English Version by Charles Meisl, Etc. **Engineering** ,1961-10     Six Men Built the Modern Auto Industry Richard Alan Johnson, This is the story of six extraordinary men who each built something from nothing redefined the automotive industry after World War II and redirected its course for the future Henry Ford II visionary autocrat with an iron will Shoichiro Honda most successful

automotive entrepreneur since Henry Ford I Eberhard von Kuenheim founder of the modern BMW Lee Iacocca Ferdinand Piech builder of Volkswagen Group and Robert Lutz who left retirement at 70 and is still highly influential at General Motors What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world They not only re shaped the auto business the six made a sizable dent in the societies they lived in To a man they were great cognitive thinkers Their minds worked with animal speed even instinct speed But more than anything these were brave and cantankerous souls who rode the waves of history Each could see the future They could just make it out sometimes imperfectly but could see it nonetheless They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again The compelling story of the global car business over the past half century A lively and engaging narrative that recounts some times collaborative sometimes archly antagonistic interactions among the men Full of business revelations at the highest level written by a journalist operating at the heart of the industry Global appeal that shows how automotive groups in the USA Europe and Asia have influenced each other A business story interlaced with personal details that explains why the six were determined to be successful About the Author For two decades Richard Johnson has worked for Crain Communications publisher of the world s leading automotive business publications Founding editor of Crain s Automotive News Europe he has been a reporter and editor for the group in Detroit Tokyo Frankfurt and London He is currently a senior editor with Automotive News in Detroit and regularly talks to the most senior executives in the leading car manufacturing groups

**Porsche** Dennis Adler, 2016-09-15 Porsche The Classic Era showcases the history of Porsche s iconic air cooled sports cars and features rare historic images Thinking Small Andrea Hiott, 2012-01-17

Sometimes achieving big things requires the ability to think small This simple concept was the driving force that propelled the Volkswagen Beetle to become an avatar of American style freedom a household brand and a global icon The VW Bug inspired the ad men of Madison Avenue beguiled Woodstock Nation and has recently been re imagined for the hipster generation And while today it is surely one of the most recognizable cars in the world few of us know the compelling details of this car s story In Thinking Small journalist and cultural historian Andrea Hiott retraces the improbable journey of this little car that changed the world Andrea Hiott s wide ranging narrative stretches from the factory floors of Weimar Germany to the executive suites of today s automotive innovators showing how a succession of artists and engineers shepherded the Beetle to market through periods of privation and war reconstruction and recovery Henry Ford s Model T may have revolutionized the American auto industry but for years Europe remained a place where only the elite drove cars That all changed with the advent of the Volkswagen the product of a Nazi initiative to bring driving to the masses But Hitler s concept of the people s car would soon take on new meaning As Germany rebuilt from the rubble of World War II a whole generation succumbed to the charms of the world s most huggable automobile Indeed the story of the Volkswagen is a story about people and Hiott introduces us to the men who believed in it built it and sold it Ferdinand Porsche the visionary

Austrian automobile designer whose futuristic dream of an affordable family vehicle was fatally compromised by his patron Adolf Hitler's monomaniacal drive toward war Heinrich Nordhoff the forward thinking German industrialist whose management innovations made mass production of the Beetle a reality and Bill Bernbach the Jewish American advertising executive whose team of Madison Avenue mavericks dreamed up the legendary ad campaign that transformed the quintessential German compact into an outsize worldwide phenomenon Thinking Small is the remarkable story of an automobile and an idea Hatched in an age of darkness the Beetle emerged into the light of a new era as a symbol of individuality and personal mobility a triumph not of the will but of the imagination
