Metamorphic Imagery in Ancient Chinese Art and Religion Elizabeth Childs-Johnson, John S Major, 2023-05-30 Metamorphic Imagery in Ancient Chinese Art and Religion demonstrates that the concept of metamorphism was central to ancient Chinese religious belief and practices from at least the late Neolithic period through the Warring States Period of the Zhou dynasty Central to the authors argument is the ubiquitous motif in early Chinese figurative art the metamorphic power mask While the motif underwent stylistic variation over time its formal properties remained stable underscoring the image s ongoing religious centrality It symbolized the metamorphosis through the phenomenon of death of royal personages from living humans to deceased ancestors who required worship and sacrificial offerings Treated with deference and respect the royal ancestors lent support to their living descendants ratifying and upholding their rule neglected they became dangerous even malevolent Employing a multidisciplinary approach that integrates archaeologically recovered objects with literary evidence from oracle bone and bronze inscriptions to canonical texts all situated in the appropriate historical context the study presents detailed analyses of form and style and of change over time observing the importance of relationality and the dynamic between imagery materials and affects This book is a significant publication in the field of early China studies presenting an integrated conception of ancient art and religion that surpasses any other work now available

The Archaeology of China Li Liu, Xingcan Chen, 2012-04-30 Past present and future The archaeological materials recovered from the Anyang excavations in the period between 1928 and 1937 have laid a new foundation for the study of ancient China Li C 1977 ix When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928 the historicity of the Shang dynasty was confirmed beyond dispute for the first time Li C 1977 ix xi This excavation thus marked the beginning of a modern Chinese archaeology endowed with great potential to reveal much of China s ancient history Half a century later Chinese archaeology had made many unprecedented discoveries which surprised the world leading Glyn Daniel to believe

that a new awareness of the importance of China will be a key development in archaeology in the decades ahead Daniel 1981 211 This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that the Golden Age of Chinese archaeology is arriving Su B 1994 139 140 In recent decades archaeology has continuously prospered becoming one of the most rapidly developing fields in social science in China *Chinese Annals in the Western Observatory* Edward Shaughnessy, 2019-11-18 Since the beginning of the twentieth century hundreds of thousands of documents of all sorts have been unearthed in China opening whole new fields of study and transforming our modern understanding of ancient China While these discoveries have necessarily taken place in China Western scholars have also contributed to the study of these documents throughout this entire period This book provides a comprehensive survey of the contributions of these Western scholars to the field of Chinese paleography and especially to study of oracle bone inscriptions bronze and stone inscriptions and manuscripts written on bamboo and silk Each of these topics is provided with a comprehensive narrative history of studies by Western scholars as well as an exhaustive bibliography and biographies of important scholars in the field It is also supplied with a list of Chinese translations of these studies as well as a complete index of authors and their works Whether the reader is interested in the history of ancient China ancient Chinese paleographic documents or just in the history of the study of China as it has developed in the West this book provides one of the most complete accounts available to date

Archaeology of Asia Miriam T. Stark, 2008-04-15 This introduction to the archaeology of Asia focuses on case studies from the region's last 10 000 years of history Comprises fifteen chapters by some of the world's foremost Asia archaeologists Sheds light on the most compelling aspects of Asian archaeology from the earliest evidence of plant domestication to the emergence of states and empires Explores issues of cross cultural significance such as migration urbanism and technology Presents original research data that challenges readers to think beyond national and regional boundaries Synthesizes work previously unavailable to western readers *The Evolution of Chinese Filiality* Deborah Lynn Porter, 2022-03-10 This unique book brings a fresh interdisciplinary approach to the analysis of ancient Chinese history creating a historical model for the emergence of cultural mainstays by applying recent dramatic findings in the fields of neuroscience and cultural evolution The centrality in Chinese culture of a deep reverence for the lives of preceding generations filial piety is conventionally attributed to Confucius 551 479 B C who viewed hierarchical family relations as foundational for social order Here Porter argues that Confucian conceptions of filiality themselves evolved from a systemized set of behaviors and thoughts a mental structure which descended from a specific Neolithic mindset and that this psychological structure was contoured by particular emotional conditions experienced by China's earliest farmers Using case study analysis from Neolithic sky observers to the dynastic cultures of the Shang and Western Zhou the book shows how filial piety evolved as a structure of feeling a legacy of a cultural predisposition toward particular moods and emotions that were inherited from the ancestral past Porter also brings new urgency to the topic of ecological grief linking the distress central to the evolution of the filial structure to its

catalyst in an environmental crisis With a blended multidisciplinary approach combining social neuroscience cultural evolution cognitive archaeology and historical analysis this book is ideal for students and researchers in neuropsychology religion and Chinese culture and history Archaeology of East Asia Gina L. Barnes, 2015-10-31 Archaeology of East Asia constitutes an introduction to social and political development from the Palaeolithic to 8th century early historic times It takes a regional view across China Korea Japan and their peripheries that is unbounded by modern state lines This viewpoint emphasizes how the region drew on indigenous developments and exterior stimuli to produce agricultural technologies craft production political systems religious outlooks and philosophies that characterize the civilization of historic and even modern East Asia This book is a complete rewrite and update of The Rise of Civilization in East Asia first published in 1993 It incorporates the many theoretical technical and factual advances of the last two decades including DNA gender and isotope studies AMS radiocarbon dating and extensive excavation results Readers of that first edition will find the same structure and topic progression While many line drawings have been retained new color illustrations abound Boxes and Appendices clarify and add to the understanding of unfamiliar technologies For those seeking more detail the Appendices also provide case studies that take intimate looks at particular data and current research The book is suitable for general readers East Asian historians and students archaeology students and professionals Praise for The Rise of Civilization in East Asia the best English introduction to the archaeology of East Asia brilliantly integrates the three areas into a broad regional context Prof Mark Hudson **The Animal and the Daemon in Early China** Roel Sterckx, 2012-02-01 Exploring the cultural perception of animals in early Chinese thought this careful reading of Warring States and Han dynasty writings analyzes how views of animals were linked to human self perception and investigates the role of the animal world in the conception of ideals of sagehood and socio political authority Roel Sterckx shows how perceptions of the animal world influenced early Chinese views of man's place among the living species and in the world at large He argues that the classic Chinese perception of the world did not insist on clear categorical or ontological boundaries between animals humans and other creatures such as ghosts and spirits Instead the animal realm was positioned as part of an organic whole and the mutual relationships among the living species both as natural and cultural creatures were characterized as contingent continuous and interdependent
