R. Pritchett-Corning, Mark T. Whary**

## **Role Of The Chimpanzee In Research:**

**Role of the Chimpanzee in Research** G. Eder, E. Kaiser, F. A. King, 1994-07-06 **Chimpanzees in Biomedical and Behavioral Research** National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Institute of Medicine, Board on Health Sciences Policy, Committee on the Use of Chimpanzees in Biomedical and Behavioral Research, 2012-01-05 For many years experiments using chimpanzees have been instrumental in advancing scientific knowledge and have led to new medicines to prevent life threatening and debilitating diseases However recent advances in alternate research tools have rendered chimpanzees largely unnecessary as research subjects The Institute of Medicine in collaboration with the National Research Council conducted an in depth analysis of the scientific necessity for chimpanzees in NIH funded biomedical and behavioral research The committee concludes that while the chimpanzee has been a valuable animal model in the past most current biomedical research use of chimpanzees is not necessary though noted that it is impossible to predict whether research on emerging or new diseases may necessitate chimpanzees in the future

Contemporary Debates in Bioethics Arthur L. Caplan, Robert Arp, 2013-09-10 Contemporary Debates in Bioethics features a timely collection of highly readable debate style arguments contributed by many of today's top bioethics scholars focusing on core bioethical concerns of the twenty first century Written in an engaging debate style format for accessibility to non specialists Features general introductions to each topic that precede scholarly debates Presents the latest cutting edge thoughts on relevant bioethics ideas arguments and debates **Research Awards Index**, 1987 **Mahale Chimpanzees** Michio Nakamura, Kazuhiko Hosaka, Noriko Itoh, Koichiro Zamma, 2015-09-10 A major contribution to great ape research covering every aspect of the Mahale Mountain Chimpanzee Project to offer new unique insights Origins of the Social Mind Shoji Itakura, Kazuo Fujita, 2009-02-11 During the first few years of life children acquire knowledge about the relationships between their own mental states their actions and the social world This information is then used to understand themselves and others Humans are born into families where they are raised and learn to cooperate compete and communicate We are social creatures and over the course of development we learn about people relationships social systems and others minds In addition not only do we live socially we think socially as well However human adults are not the only creatures to live and think socially In recent years sophisticated experiments have provided new information about social cognition in human infants and nonhuman animals In this book we focus on the developmental and evolutionary origins of the social mind bringing together the currently segregated views on social cognition in the two fields Ever since the term theory of mind was coined by D Premack nearly 30 years ago the concept has been the main topic of social cognition research both in developmental psychology and in primatology However few attempts have been made to integrate these two research domains Just recently researchers from the two areas collaborated to publish a book on this topic but the volume was little more than a collection of independent papers This book overcomes that limitation by presenting new data and their

implications from both developmental and evolutionary points of view      **Research Grants Index** National Institutes of Health (U.S.). Division of Research Grants,1975      **Laboratory Animal Medicine** Lynn C. Anderson,Glen Otto,Kathleen R. Pritchett-Corning,Mark T. Whary,2015-07-04 Laboratory Animal Medicine Third Edition is a fully revised publication from the American College of Laboratory Medicine s acclaimed blue book series It presents an up to date volume that offers the most thorough coverage of the biology health and care of laboratory animals The book is organized by species with new inclusions of chinchillas birds and program and employee management and is written and edited by known experts in the fields Users will find gold standard guidance on the study of laboratory animal science as well as valuable information that applies across all of the biological and biomedical sciences that work with animals Organized by species for in depth understanding of biology health and best care of animals Features the inclusion of chinchillas quail and zebra finches as animal models Offers guidance on program and employee management Covers regulations policies and laws for laboratory animal management worldwide      **New York Court of Appeals. Records and Briefs.** New York (State).,      **Biomedical Index to PHS-supported Research** ,1991      The Chimpanzees of the Budongo Forest Vernon Reynolds,2005-06-30 Unlike humans who came down from the trees and developed bipedal locomotion chimpanzees have remained in the original habitat of our ancestors the tropical rainforests of Africa In this book Vernon Reynolds describes in detail the work of a large number of students and senior researchers on the wild chimpanzees of the Budongo Forest Reserve in Western Uganda He presents a coherent and in depth account of one chimpanzee community of more than 60 individuals living in the Sonso area in the middle of the Budongo Forest which he and his colleagues have studied intensively over the last 15 years The chimpanzees have never been provisioned and live in an entirely natural state Reynolds describes their forest habitat their diet and culture their social organization and behaviour their diseases and the threats to them that derive from the actions of people in the surrounding villages the most serious of these being the presence of snares set by hunters to catch small antelopes and pigs As founder and head of the Budongo Forest Project Professor Reynolds has been responsible for compiling the numerous publications reports and dissertations written about these chimpanzees In this book he combines these new and often unpublished studies with past publications about Budongo Forest Where appropriate he also compares the Budongo chimpanzees with wild chimpanzees studied at other sites across Africa The result is the most comprehensive account of the Budongo chimpanzees ever published with a wealth of referenced material that will serve as a source of information for many years to come      **AIDS Research at EC Level** Andre E. Baert,1995 At EC level the fight against AIDS one of the major health problems and socioeconomic diseases today is also part of the specific RTD programme in the field of biomedicine and health About 600 research teams are collaborating within 30 concerted actions networks that are underpinned by centralised facilities For example the epidemiology research networks are monitored by the WHO EC collaborating centre in St Maurice France Common experiments on animal models antiviral screening genetic analysis of multiple virus strains and provision of

reagents for vaccine development are also centralized facilities in AIDS research carried out under the principles of subsidiarity and Community added value This publication presents an overview of their ongoing research activities in disease control and prevention viro immunological research clinical research and vaccine development Covered by Current Contents Life Sciences ISI volume 38 no 19 May 1995 p 11 12 Therefore for anyone doing AIDS research this is a must volume to have in order to understand what the European Community is doing in AIDS research Highly recommended for all medical and academic libraries H Robert Malinowsky The University of Illinois Chicago USA AIDS Book Review Journal no 27 June 1996

*Biomedical Index to PHS-supported Research: pt. A. Subject access A-H*, 1992      **Alternatives to Animal Use in Research, Testing, and Education**, 1986      *The Routledge Handbook of Neuroethics* L. Syd M Johnson, Karen S. Rommelfanger, 2017-07-20 The Routledge Handbook of Neuroethics offers the reader an informed view of how the brain sciences are being used to approach understand and reinvigorate traditional philosophical questions as well as how those questions with the grounding influence of neuroscience are being revisited beyond clinical and research domains It also examines how contemporary neuroscience research might ultimately impact our understanding of relationships flourishing and human nature Written by 61 key scholars and fresh voices the Handbook's easy to follow chapters appear here for the first time in print and represent the wide range of viewpoints in neuroethics The volume spotlights new technologies and historical articulations of key problems issues and concepts and includes cross referencing between chapters to highlight the complex interactions of concepts and ideas within neuroethics These features enhance the Handbook's utility by providing readers with a contextual map for different approaches to issues and a guide to further avenues of interest Chapter 11 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9781315708652/ch11>      [Advances in Bioengineering Research and Application: 2013 Edition](#), 2013-06-21 *Advances in Bioengineering Research and Application 2013 Edition* is a ScholarlyBrief that delivers timely authoritative comprehensive and specialized information about ZZZAdditional Research in a concise format The editors have built *Advances in Bioengineering Research and Application 2013 Edition* on the vast information databases of ScholarlyNews You can expect the information about ZZZAdditional Research in this book to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of *Advances in Bioengineering Research and Application 2013 Edition* has been produced by the world's leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>      **Ethics in the Field** Jeremy MacClancy, Agustín Fuentes, 2013-07-01 In recent years ever increasing concerns about ethical dimensions of fieldwork practice have forced anthropologists and other social scientists to

radically reconsider the nature process and outcomes of fieldwork what should we be doing how for whom and to what end In this volume practitioners from across anthropological disciplines social and biological anthropology and primatology come together to question and compare the ethical regulation of fieldwork what is common to their practices and what is distinctive to each discipline Contributors probe a rich variety of contemporary questions the new unique problems raised by conducting fieldwork online and via email the potential dangers of primatological fieldwork for locals primates the environment and the fieldworkers themselves the problems of studying the military and the role of ethical clearance for anthropologists involved in international health programs The distinctive aim of this book is to develop of a transdisciplinary anthropology at the methodological not theoretical level New Frontiers in Mirror Neurons Research Pier Francesco Ferrari,Giacomo Rizzolatti,2015 The discovery of mirror neurons has been a revolution in neuroscience and psychology Nevertheless because of their profound impact in life sciences mirror neurons still raise debates about their origins and functions This book offers a comprehensive and state of the art overview of the latest advances in mirror neurons research
