Scott, 2020-05-04 On his famous walk to Vincennes to visit the imprisoned Diderot Rousseau had what he called an illumination the realization that man was naturally good but becomes corrupted by the influence of society a fundamental change in Rousseau's perspective that would animate all of his subsequent works At that moment Rousseau saw something he had hitherto not seen and he made it his mission to help his readers share that vision through an array of rhetorical and literary techniques In Rousseau's Reader John T. Scott looks at the different strategies Rousseau used to engage and persuade the readers of his major philosophical works including the Social Contract Discourse on Inequality and Emile Considering choice of genre textual structure frontispieces and illustrations shifting authorial and narrative voice addresses to readers that alternately invite and challenge apostrophe metaphor and other literary devices and of course paradox Scott explores how the form of Rousseau's writing relates to the content of his thought and vice versa Through this skillful

interplay of form and content Rousseau engages in a profoundly transformative dialogue with his readers While most political philosophers have focused understandably on Rousseau s ideas Scott shows convincingly that the way he conveyed them is also of vital importance especially given Rousseau s enduring interest in education Giving readers the key to Rousseau s style Scott offers fresh and original insights into the relationship between the substance of his thought and his literary and rhetorical techniques which enhance our understanding of Rousseau s project and the audiences he intended to reach

How to Teach Reading Mary Elizabeth Pennell,Alice Mattie Cusack,1923 The Art of Story-telling Julia Darrow Cowles,1924 Reading Words into Worlds J. Clayton McReynolds,2024-07-19 *Reading Words into Worlds* asks how it is that reading a novel can feel in some ways like being in a world The book explores how novels give themselves to readers in ways that mimetically resemble our phenomenological reception of given beings in reality McReynolds refers to this process as phenomenological mimesis of givenness and he draws on the phenomenological philosophy of Husserl Heidegger and Jean Luc Marion to explore how masterful novels can make reading ink marks on a page feel like seeing things feeling things and meeting even loving others McReynolds blends rigorous phenomenological study with a personable style first laying out his theory in detail and then applying that theory through close studies of his reading experiences of four British realist masterpieces Defoe s *Robinson Crusoe* Austen s *Northanger Abbey* Eliot s *Middlemarch* and Hardy s *Jude the Obscure* Ultimately this book offers a grounded phenomenology of novel reading illuminating what gives novels such power to not only thrill readers but to change them **Reading the Self: Print Technologies, Authorship, And Identity Formation**

In The Eighteenth-Century Marketplace Roy Bearden-White,2017-06-24 At one major publishing house there is a running joke that the second book published on the Gutenberg press was about the death of the publishing business While this joke is an obvious exaggeration there is a certain amount of truth that with each advance in technology with each printing innovation or invention a similar death dynamic occurred This was most noticeable during the tumultuous years of the eighteenth century when a veritable flood of printing techniques business practices reading formats and sources for reading material was introduced The cultural reaction to each new technological change while not exactly the same in all respects

exhibited a series of characteristics that closely mirrored each other In each case readers reacted in various ways against the innovation and supported the traditional publishing industry and in their reaction created modified and maintained a sense of their own identity

Reading with a Difference Arthur F. Marotti,1993 Reading with a Difference is a collection of eighteen essays that examines how issues of gender race and cultural identity inform texts from the seventeenth century to the present Together the contributions document recent significant shifts occurring in the theoretical approach to the texts they study and illustrate how shifts in each of these categories affect how the others are viewed The first section of this anthology explores the notion that identity particularly gender identity is a cultural construct The essays in the second section consider ways in which race and gender intersect with cultural identity and how encounters between different cultures challenge any identity constructed in isolation First published in the journal Criticism these essays offer no blueprint for reading Instead they encourage a rereading of canonical texts and a questioning of how these texts face matters of gender race and cultural identity how they respond to the differences and the incongruities within the cultures from which they arise and to which they speak

Reading Victorian Schoolrooms Elizabeth Gargano,2013-10-31 Reading Victorian Schoolrooms examines the numerous schoolroom scenes in nineteenth century novels during the fraught era of the Victorian education debates As Gargano argues the fiction of mainstream and children s writers such as Dickens Bront and Carroll reflected widespread Victorian anxieties about the rapid institutionalization of education and the shrinking realm of domestic instruction As schools increasingly mapped out a schema of time schedules standardized grades or forms separate disciplines and hierarchical architectural spaces childhood development also came to be seen as regularized and standardized according to clear developmental categories Yet Dickens Bront and others did not simply critique or satirize the standardization of school experience Instead most portrayed the schoolroom as an unstable site incorporating both institutional and domestic space Drawing on the bildungsroman s traditional celebration of an individualized experiential education numerous novels of school life strove to present the novel itself as a form of domestic education in contrast to the rigors of institutional instruction By positioning the novel as a form of domestic education currently under attack these novelists sought to affirm its value as a form of protest within an increasingly institutionalized society The figure of the child as an emblem of beleaguered innocence thus became central to the Victorian fictive project
