesia Taking sociology s new institutionalism approach and drawing upon data from documents and interviews with strategic informants the book investigates how institutional legitimacy of educational decentralisation was garnered manipulated and then contested Besides analysing global institutional pressures which influenced the national adoption of decentralisation reform and the central government s attempts to restore its legitimacy the book also offers comparative case studies of education governance in two local districts to highlight how this reform is responded to at the local level *School Decentralization in the Context of Globalizing Governance* Holger Daun,2006-11-23

Since the beginning of the 1980s decentralization has become a globalized policy and catchword in education a large number of countries around the world have formulated such a policy and many have also implemented it The policies and the changes at the national level have been researched but what has taken place and is taking place at the grassroots level has not received attention until recently This book presents grassroots cases from different countries against the background of the overall changes in governance philosophy and applications It uses case studies from countries in Africa Asia Europe and Latin America and describes what is occurring at this level The book gives an account of different types of decentralization and their impact The first two chapters describe principally structural and organizational educational changes in the broader context of globalized models and the pressure to create a competitive education system and changing governance Decentralization is one of the strategic aspects of this new mode of governance **The Politics of Comprehensive School Reforms** Katharina Sass,2022-08-25 Why are school systems structured differently across countries The Politics of Comprehensive School Reform examines this question through an in depth analysis of school politics in Germany and Norway during the post war period of educational expansion Using a Rokkanian theoretical framework the book argues that school politics can only be understood in light of the cleavages or political divides that shape actors interests ideologies and inclinations for who they want to cooperate with or not The book analyzes cross cutting cleavages connected to religion geography language anticommunism and gender and demonstrates how Norwegian social democrats and German Christian democrats built successful coalitions by mobilizing support from different social groups Extensively researched and expansively applicable this book contributes to the interdisciplinary literature on the politics of education and to the field of comparative welfare and education regime research This book is also available Open Access on Cambridge Core [The Political Economy of Education](#) Martin Carnoy,2024-02-15 The Political Economy of Education provides academically rigorous yet clear explanations of the economics and politics driving today s educational systems and how economists analyze them The book covers a host of topics central to teaching about education and crucial to educational policy These include how to use the tools of economic and political theory to take critical measure of education s role in social mobility and economic growth whether good teachers can overcome social class and race achievement gaps the effectiveness of early childhood and vocational education and debates on school accountability and whether increasing spending on schooling

improves quality The book also explores worldwide changes in higher education especially massification and increased stratification and privatization Written for upper undergraduate and graduate students in economics public policy and education and packed with real world examples this is an essential text for anyone interested in gaining fresh and international perspectives on education New York City Public Schools from Brownsville to Bloomberg Heather Lewis, 2015-04-26 When New York City mayor Michael Bloomberg centralized control of the city's schools in 2002 he terminated the city's 32 year experiment with decentralized school control dubbed by the mayor and the media as the Bad Old Days Decentralization grew out of the community control movement of the 1960s which was itself a response to the bad old days of central control of a school system that was increasingly segregated and unequal In this probing historical account Heather Lewis draws on new archival sources and oral histories to argue that the community control movement did influence school improvement in particular African American and Puerto Rican communities in the 1970s and 80s Lewis shows how educators with unique insights into the relationships between the schools and the communities they served enabled meaningful change with a focus on instructional improvement and equity that would be familiar to many observers of contemporary education reform With a resurgence of local organizing and potential challenges to mayoral control this informative history will be important reading for today's educational and community leaders **School Decentralization** Bruce Allen Bimber, 1993 It is possible to give a concrete meaning to the usually vague concept of decentralization by examining four core components First at the crux of decentralization is a downward shift in decision making power Administrative decentralization entails shifts internal to the institution Political decentralization shifts authority to external forces such as community boards These two strategies are not mutually exclusive Second studies of bureaucracies demonstrate that decentralization is compatible with strong leaders provided that leadership is exercised at lower levels in the administrative hierarchy Third decentralization requires the rejection of existing reward structures in favor of a system of incentives that establishes meaningful connections between professional conduct and rewards Fourth it is important to design a division of responsibility for ends and means among the district and schools that diminishes the role of explicit rules Most school districts reflect few of these four principles and their efforts and decentralization are often marginalized and incomplete Experiences to date with site based management the most common attempt at decentralization demonstrate the difficulty in producing authentic decentralization Contains 51 references TEJ **Urban Politics** J. Bellush, Dick Netzer, 2019-07-23 In many respects New York City is an unnatural wonder quite unlike any other American city and also unlike megacities in other industrial countries Its government and politics its physical attributes like the celebrated skyline and high population density and many of its social characteristics like the extraordinarily high percentage of the city's population that is foreign born are different But New York City at the same time shares with other American cities an array of political and governmental institutions practices traditions and pressures ranging from the long dominance and then long

decline in the role of party organizations in local government to the city's ultimate dependence on outside actors and forces to shape its political destiny

Politics and Partnerships Elisabeth S. Clemens, Doug Guthrie, 2010-11-15 Exhorting people to volunteer is part of the everyday vocabulary of American politics. Routinely members of both major parties call for partnerships between government and nonprofit organizations. These entreaties increase dramatically during times of crisis and the voluntary efforts of ordinary citizens are now seen as a necessary supplement to government intervention. But despite the ubiquity of the idea of volunteerism in public policy debates, analysis of its role in American governance has been fragmented. Bringing together a diverse set of disciplinary approaches, *Politics and Partnerships* is a thorough examination of the place of voluntary associations in political history and an astute investigation into contemporary experiments in reshaping that role. The essays here reveal the key role nonprofits have played in the evolution of both the workplace and welfare and illuminate the way that government's retreat from welfare has radically altered the relationship between nonprofits and corporations.

Interest Groups and Education Reform Veronica Donahue DiConti, 1996-10-10 During the 1980s the education policy agenda proceeded from a consensus reached by politicians, the business community, and educators to restructure the nation's public schools as a way to improve student achievement. This book begins with a critical examination of the impact of interest groups on American education since the inception of the first school system. Two restructuring proposals became extremely popular in the reform debate but stemmed from different premises about the best way to restructure the schools. The first, Public School Choice, centers on the idea that students should have the right to exit their assigned schools and attend a school of their choice. Schools would then be forced to improve because they would have to compete in the marketplace of students. The second proposal, School Based Management, looks at the merits of strengthening the mechanism of voice for parents, students, and teachers in the management of their neighborhood school. Those involved in the education process assess the needs, resources, and development of local schools. Through two case studies, Minnesota and Baltimore City, the efforts and intentions of reformers demonstrate the ability of interest groups to capture and define the purpose of a public institution at the state and local level.

The New Politics Of Race And Gender Catherine Marshall, 2002-11-01 What can schools do to eliminate sexism and racism? By the 1990s, with shifting demographics, disillusionment with conventional liberal policies, and new political coalitions, the politics of race and gender requires new analyses. The chapters in this book demonstrate how the politics of race and gender enter into proposals for parental choice, business involvement in schools, definitions of good leadership, special schools for minority children, curriculum debates, and debates about testing and accountability. Catherine Marshall provides the political historical context of race and gender politics in schools, and the following eighteen chapters provide a greater in-depth analysis. The

chapters include work of scholars and policy analysts focusing on policy and policy implementation at all levels of school politics in the US Australia and Israel The book ends with critical policy analysis raising deep theoretical questions and pulling out the chronic race and gender issues in education politics **Community Power in a Postreform City** Eugene B. Rumer, Dmitrii Trenin, Huasheng Zhao, 2007 The eminent contributors to this volume offer a four part analysis of Central Asia's new importance in world affairs since the disintegration of the Soviet Union *The Political Economy of Education in South Asia* John Richards, Manzoor Ahmed, Shahidul Islam, 2021-12-17 With the exception of Sri Lanka South Asian countries have not achieved quality basic education an essential measure for escaping poverty inequality and social exclusion In *The Political Economy of Education in South Asia* John Richards Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy *The Political Economy of Education in South Asia* documents the weak core competency reading and math outcomes in government primary schools in India Pakistan Bangladesh and Nepal and the consequent rapid growth of non government schools over the last two decades It compares the training hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland Discussing reform options it makes the case public good and public priorities are better served when both public and non government providers come under a strong public policy and accountability framework *The Political Economy of Education in South Asia* draws on the authors broad engagement in education research and practice in South Asia as well as analysis by prominent professors of education and NGO leaders to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth **Political Science Quarterly** , 1984 Offers timely analysis of both domestic and foreign policy issues as well as of political institutions and processes
