Reluctant Sheriff The United States Af:

The End of the American Era Charles Kupchan, 2007-12-18 Refuting the conventional wisdom that the end of the Cold War cleared the way for an era of peace and prosperity led solely by the United States Charles A Kupchan contends that the next challenge to America's might is fast emerging It comes not from the Islamic world or an ascendant China but from an integrating Europe that is rising as a counterweight to the United States Decades of strategic partnership across the Atlantic are giving way to renewed geopolitical competition The waning of U S primacy will be expedited by America's own ambivalence about remaining the globe's guardian and by the impact of the digital age on the country's politics and its role in the world By deftly mining the lessons of history to cast light on the present and future Kupchan explains how America and the world should prepare for the more complex more unstable road ahead

The Coming Crisis Victor A. Utgoff, 2000 How will continued proliferation of nuclear weapons change the global political order This collection of essays comes to conclusions at odds with the conventional wisdom Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear backed aggression George Quester and Brad Roberts examine long term strategic objectives in responding to nuclear attack by a regional aggressor Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear armed states Scott Sagan explains how the nuclear nonproliferation policies best suited to some states can spur proliferation by others Caroline Ziemke shows how the analysis of a state's strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them And Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not

Another American Century Nicholas Guyatt, 2003-11 How does the US media propagate the myth of a good superpower waging war on evil Can an open ended War on Terror make the world safe For whom Another American Century draws on our knowledge of the past decade to outline the effects and consequences of the USA's formidable power It looks at how US policymakers understand their role in the world and the ideologies that enable them to pursue policies with often harmful consequences for people outside North America

[Public Policy in the United States](#) Mark E Rushefsky, 2014-12-18 The fifth edition of this well regarded text covers the period up through the 2012 elections It has been revised to make it sleeker more

comprehensive analysis of the European defence project its origins purpose and goals **Living in the Number One Country** Herbert I. Schiller, 2000-09-05 Living in the Number One Country is Herbert I Schiller's chronicle of the symbiotic relationship between post WWII American Empire and the substance and technology of the communications businesses Schiller traces how the State has supported corporatized information by pushing their products abroad both through phony pronouncements about the free flow of information and by subsidizing research and development for new technologies

Schiller's refreshing account infuses elements of his own experience growing up during the Great Depression in New York as a bureaucrat in the civilian sector of the military occupation forces in Berlin after the war and as a radical journalist and academic. This intriguing book argues that the main pillar of today's U.S. economy, the ever-expanding communication sector, is also the most crucial element in keeping a 500-year social system, capitalism, alive. Capitalism's future relies not only on labor exploitation but also on a steadily entertained and hence diverted populace. Therein lies the importance of challenging the overarching institutions of corporate information production.

America's Shadow William V. Spanos, 2000. A study of imperialism that stretches from ancient Rome to the post-Cold War World, this provocative work boldly revises our assumptions about the genealogy of the West. Rather than locating its source in classical Greece, William V. Spanos argues we should look to ancient Rome, which first articulated the ideas that would become fundamental to the West's imperial project. These founding ideas, he claims, have informed the American national identity and its foreign policy from its origins. The Vietnam War is at the center of this book. In the contradiction between the free world logic employed to justify U.S. intervention in Vietnam and the genocidal practices used to realize that logic, Spanos finds the culmination of an imperialistic discourse reaching back to the colonizing rationale of the Roman Empire. Spanos identifies the language of expansion in the white metaphors in Western philosophical discourse since the colonization of Greek thought by the Romans. He shows how these metaphors and their role in metaphysical discourse have long been complicit in the violence of imperialism.
