Religious Origins Of Modern Science Belief In Creation In The Seventeenth Century:

Religious Origins of Modern Science Eugene M. Klaaren, 1985-07-31 *Religious Origins of Modern Science* Eugene M. Klaaren, 1977 **Religious Origins of Modern Science** Eugene Marion Klaaren, 1977 **God and Nature** David C. Lindberg, Ronald L. Numbers, 2023-11-15 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language. Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions the image of warfare lingers in the public mind. To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians. In eighteen essays prepared especially for this book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism. They explore not only the impact of religion on science but also the influence of science and religion. This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship. Scholars and general readers alike will find it provocative and readable. Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language. Although many twentieth century historians **The Cambridge History of Science: Volume 3, Early Modern Science** David C. Lindberg, Katharine Park, Ronald L. Numbers, Roy Porter, 2003 An account of European knowledge of the natural world c 1500-1700 *The Theological Origins of Liberalism* Ismail Kurun, 2016-07-26 This eye opening book offers a critical survey of the true origins of liberalism. It challenges the widely held belief among social scientists that liberalism was developed in opposition to Christianity. Beginning with the Protestant Reformation it illustrates how Christian thinkers reinterpreted Christianity and used a set of indemonstrable biblical presuppositions from their reinterpretations to develop the first liberal ideas starting a process that culminates in the birth of the first liberal political theory in the writings of a devout Christian philosopher John Locke. It explains how the Protestant Reformation covenant theology anti trinitarianism and medieval Christian natural law theories formed the foundations of liberalism. Thus the central claim of this book is that liberalism is better understood as a radical reinterpretation of Christianity that emerged in the post Reformation and early modern period. As a logical consequence of revealing the hitherto generally neglected roots of liberalism it eventually proposes that a legally pluralist liberal political theory is the best way to maintain human dignity and peace in multi religious societies of today's globalized world **Philosophy, Science, and Religion in England 1640-1700** Richard W. F. Kroll, Richard Ashcraft, Perez Zagorin, 1992-01-31 This collection of essays looks at the distinctively English intellectual social

and political phenomenon of Latitudinarianism which emerged during the Civil War and Interregnum and came into its own after the Restoration becoming a virtual orthodoxy after 1688 Dividing into two parts it first examines the importance of the Cambridge Platonists who sought to embrace the newest philosophical and scientific movements within Church of England orthodoxy and then moves into the later seventeenth century from the Restoration onwards culminating in essays on the philosopher John Locke These contributions establish a firmly interdisciplinary basis for the subject while collectively gravitating towards the importance of discourse and language as the medium for cultural exchange The variety of approaches serves to illuminate the cultural indeterminacy of the period in which inherited models and vocabularies were forced to undergo revisions coinciding with the formation of many cultural institutions still governing English society

Puritanism and Natural Theology Wallace Williams Marshall III, 2016-11-10 The prevailing consensus among historians is that natural theology within Protestantism was born in the eighteenth century as a byproduct of the Enlightenment and had a sharply diminished if not nonexistent role within Puritanism Based on an exhaustive study of the writings of some sixty English and American Puritans spanning from the late sixteenth century to the early eighteenth century this book demonstrates that the overwhelming majority of Puritan theologians not only embraced natural theology on a theoretical level but employed it in a surprising variety of pastoral apologetic and evangelical contexts including their missionary activities to the Indians of New England Some Puritans even asserted that people who had never heard about Christianity could be saved through the knowledge afforded them by natural theology This conclusion reshapes our understanding of the history of apologetics and sheds fresh light on the origins of the Enlightenment itself Puritanism and Natural Theology also examines the crises of doubt experienced by several prominent Puritan theologians advances our understanding of the oft debated issue of the role of reason within Puritanism and sets the Puritans enthusiasm for natural science within the broader context of their beliefs about natural theology *Reader's Guide to the History of Science* Arne

Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Creational Theology and the History of Physical Science: The Creationist Tradition from Basil to Bohr Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the

persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution
