# Role Of Interleukin 2 In The Treatment Of Cancer Patients

**R. Bryan Bell, Peter A. Andersen, Rui P. Fernandes**

## **Role Of Interleukin 2 In The Treatment Of Cancer Patients:**

**The role of interleukin-2 in the treatment of cancer patients** J. Wagstaff,2012-12-06 Recombinant human interleukin 2 became available for clinical use in the mid 1980s Recent years have seen an enormous amount of clinical research with this cytokine and interleukin 2 has now been registered for use in a number of European countries for the treatment of metastatic renal cell carcinoma This book is designed to provide the clinical oncologist wishing to use interleukin 2 with a basic background concerning the biology of the agent a discussion concerning practical aspects of its clinical use including management of toxicity and an overview of the clinical results together with a description of how this interesting cytokine might be developed in the future

**The Role of Interleukin-2 in the Treatment of Cancer Patients** J. Wagstaff,2014-01-15 **Cumulated Index Medicus** ,1995 **Journal of the National Cancer Institute** ,1993 **Cytotoxic Cells: Recognition, Effector Function, Generation, and Methods**

SITKOVSKY,HENKART,2012-12-06 Our motivation for putting together this book was the need for a single source reference that could be used as an introduction to cell mediated cytotoxicity for newcomers to this field such as students and fellows beginning work in our laboratories At present no such book is available and we felt that it would be useful as a teaching tool and as a way of conveying our enthusiasm about recent progress in the cytotoxicity field to our colleagues in allied areas It was with some hesitation that we approached our colleagues with the proposal for this book and we were pleased to find them very supportive of the idea and willing to participate We thought it important to broaden the scope of the book to include historical molecular cell biological and clinical aspects of cell mediated cytotoxicity To our knowledge this is the first book on cell mediated cytotoxicity with such a broad scope Historically studies on cellular cytotoxicity were part of cellular immunology from its origin One development of tremendous import was the advent of the  $^{51}\text{Cr}$  assay which allowed this arm of the immune response to be measured easily and quantitatively Thus a readout of this effector pathway is available within a few hours other immune effector functions can take days or even longer to assay and the assays are often less quantitative
