Without special title , Role Of Biotechnology In Medicinal And Aromatic Plants: Atiya Khanum And Irgan Ali Khan, 2007 **Harnessing Medicinal Plants in Cancer Prevention and Treatment** Roy, Arpita, 2024-03-11 In a world grappling with the relentless impact of cancer claiming nearly 10 million lives in 2020 alone the pursuit of effective prevention and treatment methods is more crucial than ever Harnessing Medicinal Plants in Cancer Prevention and Treatment delves into promising medicinal plants exploring their potential in the prevention and treatment of various types of cancer Acknowledging the limitations and risks associated with synthetic medicines the book emphasizes the significance of traditional medicine revealing that approximately 80% of the global population relies on plant based remedies for primary health care Within these pages readers will find a comprehensive exploration of diverse medicinal plants and their active compounds unraveling their mode of action against cancer The content spans continents from the phytochemical and biological properties of anticancer medicinal plants in India to the role of Chinese and Thai plants in cancer prevention and treatment Each chapter meticulously examines specific plants or compounds such as the renowned *Curcuma longa* or the

intriguing *Momordica charantia* providing an in depth analysis of their anticancer properties This book elucidates the multifaceted role of plant derived compounds in various cancer types addressing their efficacy and safety profiles The book is rich with insights into the potential of bioactive compounds to serve as lead candidates in drug discovery highlighting the importance of plants in developing effective anticancer agents This book is an invaluable resource for a diverse audience including biotechnologists plant biologists pharmacologists and cancer related researchers

Anticancer Plants: Natural Products and Biotechnological Implements Mohd Sayeed Akhtar, Mallappa Kumara Swamy, 2018-07-02 This volume provides summarized scientific evidence of the different classes of plant derived phytochemicals their sources chemical structures anticancer properties mechanisms of action methods of extraction and their applications in cancer therapy It also discusses endophyte derived compounds as chemopreventives to treat various cancer types In addition it provides detailed information on the enhanced production of therapeutically valuable anticancer metabolites using biotechnological interventions such as plant cell and tissue culture approaches including in vitro hairy root and cell suspension culture and metabolic engineering of biosynthetic pathways

Anticancer Plants Natural Products and Biotechnological Implements Volume 2 explores the natural bioactive compounds isolated from plants as well as fungal endophytes their chemistry and preventive effects to reduce the risk of cancer Moreover it highlights the genomics proteomics approaches and biotechnological implementations Providing solutions to deal with the challenges involved in cancer therapy the book benefits a wide range of readers including academics students and industrial experts working in the area of natural products medicinal plant chemistry pharmacology and biotechnology
