## Redefining Death:

**An Introduction to Bioethics** Thomas Anthony Shannon,1997 In its third edition this is a primer on the major bioethics issues of our time with helpful discussion questions and bibliography All of the chapters have been revised and updated

Fragments on the Deathwatch Louise Harmon,1999-02-23 Keeping vigil over the dying is an essential human practice with long cultural traditions and profound psychological benefits Yet as legal scholar Louise Harmon shows the institutions of modern life from hospitals to courtrooms intrude on the practice In this humane and lyrical book Harmon looks at literature philosophy history and autobiography as she delicately probes the taboos around discussion of death She asks whether the law can recognize the needs of families and loved ones and protect the space of their grieving Christianity and Confucianism Christopher Hancock,2020-12-10 Christianity and Confucianism Culture Faith and Politics sets comparative textual analysis against the backcloth of 2000 years of cultural political and religious interaction between China and the West As the world responds to China s rise and China positions herself for global engagement this major new study reawakens and revises an ancient conversation As a generous introduction to biblical Christianity and the Confucian Classics Christianity and Confucianism tells a remarkable story of mutual formation and cultural indebtedness East and West are shown to have shaped the mind heart culture philosophy and politics of the other and far more perhaps than either knows or would want to admit Christopher Hancock has provided a rich and stimulating resource for scholars and students diplomats and social scientists devotees of culture and those who pursue wisdom and peace today *Organ and Tissue Transplantation* David Price,2017-05-15 Organ transplantation has been one of the miracles of modern day medicine but in addition to presenting enormous technical and clinical challenges it throws up major ethical and legal issues principally from the perspective of the donor Evolving capabilities in the spheres of both organ and tissue transplantation coupled with rapidly escalating demand assert consistent and critical pressure on our ethical and legal principles and frameworks including the expansion of the potential donor pool beyond the conventional categories of donor This volume brings together seminal papers analyzing such matters in the context of an ever increasingly important area of clinical practice *Old Age* John Vincent,2003-12-08 Recent decades have seen a fundamental change in the age structure of many western societies In these societies it is now common for a fifth to a quarter of the population to be retired for fewer babies to be born than is required to sustain the size of the population and for life expectancy to exceed eighty years old This book provides an overview of the key issues arising from this demographic change **Philosophy of Medicine** Fred Gifford,2011-08-23 This volume covers a wide range of conceptual epistemological and methodological issues in the philosophy of science raised by reflection upon medical science and practice Several chapters examine such general meta scientific concepts as discovery reduction theories and models causal inference and scientific realism as they apply to medicine or medical science in particular Some discuss important concepts specific to medicine diagnosis health disease brain death A topic such as evidence for instance is examined at a

variety of levels from social mechanisms for guiding evidence based reasoning such as evidence based medicine consensus conferences and clinical trials to the more abstract analysis of experimentation inference and uncertainty Some chapters reflect on particular domains of medicine including psychiatry public health and nursing The contributions span a broad range of detailed cases from the science and practice of medicine as well as a broad range of intellectual approaches from conceptual analysis to detailed examinations of particular scientific papers or historical episodes Chapters view philosophy of medicine from quite different angles Considers substantive cases from both medical science and practice Chapters from a distinguished array of contributors

**Violence and Subjectivity** Veena Das,2000-10-02 A collection of original essays that address the ways in which violence manifests itself on societal and interpersonal levels analyzing how different kinds of violence are and are not interpreted on the world stage By looking at hotspots of conflict the contributors discuss the nature of violence in an age of worldwide crisis management

**Limits** Roger B. Dworkin,1996-09-22 An excellent resource for entry level courses on bioethics for health care practitioners law students and physicians Choice Dworkin s provocative arguments will challenge readers who have come to accept the law s intrusion as a necessary response to biomedical advances New England Journal of Medicine

Important and refreshing Dworkin's conclusions regarding the limited role of law and especially legislation may come as a surprise to many. When popular and political views are almost evenly divided, looking to legislation for a solution is a mistake. Walter Wadlington. The ethical and social dilemmas associated with abortion, sterilization, assisted reproduction, genetics, death and dying, and biomedical research have led many to turn to the legal system for solutions. Rogert Dworkin argues that resort to law often overlooks the limitations of legal institutions and he suggests a more limited use of the legal system will produce more effective resolution of bioethical dilemmas.
