Reform Of Bismarckian Pension Systems:

The Reform of Bismarckian Pension Systems Martin Schludi, 2005 Offers an analysis of the political process involved in the reform of the pension systems in European countries The Reform of Bismarckian Pension Systems , 2003

Competing for the Exits Takeshi Ito, 2009 This paper analyzes a new trend in recent reforms of Bismarckian pension systems in Europe and Japan It aims at revising the conventional argument that emphasizes the concertation between business and labor and at shedding a new light on the role of party politics in welfare states In advanced democracies the overhaul of pension system is one of the principle agendas of welfare and economic reforms However according to existing researches fundamental reform is rare if any in Bismarckian pension systems because the very characteristics of the system a pay as you go scheme highly occupational segmentation and a high replacement rate create costly financial barriers and generate strong veto players against reform Under such a condition in the era of welfare state retrenchment the only possibility is step by step reform based on the blame avoidance approach to gain consensus from many veto players The result is piecemeal amendments in pension finance and institutions conducted through concertation among key interest groups especially business and labor Recent reforms in several countries France Germany Italy Sweden and Japan however do not fit into this line of argument These countries have recently experienced large scale comprehensive reforms by unifying fragmented schemes into integrated fully funded schemes Strikingly these reforms were mostly government led and carried out without the consensus among major societal actors The conventional argument on concertation cannot explain this change To explain this development of pension reforms this paper presents a new theoretical framework that focuses on a two dimensional consensus gaining strategies for policymakers Policymakers simultaneously try to obtain support from major interest groups corporatist arena on the one hand and from political parties electoral arena on the other The core of this argument is that policy makers in Bismarckian pension countries need not necessarily compromise with interest groups to fend off their vetoes They can also rely on the support from political parties to overcome their vetoes They count on either of these two types of support or sometimes mix them to implement pension reforms This analysis clearly depicts the changing nature of recent reforms of Bismarckian pension system The similarities and the differences found in case studies in terms of the mix of the two types of consensus building have implications on the literature on varieties of capitalism in these countries It also sheds a new light on the importance party politics plays in institutional reform in a political system with multiple vetoes **A Long Goodbye to Bismarck?** Bruno Palier, 2025-10-01 This book provides an extensive and comparative account of all welfare reforms that occurred during the last three decades in Continental European countries It reveals unexpected important structural reforms to be understood as the culmination of a long reform trajectory analyzed in detail with the tools of comparative historical institutionalism With these reforms Bismarckian welfare systems have lost their encompassing capacities have partially turned to employment friendliness and weakened the strongest elements of their

male breadwinner bias This volume is the definitive work on the politics of reform in Bismarckian welfare regimes It is essential reading for any scholar interested in welfare reform or indeed in institutional and policy change more generally Kathleen Thelen Massachusetts Institute of Technology The contributors to the volume are all recognized experts on their field and provide strictly comparable analyses in their chapters making this volume a gold mine for comparative welfare state scholars Palier's volume is certain to be a benchmark study for the foreseeable future John D Stephens University of North Carolina Chapel Hill This volume representing the best available scholarship in comparative socio economic research provides important and highly policy relevant insights A must read Fritz Scharpf Max Planck Institute for the Studies of Societies

Pension Reform in Europe Camila Arza, Martin Kohli, 2007-08-07 This new book provides a cross country comparative analysis of the key issues shaping the latest pension reforms in Europe political games welfare models and pathways population reactions and observed and expected outcomes Pension reform has been a top policy priority for European governments in the last decade Ageing populations changing labour market patterns and the process of European integration are the irresistible forces pushing for reform throughout the region The Political Economy of Pension Reform evaluates the political forces that make pension reform viable in different national and institutional contexts and the nature of political bargains actors and cleavages surrounding policy change The volume also examines the nature and outcomes of pension reform experiences in Europe searching for a solution to the financial challenge posed by growing pension budgets By addressing the nature of change the pathways of reform and the outcomes of the new pension mix in the region the authors conclude with an analysis of people's perceptions and attitudes towards pension policy and their acceptance or otherwise of different reform options This book will be of interest to students and scholars of international political economy European politics and social policy

A History of the German Public Pension System Alfred C. Mierzejewski, 2016-03-04 A History of the German Public Pension System Continuity amid Change provides the first comprehensive institutional history of the German public pension system from its origins in the late nineteenth century to the major reform period in the early twenty first century Relying on a wide range sources including many used for the first time this study provides a balanced account of how the pension system has coped with major challenges such as Germany's defeat in two world wars inflation the Great Depression the demographic transition political risk reunification and changing gender roles It shows that while the pension system has changed to meet all of these challenges it has retained basic characteristics particularly the tie between work contributions and benefits that fundamentally define its character and have enabled it to survive economic and political turmoil for over a century This book also demonstrates that the most serious challenge faced by the pension system has consistently been political intervention by leaders hoping to use it for purposes unrelated to its mission of providing the insured with secure and adequate retirement income

Pension Reform and the Development of Pension Systems Emily S. Andrews, 2006 Formal pension systems are an important means of reducing poverty among the

aged In recent years however pension reform has become a pressing matter as demographic aging poor administration early retirement and unaffordable benefits have strained pension balances and overall public finances Pension systems have become a source of macroeconomic instability a constraint to economic growth and an ineffective and or inequitable provider of retirement income

The Political Economy of Reform Lessons from Pensions, Product Markets and Labour Markets in Ten OECD Countries Tompson William, 2009-08-24 By looking at 20 reform efforts in ten OECD countries this report examines why some reforms are implemented and other languish

Reform Capacity Johannes Lindvall, 2017 It is often said that effective government requires a concentration of power If we want our political leaders to adjust public policies to changing economic social and political circumstances we should in this view leave our leaders alone we should put in place electoral procedures that identify a clear winner in each election and then we should let the winning political party govern without having to cooperate with others The argument of this book is that this view is mistaken since it seriously underestimates the ability of political decision makers to overcome democratic paralysis by compensating losers groups that stand to lose from a reform Reform capacity the ability of political decision makers to adopt and implement policy changes that benefit society as a whole can therefore be achieved in both power concentration systems which enable governments to ignore losers and power sharing systems where governments build support for reform by compensating losers If political decision makers are able to solve the bargaining problems that sometimes complicate negotiations between winners and losers power sharing systems have certain advantages over power concentration systems The book argues that power sharing can lead to high reform capacity in societies where interest groups are powerful enough to block reforms the book also argues that power sharing can lead to high reform capacity when reforms have short term costs and long term benefits since power sharing helps to correct some of the short sightedness that is inherent in democratic policymaking

Ageing and Pension Reform Around the World Giuliano Bonoli, Toshimitsu Shinkawa, 2006-01-01 This is an admirable example of a multi authored comparative book The two editors set the scene very carefully in the opening chapter and the subsequent chapters follow the framework set out and use the concepts explored there In this never simple policy area national systems are explained as clearly as possible by each author Michael Hill Journal of Social Policy This is an enlightening introduction to the global dimensions and complexity of pension reform Recommended J F O Connell Choice Population ageing and the resulting pressures on existing pension systems constitutes one of the most important challenges modern societies will have to face over the coming decades Although governments have responded to such pressures by adopting a plethora of pension reforms the adaptation process is far from over This book comprehensively documents developments in pension policy in eleven advanced industrial countries in Western Europe East Asia and North America In order to explore what population ageing means for the sustainability of pension systems the authors present a detailed review of pension policy making over the past two decades and provide up to date analysis of current pension legislation They examine the factors that can

facilitate or impede the adaptation of pension systems and the features that shape and determine reforms They also highlight the fact that although the path of reform taken by each country is somewhat different the processes at work are often very similar Ageing populations throughout the world are extremely reluctant to see their pension systems dismantled and are therefore prepared to mobilise in their defence This process of mobilisation interacts with demographic pressures and institutional constraints to help determine the future direction of pension policy The breadth of geographic coverage provides an almost global picture of the impact of ageing on pension reform at least in terms of high income countries Academics and students with an interest in economics social policy sociology and political science will find this a worthwhile and rewarding volume It will also be of value to policymakers interested in how the problem of unsustainable pension systems can be resolved
