Promoting Qualitative Research Methods for Critical Reflection and Change Wang, Viktor, 2021-04-16 The philosophical foundation of emancipatory knowledge lies in critical theory. In this paradigm instrumental and communicative knowledge are not rejected but are limited. If we do not question current scientific and social theories and accepted truths we may never realize how we are constrained by their inevitable distortions and errors. Without the possibility of critical questioning of ourselves and our beliefs such constraining knowledge can be accepted by entire cultures. The research paradigm that is relevant for constructing this kind of knowledge is the critical paradigm. Data are always qualitative and have specific methods of research. Quantitative research unquestionably has a place and is fundamental to scientific advances but qualitative research delves into what it is to be human. Through qualitative research we gain insight into communicative knowledge its rich nature and the mechanisms by which communicative knowledge is formed and interpreted. Qualitative research enables the necessary exploration and critical analysis of social systems and uncovers and facilitates critical reflections on the inevitable assumptions which shape social behavior and interaction thereby stimulating and empowering change. *Promoting Qualitative Research Methods for Critical Reflection and Change* provides readers with a comprehensive

array of qualitative research methods which can be implemented in a variety of contexts for a variety of purposes The chapters explore the impact uses and methodologies for qualitative research across various fields of research This book is ideal for practitioners researchers academicians and students interested in the use of qualitative research methods
