Reform In Great Britain And Germany 1750 185:

Materials of the Mind James Poskett, 2019-05-10 This is not only the first global history of nineteenth century science but the first global history of phrenology Phrenology was the most popular mental science of the Victorian age From American senators to Indian social reformers this new mental science found supporters around the globe *Materials of the Mind* tells the story of how phrenology changed the world and how the world changed phrenology This is a story of skulls from the Arctic plaster casts from Haiti books from Bengal and letters from the Pacific Drawing on far flung museum and archival collections and addressing sources in six different languages *Materials of the Mind* is an impressively innovative account of science in the nineteenth century as part of global history It shows how the circulation of material culture underpinned the emergence of a new materialist philosophy of the mind while also demonstrating how a global approach to history can help us reassess issues such as race technology and politics today

Becoming a Physician Thomas Neville Bonner, 2000 Focusing on the social intellectual and political context in which medical education took place Thomas Neville Bonner offers a detailed analysis of transformations in medical instruction in the United Kingdom France Germany and the United States between the Enlightenment and World War II From a unique comparative perspective this study considers how divergent approaches to medical instruction in these countries mirrored as well as impacted their particular cultural contexts The book opens with an examination of key developments in medical education during the late eighteenth century and continues by tracing the evolution of clinical teaching practices in the early 1800s It then charts the rise of laboratory based teaching in the nineteenth century and the progression toward the establishment of university standards for medical education during the early twentieth century Throughout the author identifies changes in medical student populations and student life including the opportunities available for women and minorities

The Age of Cultural Revolutions Colin Jones, Dror Wahrman, 2002-01-08 This superb collection of essays brings together the most exciting new work in cultural and literary history Although the authors focus on the various cultural revolutions of the late 18th and early 19th centuries the significance of their investigations extends far beyond that moment They show how the major categories of modern social life took root in this era but they emphasize the surprising and often paradoxical ways those developments took place Nothing about the experience of class gender race nation sentiment or even death was pre ordained These essays will enable readers to take a fresh new look at the origins of modernity Lynn Hunt editor of *The New Cultural History* and coeditor of *Beyond the Cultural Turn* This is a valuable and provocative set of essays Differing markedly in subject matter they are linked by their intelligence and concern to reassess early modern English and French histories and the differences conventionally drawn between them in the light of current work on language class race and gender Linda Colley author of *Britons Forging the Nation 1707 1837*

Peaceful and Violent Origins of Voting Rights Toke S. Aidt, Raphaël Franck, 2025 The Great Reform Act of 1832 was a pivotal moment in British political development that opened the door of democratic reform entailing a slow and gradual journey to universal suffrage secret ballot and competitive elections But it could have failed In Peaceful and Violent Origins of Voting Rights Toke S Aidt and Raphaël Franck articulate a new process based perspective on the study of democratization

through a detailed analysis of the Great Reform Act of 1832. Instead of using the historical narrative to provide evidence of a particular theory, the authors use microdata generated by the reform to test competing theories. Aidt and Franck apply their approach to the Reform Bill through econometric analyses that draw on rich micro political data to show why the reform succeeded despite significant opposition at three different stages in both the House of Commons and the House of Lords, as well as winning popular support in a general election. While fears of revolution were critical in generating popular support for the Reform Bill in the 1831 General Election, they argue that it was mainly extra-parliamentary agitation from reform societies that helped the bill obtain its one-vote majority in the House of Commons. By viewing democratic reform as a process rather than as a single event, the authors provide more nuanced answers to what caused the West to extend the franchise. Further, the book presents new insights into the underlying forces of democratisation processes.

From Jack Tar to Union Jack Mary A. Conley, 2017-03-01. *Jack Tar to Union Jack* examines the intersection between empire, navy and manhood in British society from 1870 to 1918. Through analysis of sources that include court-martial cases, sailors' own writings and the HMS *Pinafore*, Conley charts new depictions of naval manhood during the Age of Empire, a period which witnessed the radical transformation of the navy, the intensification of imperial competition, the democratisation of British society and the advent of mass culture. *Jack Tar to Union Jack* argues that popular representations of naval men increasingly reflected and informed imperial masculine ideals in Victorian and Edwardian Britain. Conley shows how the British Bluejacket, as both patriotic defender and dutiful husband and father, stood in sharp contrast to the stereotypic image of the brave but bawdy tar of the Georgian navy. This book will be essential reading for students of British imperial history, naval and military history and gender studies.
