Inorganic Biochemistry H. A. O. Hill,1979 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume Emerging Innovative Trends in the Application of Biological Processes for Industrial Wastewater Treatment

Maulin P. Shah,2024-05-22 Emerging Innovative Trends in the Application of Biological Processes for Industrial Wastewater Treatment discusses new and emerging innovative trends in the application of biological processes in industrial wastewater treatment It also includes the fate of chemicals produced after the treatment process both at the laboratory scale and at the industrial scale This book explores the unique biological aspects of the wastewater treatment process and highlights the advantages they provide for engineering applications in the industries Each chapter covers a different biological based approach and examines the basic principles practical applications recent breakthroughs and associated limitations Emerging Innovative Trends in the Application of Biological Processes for Industrial Wastewater Treatment also provides in depth knowledge on the biological process for application in wastewater research which presents an array of cutting edge wastewater treatment research and thereafter its applications in treatment remediation sensing and pollution prevention processes which has a significant impact on maintaining the long term quality availability and viability of water

Serves as an easy to use guider manual for all the enlisted smart techniques Describes and discusses the emerging futuristic technologies in industrial pollutants removal from wastewater Covers advancements in biological treatments advanced oxidation techniques and membrane technology to remove water pollutants

Mangroves: Structure, Functions, Ecology and Biodiversity Dr. Hiren B. Soni, Dr. Kavita Thakur, Marine ecosystems are diverse habitats endowed with physical chemical and geographical variations in the ecosystems where the gradation from highly productive organisms to highly specialized organisms exists India has almost 7 517 km long coast of which 5 423 km belongs to the peninsular India and around 2 094 km to the Andaman Nicobar and Lakshadweep Islands The mainland coast of India consists of 43% sandy beaches 11% rocky coast including cliffs and 46% mudflats or marshy coast This massive coastline of India supports the human population tremendously through marine resources Nearly 250 million people live within the fringe of 50 km from the coastline of India Hence a vital role in India s economic growth is played by the ecological services that the marine and coastal ecosystems provide The MPAN Marine Protected Area Network in India regulates the natural marine resources to conserve the depleting biodiversity for the betterment of people that are dependent on these coastal resources Moreover Gujarat State is bestowed with one of the longest coastline of India 1 650 km The Gulf of Kachchh Gujarat is India s first Marine National Park MNP contributing to the ecological importance of the state s coastal ecosystem exhibiting the most vulnerable biological diversity in intertidal mudflats gulfs bays wetlands mangroves salt marshes coral reefs beaches dunes and estuaries The book Mangroves Structure Functions Ecology and Biodiversity focuses on environmental and ecological studies of Gulf of Kachchh Western Gujarat India in relation to eutrophication biotic components structure and functions of mangroves and biomonitoring of metals The book covers an in depth study of surface water and bottom sediment quality diversity density abundance commonness rarity of shells ecological structure and functions of mangrove environment including composition population dynamics community structure of floral and faunal species phytochemical constituents of selected mangrove tree species and biomonitoring of nutrients in *Avicennia marina* The book would unquestionably be the need of an hour for mangroves managers marine conservationists and policy makers or decision authorities to prevent the unrestrained exploitation of marine biodiversity destruction of potential mangrove habitats and uncontrolled interactions of man and technology with mangrove ecosystems around the world

Crop Biofortification Adnan Noor Shah, Sajid Fiaz, Muhammad Aslam, Javed Iqbal, Abdul Qayyum, 2025-06-03 Develop more nutritious crops to aid in the fight against world hunger with this timely volume One in nine people worldwide suffer from hunger or food scarcity Massively increasing food production is one of the most urgent scientific projects in the modern world particularly as a changing climate places increasing pressure on the global food supply and on sustainable food production processes Biofortification is a process in which plant breeding improved agronomic practices and or modern biotechnology are employed to increase nutrient density of crops without sacrificing any of their desirable characteristics It s an essential tool in the global fight against hunger

Crops Biofortification offers an up to the minute overview of this essential subject and its recent advances It covers all the latest methodologies and techniques deployed in biofortification as well as surveying plant responses to genetically induced biofortification and the effect of climate change on biofortified crops Designed to allow for the application of these techniques at the field level it s a significant contribution towards the search for a sustainable global food supply Crops Biofortification readers will also find Presentation of recent advances in omics particularly metabolomics which can decipher potential changes in plants caused by biofortification Detailed discussion of methods for increasing the nutritional content of edible plants to address specific nutritional deficiencies Contributions towards a road map for increasing global food production by 70% before the year 2050 Crops Biofortification is ideal for researchers policymakers and professionals interested in the potential biofortification of crop plants as well as graduate and advanced undergraduate students in agronomy plant physiology plant breeding and genetics agricultural biotechnology and related fields
