Everett Edgar King

Red Train:

Reimagining Time Tanya Bub, Jeffrey Bub, 2021-04-13 A quirky funny and accessible blend of science and art that delves into the heart of Einstein's theory of relativity. It was a link to his 1905 paper, an early attempt at explaining his revolutionary ideas on space, time, and matter that drew Tanya Bub into Albert Einstein's imaginative vision of the world. What particularly struck her was how Einstein interwove words and math to create clear visuals illustrating his theories. As an artist, she naturally started doodling as she worked her way through his concepts, creating drawings that intuitively demonstrated Einstein's core principles. In *Reimagining Time*, Tanya Bub teams up with her father, the distinguished physicist Jeffrey Bub, to create a quirky and accessible take on one of science's most revolutionary discoveries. Blending original art and text, they guide readers through Einstein's theory of special relativity to expose truths about our universe: time is relative, lengths get shorter with motion, energy and mass are interchangeable, and the Universe has a speed limit.

Railway Signaling Everett Edgar King, 1921 *American Passenger Trains and Locomotives Illustrated* Mark Wegman, 2008-11-17 A lavishly illustrated look at the glory years of travel by rail with over 160 profiles, front and top views, and interior layouts depicting three dozen of the nation's most celebrated trains of the golden age.

Report of the ... Meeting British Association for the Advancement of Science, 1855 *Reconsidering Conceptual Change: Issues in Theory and Practice* Margarita Limón, L. Mason, 2007-05-08 The chapters in this volume derive from a symposium held in Madrid, Spain, from 6-8 November 1998. Organized and supported by the Autonomous University of Madrid, the meeting was part of the activities of the Special Interest Group SIG on Conceptual Change of the European Association for Research on Learning and Instruction (EARLI), coordinated by the editors of this book. The volume brings together contributions from leading researchers investigating the role of conceptual change to enhance meaningful learning in the classroom. The aim of the volume is to present the state of the art on a topic that has become very relevant to explaining how students and people in general build their knowledge and incorporate new concepts and ideas. The volume keeps the four main sessions in which the symposium was articulated. They were structured around both theoretical and practical issues of conceptual change. Particular attention was paid to discussing the characteristics of individuals' prior knowledge and to the more recent topic of how to integrate social, motivational, and contextual aspects of learning within conceptual change research. Parts 1 and 2.
