Delaying Doomsday Rupal N. Mehta, 2020 In 1960 President Kennedy warned of a dangerous future rife with nuclear armed states and a widespread penchant for conflict by the end of the century Thankfully his prediction failed to pass in fact roughly three times as many countries have since opted to give up their nuclear pursuit or relinquish existing weapons than have maintained their arsenals Nevertheless clandestine acquisition of nuclear materials and technology by states such as Iraq Syria and Iran and a nuclear North Korea has reaffirmed the need for United States commitment to pursuing aggressive counterproliferation strategies particularly with rogue states This book looks at the experiences of countries that ventured down the path of nuclear proliferation but were stopped short and examines how the international community bargains with proliferators to encourage nuclear reversal It asks why so many states have relented to pressure to abandon their nuclear weapons programs and which counterproliferation policies have been successful Rupal N Mehta argues that the international community can persuade countries to reverse their weapons programs with rewards and sanctions especially when the threat to use military force remains on the table Specifically nuclear reversal is most likely when states are threatened with sanctions and offered face saving rewards that help them withstand domestic political opposition Historically the United States has relied on a variety of policy levers including economic and civilian nuclear assistance and sometimes security guarantees as well as economic sanctions to achieve nuclear reversal Underlying these negotiations is the possibility of military intervention which incentivizes states to accept the agreement often spearheaded by the United States and end their nuclear pursuit The book draws on interviews with current and former policymakers as well as in depth case studies of India

Iran and North Korea to provide policy recommendations on how best to manage nuclear proliferation challenges from rogue states It also outlines the proliferation horizon or the set of state and non state actors that are likely to have interest in acquiring nuclear technology for civilian military or unknown purposes The book concludes with implications and recommendations for U S and global nuclear counterproliferation policy A Handbook of China's International Relations

Sports Law in China Junxin Kang, Jing Xia, 2017-04-21 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in China deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in China will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

Language, Politics and Identity in Taiwan Hui-Ching Chang, Richard Holt, 2014-11-20 Following the move by Chiang Kai shek and the Chinese Nationalist Party Kuomintang KMT to Taiwan after losing the Chinese civil war to the Chinese Communist Party CCP in the late 1940s and Chiang's subsequent lifelong vow to reclaim the mainland China has occupied if not monopolized the gaze of Taiwan where its projected images are reflected Whether mirror image shadow or ideal contrast China has been and will continue to be a key reference point in Taiwan's convoluted effort to find its identity Language Politics and Identity in Taiwan traces the intertwined paths of five sets of names Taiwan has used

to name China since the KMT came to Taiwan in 1949 the derogatory Communist bandits the ideologically focused Chinese Communists the seemingly neutral geographical designators mainland and opposite shore both shores and the ethnic and national label China with the official designation People's Republic of China In doing so it explores how Taiwanese identities are constituted and reconstituted in the shifting and switching of names for China in the application of these names to alternative domains of Taiwanese life in the waning or waxing of names following tides of history and polity and in the increasingly contested meaning of names Through textual analyses of historical archives and other mediated texts and artifacts the chapters chart Taiwan's identity negotiation over the past half century and critically evaluate key interconnections between language and politics This unique book will be of great interest to students and scholars of Taiwan studies Chinese politics communication studies and linguistics
