use in creative writing courses or by individual writers at home No other book contains such detailed witty and professional advice on the genre

Representing Reason Rachel Joffe Falmagne, Marjorie Hass, 2002-10-16 Philosophy's traditional man of reason independent neutral unemotional is an illusion That's because the man of reason ignores one very important thing the woman As feminist philosophy grew in the 1980s and 90s it became clear that the attributes philosophical tradition wrote off as womanly are in fact part of human nature No longer can philosophy maintain the dichotomy between the rational man and the emotional woman but must now examine a more complex human being able to reason and feel Yet feminist philosophy also makes it clear that men and women theorize the world in different ways from different perspectives

Representing Reasons Feminist Theory and Formal Logic collects new and old essays that shed light on the underexplored intersection of logic and feminism The papers in this collection cross over many of the traditional divides between continental and analytic philosophy between philosophical reflection and empirical investigation and between empirical investigations with an individual or societal grain of analysis This is possible because Representing Reasons frames the relationship between logic and feminism in terms of issues rather than historical figures or methodologies As such the articles serve as a model for crossing these divides just as they break down the traditional divide between logic and feminism

The Gender Question In Education Ann Diller, 2018-10-08 In this innovative book four prominent philosophers of education introduce readers to the central debates about the role of gender in educational practice policymaking and theory More a record of a continuing conversation than a statement of a fixed point of view The Gender Question in Education enables students and practicing teachers to think through to their own conclusions and to add their own voices to the conversation Throughout the authors emphasize the value of a gender sensitive perspective on educational issues and the relevance of an ethics of care for educational practice Among the topics discussed are feminist pedagogy gender freedom in public education androgyny sex education multiculturalism the inclusive curriculum and the educational significance of an ethics of care The multi-author dialogic structure of this book provides unusual breadth and cohesiveness as well as a forum for the exchange of ideas making it both an ideal introduction to gender analysis in education and a model for more advanced students of gender issues
