*New Light on the Neolithic of Northern England* Gill Hey, Paul Frodsham, 2021-01-13 These papers highlight recent archaeological work in Northern England in the commercial academic and community archaeology sectors which have fundamentally changed our perspective on the Neolithic of the area Much of this was new work and much is still not published has been overlooked in the national discourse The papers cover a wide geographical area from Lancashire north into the Scottish Lowlands recognising the irrelevance of the England Scotland Border They also take abroad chronological sweep from the Mesolithic Neolithic transition to the introduction of Beakers into the area The key themes are the nature of transition the need for a much improved chronological framework regional variation linked to landscape character links within northern England and with distant places the implications of new dating for our understanding the axe trade the changing nature of settlement and agriculture the character early Neolithic

**The Archaeology of Rock-Art** Christopher Chippindale, Paul S. C. Tacon, 1998 Pictures painted and carved in caves and on open rock surfaces are amongst our loveliest relics from prehistory This pioneering set of sparkling essays goes beyond guesses as to what the pictures mean instead exploring how we can reliably learn from rock art as a material record of distant times in short rock art as archaeology Sometimes contact period records offer some direct insight about indigenous meaning so we can learn in that informed way More often we have no direct record and instead have to use formal methods to learn from the evidence of the pictures themselves The book's eighteen papers range wide in space and time from the Palaeolithic of Europe to nineteenth century Australia Using varied approaches within the consistent framework of informed and proven methods they make key advances in using the striking and reticent evidence of rock art to archaeological benefit

*The Neolithic of the Irish Sea* Chris Fowler, 2015-03-31 This collection of 24 papers aims to reconsider the nature and significance of the Irish Sea as an area of cultural interaction during the Neolithic period The traditional character of work across this region has emphasised the existence of prehistoric contact with sea routes criss crossing between Ireland the Isle of Man Anglesey and the British mainland A parallel course of investigation however has demonstrated that the British and Irish Neolithics were in many ways different with distinct indigenous patterns of activity and social practices The recent emphasis on regional studies has further produced evidence for parallel yet different processes of cultural change taking place throughout the British Isles as a whole This volume brings together some of these regional perspectives and compares them across the Irish Sea area The authors consider new ways to explain regional patterning in the use of material objects and relate them to past practices and social strategies Were there practices that were shared across the Irish Sea area linking different styles of monuments and material culture or were the media intrinsic to the message The volume is based on papers presented at a conference held at the University of Manchester in 2002

Open-Air Rock-Art Conservation and Management Timothy Darvill, Antonio Pedro Batarda Fernandes, 2014-06-20 While much has been achieved in understanding and managing weather effects and erosion phenomena affecting ancient imagery within the relatively protected environments of caves and rock shelters the same cannot be said of rock art panels situated in the open air Despite the fact that the number of known sites has risen dramatically in recent decades there are few examples in which the weathering and erosion dynamics are under investigation with a view to developing proposals to mitigate the impact of natural and cultural processes Most of the work being done in different parts of the world appears to be ad hoc with minimal communication on such matters between teams and with the wider archaeological community This richly illustrated book evaluates rock art conservation in an holistic way bringing together researchers from across the world to share experiences of work in progress or recently completed The chapters focus on a series of key themes documentation projects and resource assessments the identification and impact assessment of weathering erosion processes at work in open air rock art sites the practicalities of potential or implemented conservation interventions experimentation and monitoring programs and general management issues connected with public presentation and the demands of ongoing research investigations Consideration is given to the conservation of open air rock art imagery from many periods and cultural traditions across the Old and New Worlds This timely volume will be of interest to conservators managers and researchers dealing with aesthetic and ethical issues as well as technical and practical matters regarding the conservation of open air rock art sites

**Image and Audience** Richard Bradley, 2009-03-12 There have been many accounts of prehistoric art but nearly all of them begin by assuming that the concept is a useful one In this extensively illustrated study Richard Bradley asks why ancient objects were created and when and how they were used He considers how the first definitions of prehistoric artworks were made and the ways in which they might be related to practices in the visual arts today Extended case studies of two immensely popular and much visited sites illustrate his argument one considers the megalithic tombs of Western Europe whilst the other investigates the decorated metalwork and rock carvings of Bronze Age Scandinavia
