**Rocky Mountain Mining Camps** Duane A. Smith, 1967 Reprint of the work originally published by Indiana University Press in 1967 with a new brief preface Annotation copyright by Book News Inc Portland OR **The Urban West at the End of the Frontier** Lawrence H. Larsen, 2021-10-08 Historians have largely ignored the western city although a number of specialized studies have appeared in recent years this volume is the first to assess the importance of the urban frontier in broad fashion Lawrence H Larsen studies the process of urbanization as it occurred in twenty four major frontier towns Cities examined are Kansas City St Joseph Lincoln Omaha Atchison Lawrence Leavenworth Topeka Austin Dallas Galveston Houston San Antonio Denver Leadville Salt Lake City Virginia City Portland Los Angeles Oakland Sacramento San Francisco San Jose and Stockton Larsen bases his analysis of western cities and their problems on social statistics obtained from the 1880 United States Census This census is particularly important because it represents the first time that the federal government regarded the United States as an urban nation The author is the first scholar to do a comprehensive investigation of this important source This volume gives an accurate portrayal of western urban life Here are promoters and urban planners crowding as many lots as possible into tracts in the middle of vast uninhabited valleys Here are streets clogged with filth because of inadequate sanitation systems people crowded together in packed quarters with only fledgling police and fire services Here too is the advance of nineteenth century technology gaslights telephones interurbans Most important this study dispels the misconceptions concerning the process of exploration settlement and growth of the urban west City building in the American West despite popular mythology was not a response to geographic or climatic conditions It was the extension of a process perfected earlier the promotion and building of sites no matter how undesirable into successful localities Uncontrolled capitalism led to disorderly development that reflected the abilities of individual entrepreneurs rather than most other factors The result was the establishment of a society that mirrored and made the same mistakes as those made earlier in the rest of the country American Frontiers Gregory H. Nobles, 1997 Now available in a paperback edition AMERICAN FRONTIERS is a perceptive account of this country's geopolitical developments and diverse frontier cultures With clarity and intellectual vigor Gregory H Nobles shows us not only the culture and social composition of the West but also the centuries of expansion and conquest all over the continent that created our nation as we know it today

Sullivan and His America Michael T. Isenberg, 1994-01-15 A knockout biography of John L Sullivan that puts the fabled boxing champ squarely in the context of his rough and tumble times Drawing on a wealth of contemporary sources including the scandalous National Police Gazette Isenberg History Annapolis recounts how Sullivan brawled his way from a working class background in Boston's Irish ghetto to the top of the prizefighting world **Jolly Fellows** Richard Stott, 2009-08-24 Stott finds that male behavior could be strikingly similar in diverse locales from taverns and boardinghouses to college campuses and sporting events He explores the permissive attitudes that thrived in such male domains as the streets of New

York City California during the gold rush and the Pennsylvania oil fields arguing that such places had an important influence on American society and culture Stott recounts how the cattle and mining towns of the American West emerged as centers of resistance to Victorian propriety It was here that unrestrained male behavior lasted the longest before being replaced with a new convention that equated manliness with sobriety and self control     Preserving Western History Andrew Gulliford,2005-08-15 The first collection of essays on public history in the American West     A Nation of Immigrants Franca Iacovetta,Paula Draper,Robert Ventresca,2017-06-22 This collection brings together a wide array of writings on Canadian immigrant history including many highly regarded influential essays Though most of the chapters have been previously published the editors have also commissioned original contributions on understudied topics in the field The readings highlight the social history of immigrants their pre migration traditions as well as migration strategies and Canadian experiences their work and family worlds and their political cultural and community lives They explore the public display of ethno religious rituals race riots and union protests the quasi private worlds of all male boarding houses and of female domestics toiling in isolated workplaces and the intrusive power that government and even well intentioned social reformers have wielded over immigrants deemed dangerous or otherwise in need of supervision Organized partly chronologically and largely by theme the topical sections will offer students a glimpse into Canada s complex immigrant past In order to facilitate classroom discussion each section contains an introduction that contextualizes the readings and raises some questions for debate A Nation of Immigrants will be useful both in specialized courses in Canadian immigration history and in courses on broader themes in Canadian history     *Historic Preservation and the Imagined West* Judy Mattivi Morley,2006-09-12 Stroll through Larimer Square in Denver or through Pioneer Square in Seattle and you feel that you re stepping into history while browsing the expensive boutiques and tourist shops But are you In this intriguing study of some of America s favorite places Judy Morley takes a fresh look at adaptive reuse efforts in cities of the former frontier Focusing on urban preservation resulting from the competing interests of architectural preservationists city planners chambers of commerce and boosters she shows how developers have often taken artistic license to refashion the western past into shopping centers and tourist traps in ways that privilege an imagined heritage over a more complex history Examining Old Town Albuquerque Larimer Square and LoDo in Denver and Pioneer Square and Pike Place Market in Seattle Morley describes the creation and marketing of western heritage under the guise of historic preservation She draws on extensive interviews city council proceedings and historic plats and photographs to construct a detailed picture of how these districts originally looked and were used how they were renovated and to what ends they were marketed This is the first book to systematically address issues of historic preservation and western urban growth examining the interplay of identity preservation and tourism It identifies the economic political and social issues that transformed each historic district into a place that resonated with the popular imagination Along the way Morley exposes the ironies that have attracted criticism to historic districts such as Old

Town Albuquerque's celebration of Hispanic heritage even though Hispanic residents were displaced during the renovation of Larimer Square's hiding of its actual skid row past beneath a veneer of more tourist friendly history But while critics charge that historic preservation often celebrates a sanitized past Morley suggests that these locales offer both residents and visitors a window on a shared romantic history and a sense of belonging serving as vital locations for community festivals holiday events and even public gatherings in times of tragedy Historic Preservation and the Imagined West argues that although these districts did not so much preserve history as create mythic identities for their cities they have in their way reconciled the past with the needs of the future

Sherow, 2007-04-27 This unique survey of the environmental history of the grasslands in the United States explores the ecological social and economic networks enmeshing humans in this biome over the last 10 000 years Treeless level and semi arid Walter Prescott Webb s famous description of

**West** Brenda K. Jackson,2005-01-01 In 1881 Thomas and Elizabeth Tannatt said a final good bye to Massachusetts and the eastern seaboard and set out in search not of land but of opportunities for social and political advancement Facing severe limitations to their goals in the depressed and disheveled postwar East the Tannatts went west to Walla Walla Washington Territory to pursue their dreams of influence and status Domesticating the West examines the motivations of late nineteenth century middle class migrants who moved west to build communities and establish themselves as leaders The West offered new opportunities for solidly middle class eastern families who endured hardship uncertainty and displacement during the Civil War and who struggled to carve out meaningful social space in the war s aftermath Brenda K Jackson places the Tannatts at the center of this movement and demonstrates how gender class and place affected the new migrants abilities to integrate into their new communities She also shows how easterners redefined themselves as leaders of a new moral western environment through volunteerism and political participation While many studies of westward expansion focus exclusively on the earliest pioneers Jackson adroitly shows how later arrivals shaped the social economic and cultural growth of the nation

**Hard As the Rock Itself** David Robertson,2011-05-18 The first intensive analysis of sense of place in American mining towns Hard as the Rock Itself Place and Identity in the American Mining Town provides rare insight into the struggles and rewards of life in these communities David Robertson contends that these communities often characterized in scholarly and literary works as derelict as sources of debasing moral influence and as scenes of environmental decay have a strong and enduring sense of place and have even embraced some of the signs of so called dereliction Robertson documents the history of Toluca Illinois Cokedale Colorado and Picher Oklahoma from the mineral discovery phase through mine closure telling for the first time how these century old mining towns have survived and how sense of place has played a vital role Acknowledging the hardships that mining s social environmental and economic legacies have created for current residents Robertson argues that the industry s influences also have contributed to the creation of strong cohesive communities in which residents have always identified with the severe landscape and challenging but rewarding way of life Robertson contends that the tough unpretentious appearance of mining landscapes mirrors qualities that residents value in themselves confirming that a strong sense of place in mining regions as elsewhere is not necessarily wedded to an attractive aesthetic or

even to a thriving economy
