Geological Series Michigan. Geological Survey Division, 1916 **Geological Series**, 1916 **Introduction to Metamorphic Textures and Microstructures** A.J. Barker, 2013-12-19 A text which aims to help undergraduate students in geology to recognize and interpret metamorphic textures and microstructures in thin section For lecturers and postgraduates in geology and petrology the book provides reference for the interpretation of metamorphic rocks **The Geology and Mineral Resources of the Reefton Subdivision, Westport and North Westland Division** John Henderson, P. Marshall, Percy Gates Morgan, John Arthur Bartrum, 1915 Landscapes and Landforms of Nigeria Adetoye Faniran, Lawrence Kosoko Jeje, Olutoyin A. Fashae, Adeyemi O. Olusola, 2023-02-28 The book deals with the most striking landscapes and landforms of Nigeria Attention is paid to the diversity of geomorphic features found in the country from the coast to the extreme north approached geographically at the national regional and local scales with a view to highlight the combined influence of geological climatic biotic and anthropogenic influences as well as geoheritage potentials The topics and sites described range from the mainly depositional coastal lagoons and inlets the most prominent of which is the oil rich Niger Delta characterized by the mangrove and rain forest both of which have been seriously modified by human impact through the coastal lowlands and associated hill country with derived deciduous and dry forest vegetation the very prominent Niger Benue Trough and associated features the savanna semi desert covered high plains of the north and the Chad Basin each of which features spectacular landscapes and landforms including human made forms such as cities and cityscapes The book provides the readers with the opportunity to explore the variety of Nigerian landscapes and landforms through informative texts illustrated with color maps and photos it will be relevant to scientists scholars as well as others interested in the geology physical geography geomorphology landscape tourism and other geoheritage related information about the country *U.S. Geological Survey Bulletin*, 1983 **Geological Survey Professional Paper**, 1980 **The Journal of Education for Upper Canada**, 1854 **The Journal of Education for Ontario ...** Egerton Ryerson, John George Hodgins, Adam Crooks, 1854 **U.S. Geological Survey Professional Paper**, 1902 **Geology, Geochemistry, and Mineral Resource Assessment of the Southern Nantahala Wilderness and Adjacent Roadless Areas, Rabun and Towns Counties, Georgia, and Clay and Macon Counties, North Carolina** John D. Peper, Geological Survey (U.S.), 1991 The Southern Nantahala Wilderness and the Buzzard Knob and Southern Nantahala Roadless Areas are near one another and near the North Carolina Georgia State line in Rabun and Towns Counties Ga and Clay and Macon Counties N C The areas collectively span a region of polydeformed and metamorphosed rocks assigned to three major thrust sheets from east to west the Tallulah Falls Helen and Richard Russell thrust sheets Outcrop patterns and minor structures in the older sillimanite grade Richard Russell rocks in the western part of the study area outline an earlier phase of isoclinal folding not apparent in the outcrop pattern of younger kyanite and staurolite grade Coweeta Group rocks immediately to the east across the Shope

Fork fault in the east central parts of the study area Major movement on the Shope Fork fault postdates isoclinal F1 folding but preceded F2 isoclinal folding because F1 fold traces are covered by rocks above the fault and the fault is folded by F2 folds Later shearing along the fault occurred during F3 cross folding Geologic considerations and geochemical sampling and analysis suggest low potential for all mineral resources except common building stone The potential for some other nonmetallic resources including corundum feldspar sheet mica and vermiculite is moderate to low These are present in limited amounts but are currently of little economic value The small deposits of soapstone present in the areas are too impure to be considered a resource Late Archaic Early Woodland Indian bowl carving sites in soapstone are an archeological heritage that might deserve conservation Oil and gas resource potential is unknown but believed to be small Resource potential for gold is low for massive sulfide deposits containing some copper and zinc it is low to moderate There is little to no resource potential for other metals Geological Survey Professional Paper Geological Survey (U.S.),1959 An Introduction to Stratigraphy (British Isles) Laurence Dudley Stamp,1923 **Subject Catalog** Library of Congress, *Nature* London ,1872 *Nature* ,1896 **The Journal of Education** ,1910 Journal of Education and School World ,1916 Report of the Chief Inspector of Mines in India Under the Indian Mines Act India.
