volume of essays by leading scholars explores key aspects of southern religious development concentrating on the dominant evangelical tradition. It focuses on crucial time periods: the antebellum years, the late nineteenth century, and the contemporary era, and examines topics that are central to understanding southern religion. The papers in this volume were presented in 1984 at the annual Porter L. Fortune Chancellor's Symposium in Southern History at the University of Mississippi. In this study, John B. Boles traces the emergence of the South's evangelical tradition, detailing the transformation of evangelical sects from dissenting outcasts in society to their dominance in the South by the time of the Civil War. C. Eric Lincoln's essay offers a thorough summary of early black religious history, including missionary efforts among the slaves, the extent of a black-white religious culture, the importance of separate black denominations, the invisible church of the slave quarters, and the nature of black worship. David Edwin Harrell Jr. examines religious diversity in the South, bringing together the experiences of Roman Catholics, Jews, and Protestant sectarians living under the region's evangelical hegemony. Through a case study of the Presbyterian Church in the United States, J. Wayne Flynt marshals evidence that an overlooked social gospel tradition has existed in the South. In an essay on Religion and Politics in the South, Samuel S. Hill puts the recent religious-political interaction into historical and typological perspective, arguing for the existence of a unique southern outlook on this topic. The final paper, by Edwin S. Gaustad, outlines the regional character of American religion, with special attention given to the geographical distribution of religious groups within the South.

Religion, Politics, and Identity in a Changing South Africa Abdulkader Tayob, Wolfram Weisse, David Chidester, What is the role of religion in society? In the wake of September 11, public intellectuals provided easy answers. According to some, religion was the problem; others commented religion was the solution. Generally, public debate about the force of religion in society has been organized by either/or propositions: Religion is a force for either freedom or bondage, for either peace or war, for either mutual recognition or antagonistic polarization. Analysis of religion and social change has also tended to be framed in terms of oppositions that inform research agendas and public policy. In this book, authors from South Africa, the United States of America, the Netherlands, and Germany test these oppositions.

Religion in the Contemporary South Corrie Norman (E.), Donald S. Armentrout, 2005. Religion has always been crucial to the cultural identity of the South. The field of southern religious studies is quite young, however, and most scholarship has focused on the kinds of evangelical fundamentalist activity for which the phrase Bible Belt was coined. *Religion in the Contemporary South* is the first book to fully address the emerging religious pluralism in the South today. Featuring an introduction by Samuel S. Hill, *Religion in the Contemporary South* brings together fourteen essays by both established and emerging scholars that deal with a spectrum of topics. These topics include religious identities in the South that weave in and out of the past, new religious expressions in the South, and the shifting position of old minority traditions, and a microcosmic look at the Episcopal Church. The collection comes at a time of sweeping change in the South as the 150-year stronghold of evangelical Protestantism, the Baptist-Methodist hegemony, gives way to a more diverse
