Religion In Action:

Faith and Action R. J. Rushdoony, 2019-08-26 *Faith and Action* is the complete collection of the essays of R J Rushdoony written for the Chalcedon Report between 1965 and 2001 along with several transcripts of his recorded talks The large volume *The Roots of Reconstruction* only contained his Chalcedon Report essays up until 1985 so most of the essays included in *Faith Action* were unavailable to readers for many years until now In order to make the author s knowledge more accessible this three volume collection features some of the most extensive indexing we ve ever done including a General Index a History Index a Scripture Index a Works Cited Index and a Chalcedon Report Directory A total of 183 pages of indexing This handsome set of books is a must have for any serious library The central theme of this collection of essays is Christian Reconstruction which to Rushdoony meant the responsibility of Christian citizenship in the Kingdom of God For him his central drive behind his research and writing was to move men to faith and action Rushdoony was primarily an essayist who vigorously and prolifically wrote on a multiplicity of subjects issues and disciplines Despite his being critical of both the contemporary church for its compromise and the humanistic state for its will to be as God these essays are replete with Rushdoony s undying faith in the victory of God in history Rushdoony s big idea was Christian Reconstruction which centered not on a pursuit of political power but rather an equipping of Christians to take back government by means of self government in terms of God s law This three volume collection will no doubt serve the larger church for many generations as they seek first the Kingdom of God in their spheres and in their times

Public Faith in Action Miroslav Volf, Ryan McAnnally-Linz, 2017-09-19 Celebrated Theologian Offers Wisdom for Civic Engagement Christian citizens have a responsibility to make political and ethical judgments in light of their faith and to participate in the public lives of their communities from their local neighborhoods to the national scene But it can be difficult to discern who to vote for which policies to support and how to respond to the social and cultural trends of our time This nonpartisan handbook offers Christians practical guidance for thinking through complicated public issues and faithfully following Jesus as citizens of their countries The book focuses on enduring Christian commitments that should guide readers in their judgments and encourages legitimate debate among Christians over how to live out core values The book also includes lists of resources for further reflection in each chapter and room for debate questions to consider

Faith in Action Richard L. Wood, 2002-09-15 Over the past fifteen years associations throughout the U S have organized citizens around issues of equality and social justice often through local churches But in contrast to President Bush s vision of faith based activism in which groups deliver social services to the needy these associations do something greater Drawing on institutions of faith they reshape public policies that neglect the disadvantaged To find out how this faith based form of community organizing succeeds Richard L Wood spent several years working with two local groups in Oakland California the faith based Pacific Institute for Community Organization and the race based Center for Third World Organizing Comparing their activist techniques and achievements

Wood argues that the alternative cultures and strategies of these two groups give them radically different access to community ties and social capital Creative and insightful Faith in Action shows how community activism and religious organizations can help build a more just and democratic future for all Americans

Imagining the Cognitive Science of Religion E. Thomas Lawson, 2023-08-24 A 2024 CHOICE OUTSTANDING ACADEMIC TITLE Uniting Thomas Lawson's essays on the cognitive science of religion this volume explores theoretical issues in the study of cultural phenomena such as religion the role of imagination and the experiments that emerge from these theories The book begins with Lawson's influential essay Towards a Cognitive Science of

Religion which was the first to employ the phrase and has since become widely adopted in many different disciplines. It signals to scholars in the humanities that the cognitive revolution has finally reached them and serves to introduce them to the world of science. The rest of the book focuses on theoretical issues in the study of cultural phenomena and describes experiments by scholars working on the connections between cognition and culture. Described as the grandfather of the cognitive science of religion, Lawson offers a unique perspective on the development of the field and the principles that underlie it which will be relevant to both newcomers and established scholars.

A Comparative Sociology of World Religions Stephen Sharot, 2001-08. Sharot sociology Ben Gurion U of the Negev focuses on the differences and interrelationships between religious elites and lay masses. He presents several relevant concepts and theories including a model of religious action based on the work of Max Weber and a discussion of elites and masses as represented in Weber's comparison of world religions. Coverage encompasses religious action in world religions: Brahmins, Renouncers and Hinduism in India; Buddhism and Animism in Sri Lanka and Southeast Asia; traditional Catholicism in Europe; Islam and Judaism; Protestants, Catholics and the reform of popular religion; and a comparison of religious elites and popular religions. c. Religion Extended Elena Kalmykova, 2025-04-01. Religion Extended contributes to discussions of aspects of religion that go beyond the epistemology of belief, incorporating other states such as understanding, emotion, knowledge of persons, knowledge of how as well as practice. The author looks to bridge the gap in the study of religion between research of religious beliefs on the one hand and research of religious practices on the other. She reconsiders key methodological concepts that traditional philosophy of religion and neighbouring disciplines (e.g. cognitive science of religion, psychology of religion and theology) take for granted such as religious belief and religious faith. The book offers a compelling and provocative reframing of these notions by drawing on cutting edge developments in cognitive science as well as insights from an Orthodox Christian perspective which shed light on religion in important ways that tend to be neglected. Presenting a challenge to the received conceptual framework, this innovative and thought provoking volume will advance discussions and open new areas of research.
