Reflections On School Integration Colloquium Proceedings:

Reflections on School Integration Mokubung O. Nkomo, Carolyn McKinney, Linda Chisholm, 2004 School integration means among other things that the divisions created by apartheid need to be addressed systematically and systemically Integration is not merely about changing the racial demographics of learner and educator bodies It means schools changing to meet the needs of all children fostering meaningful interaction among learners in the classroom on the playground and in extra mural activities as well as instilling a human rights culture It means constructing curricula texts and pedagogies that are informed by a democratic ethos and it requires teachers school managers and communities that are equipped to promote a democratic school environment In short it is about inclusivity and social cohesion And the issue of integration is as pertinent internationally as it is in South Africa questions of race racism citizenship and diversity are central to school systems throughout the world This book contains the proceedings of a colloquium held in October 2003 attended by leading South African and international researchers to take stock of the status quo in school integration and identify new directions research should be taking to support the process of change *Proceedings of the International Conference on Education, Reflection and Development* Ion Albulescu, 2015-06-18 The International Conference on Education Reflection and Development took place in May 2013 at Babes Bolyai University of Cluj Napoca Romania TThe event was organized by the Educational Sciences Department of the Faculty of Psychology and Educational Sciences and brought together participants from various different countries including Israel Greece Turkey Republic of Moldova the United States of America the United Kingdom and Romania The conference gave these scholars the opportuni *ICEL2013-Proceedings of the 8th International Conference on e-Learning* Eunice Ivala, 2013-06-27 *Textbooks for Diverse Learners* Carolyn McKinney, 2005 Child Youth and Family Development Research Programme **Teacher Education and the Challenge of Diversity in South Africa** Crispin Hemson, 2006 Conflicts in schools over race fees or language frequently make headlines in South Africa Such conflicts reflect the multifaceted issue of learner diversity encompassing racial class gender religious linguistic physical and other differences The need to handle such differences in equitable ways poses new challenges for teachers and teacher education How are teacher education institutions preparing students for teaching in schools that are different from the ones they experienced as learners What kinds of skills are they providing to enable teachers to deal with diversity and difference amongst learners Selected Proceedings of the 36th Annual Conference on African Linguistics Olaoba F. Arasanyin, Michael A. Pemberton, 2006 This volume contains 25 papers selected from the 36th Annual Conference on African Linguistics ACAL 36 which was held at Georgia Southern University in 2005 The theme of the conference was Shifting the Center of Africanism Language Economic Regionalism and Globalization which reflected Africa s struggle with its past as well as its gradual political maturation in a globalized world Along with the plenary papers by Zaline Makini Roy Campbell and Paul Tiyambe Zeleza the papers in this volume are organized into sections on phonology syntax morpho semantics

language in pedagogy and language in social context *Learning from Difference: Comparative Accounts of Multicultural Education* Joseph Lo Bianco, Aydin Bal, 2016-03-30 This book analyses the experiences of multicultural education in nine very different international settings uncovering insights from a vast variety of educational contexts Taking a multi critical approach in reporting and discussing problems faced by increasingly multicultural and multilingual societies the nine case studies reflect radically different assumptions about what counts as difference and what should be the appropriate ways for education systems to respond to differences While each country's approach seems unique analysis of the divergent treatments of internal population diversity elicits a genuinely global instance of the increasingly shared phenomenon of cultural pluralism Discussing various successes and failures of policy enactment theory pedagogy and management of diversity the book isolates both the differences and similarities in the unique geopolitical and socio historical contexts of the countries investigated A key value of the book is that it greatly expands the range of settings experiences epistemologies ontologies and practical experiences that are typically encountered in mainstream discussion of what counts as multicultural education In effect all societies are in some way dealing with difference this volume helps widen the scope of reflection and thus facilitates increased global learning from difference

The Construction, Negotiation, and Representation of Immigrant Student Identities in South African schools Saloshna Vandeyar, Thirusellvan Vandeyar, 2015-02-01 This is a ground breaking research study on Black immigrant identities in South African schools It is the first major book on racial integration and immigrant children in South African schools The overall aim of this study is to investigate how immigrant students negotiate and mediate their identity within the South African schooling context This study set out to explain this complex phenomenon guided by the following research objectives One to describe how immigrant student identities are framed challenged asserted and negotiated within the institutional cultures of schools Two to evaluate the extent to which the ethos of these schools has been transformed towards integration in the truest sense and to determine how immigrant students perceive this in practice Three to explore the transnational social fields in terms of social networks and cross border linkages of immigrant students and how this impacts on their identity formation Four to determine if there are any new forms of immigrant student self identities that are beginning to emerge Five to determine the extent to which racial desegregation has been accompanied by social integration between immigrant and local students Six to determine the impact of the South African social schooling context on immigrant student identity formation And seven to identify critical lessons and good practice that could be learnt and used to accelerate the racial desegregation and social integration of immigrant students in South African schools

Currere from Apartheid to Inclusion Shani Steyn, 2024-06-14 This volume demonstrates the instrumental use of Currere as a methodology to bring about Deracialisation through transformational learning by a white educator in Post Apartheid South Africa Offering an honest and vulnerable recognition of privilege and exclusivity it disrupts deep seated racial bias and assumptions unveils racial blind spots and confronts the discourse that South African white

educators are overtly or covertly perpetuating systemic racism within schools Based on autoethnographic analyses of the author's lived educational experiences within the Apartheid regime it uses the theoretical concepts of Currere to initiate her journey towards Deracialisation and transform her current pedagogical practice In doing so the book demonstrates how critical self examination of underlying beliefs that lead to actions and how the past in this case being born raised and educated within the Apartheid era can influence one's teaching in ways that harm the educational development of culturally diverse learners Grappling with how autoethnographical experiences in a specific setting can inform current pedagogy and be used to bring about professional and personal transformation this book will be of interest to scholars postgraduate students and educational researchers with interests in curriculum theory race and education transformative learning Deracialisation and autoethnography

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
