Rememberin People Places And Happenins In Woodstock:

Coughing and Clapping: Investigating Audience Experience Karen Burland, Stephanie Pitts, 2016-05-13 Coughing and Clapping Investigating Audience Experience explores the processes and experiences of attending live music events from the initial decision to attend through to audience responses and memories of a performance after it has happened The book brings together international researchers who consider the experience of being an audience member from a range of theoretical and empirical perspectives Whether enjoying a drink at a jazz gig tweeting at a pop concert or suppressing a cough at a classical recital audience experience is affected by motivation performance quality social atmosphere and group and personal identity Drawing on the implications of these experiences and attitudes the authors consider the question of what makes an audience and argue convincingly for the practical and academic value of that question **Collective**

Memory of Political Events James W. Pennebaker, Dario Paez, Bernard Rim, Dario Paez, 2013-06-17 Research in collective memory is a relatively new area capturing the interest of scholars in social psychology memory sociology and anthropology The core idea is that collective attitudes and behaviors are created and shared through common experiences and communication among a cohort of people For example people born between 1940 and 1960 are often defined via the JFK assassination and the Vietnam War Their parents typically experienced lesser impact from these events Papers about collective memory have appeared in the literature under different guises for the last hundred years Freud s Civilization and Its Discontents Jung s ideas on the collective unconscious and McDougall s speculation on the group mind posited that identity and action could be viewed as resulting from the shared development of a culture Halbwachs a French social psychologist 1877 1945 who was the first to write in detail about the nature of collective memory argued that basic memory processes were all social That is people remember only those events that they have repeated and elaborated in their discussions with others In the last several years there has been a resurgence of interest in this general topic because it addresses some fundamental questions about memory and social processes Work closely related to these questions deals with the nature of autobiographical memory traumatic experience and reconstructive memory and social sharing of memories This book brings together an international group of researchers who have been empirically studying some basic tenets of collective memory Place-making for the Imagination: Horace Walpole and Strawberry Hill Marion

Harney, 2016-04-08 Drawing together landscape architecture and literature Strawberry Hill the celebrated eighteenth century Gothic villa and garden beside the River Thames is an autobiographical site where we can read the story of its creator Horace Walpole This man of taste created private resonances pleasure and entertainment a collusion of the historic the visual and the sensory Above all it expresses the inseparable integration of house and setting and of the architecture with the collection all specific to one individual a unity that is relevant today to all architects landscape designers and garden and country house enthusiasts Avoiding the straightforward architectural description of previous texts this beautifully illustrated

book reveals the Gothic villa and associated landscape to be inspired by theories that stimulate The Pleasures of the Imagination articulated in the series of essays by Joseph Addison 1672 1719 published in the Spectator 1712 Linked to this argument it proposes that the concepts behind the designs for Strawberry Hill are not based around architectural precedent but around eighteenth century aesthetics theories antiquarianism and matters of Taste Using architectural quotations from Gothic tombs Walpole expresses the mythical idea that it was based on monastic foundations with visual links to significant historical figures and events in English history The book explains for the first time the reasons for its creation which have never been adequately explored or fully understood in previous publications The book develops an argument that Walpole was the first to define theories on Gothic architecture in his Anecdotes of Painting 1762 71 Similarly innovative The History of the Modern Taste in Gardening 1780 is one of the first to attempt a history and theory of gardening The research uniquely evaluates how these theories found expression at Strawberry Hill This reassessment of the villa and its associated l Event Theory for a Sociology of Practice Frank Hillebrandt,2025-05-22 The sociological theory of practices developed in this book from the concept of the event compels us to question how practices not only chain into forms of practice The approach also allows us to see how these practices give rise to practice formations that manifest as enduring zones of intensity within society This very problem is at the center of the considerations pursued here and is unfolded through an analysis of pop music as a formation of practice As an exemplary case study the author chooses the Love and Peace Festival on Fehmarn from the year 1970 In doing so the book brings to life a period of pop music that has much more to do with our present than it may seem at first glance **Music in the 20th Century (3 Vol Set)** Dave DiMartino,2016-04-15 This is an examination of the crucial formative period of Chinese attitudes toward nuclear weapons the immediate post Hiroshima Nagasaki period and the Korean War It also provides an account of US actions and attitudes during this period and China s response

Events to be remembered in the history of England Charles Selby,1854 *Events to be remembered in the History of England; forming a series of interesting narratives of the most remarkable occurrences in each reign ... Tenth edition* Charles SELBY,1854 *Critical Event Studies* Karl Spracklen,Ian R. Lamond,2016-05-26 Within events management events are commonly categorised within two axes size and content Along the size axis events range between the small scale and local through major events which garner greater media interest to internationally significant hallmark and mega events such as the Edinburgh Festival and the Tour de France Content is frequently divided into three forms culture sport or business However such frameworks overlook and depoliticise a significant variety of events those more accurately construed as protest This book brings together new research and theories from around the world and across sociology leisure studies politics and cultural studies to develop a new critical pedagogy and critical theory of events It is the first research monograph that deals explicitly with the concept of critical event studies CES the idea that it is impossible to explore and understand events without understanding the wider social cultural and political contexts It addresses questions such as can

the occupation and reclamation of specific spaces by activists be understood as events within its framework And is the activity of activists in these spaces a leisure activity If those and other similar activities can be read as events and leisure what does admitting them into the scope of events management and leisure studies mean for our understanding of them and how the study of events management is to be conceptualised This title will be of interest to undergraduate and postgraduate students on events management and related courses and scholars interested in understanding the ways in which events are constructed by the social the cultural and the political **The McConnel and McConnell Families** Ralph A.
