Eastern European Mathematics Education in the Decades of Change Alexander Karp, 2020-05-04 This contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe exploring how it was influenced by social and political changes in this part of the world. Despite the broad recognition of the importance of these changes little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post-socialist countries. Indeed the analyzed processes are complex and vary across the states. Accordingly this book touches on many factors including differences in cultures and traditions that find expression in the teaching of mathematics. Specifically this volume seeks to explore what changes there were in education in general and in the position of mathematics in school education in these years and how these changes may be explained and documented what changes there were in the content of mathematics education and its assessment and how were they motivated and adopted what new textbooks appeared and what new methodological ideas were offered in them how and why mathematics teacher education and/or professional development changed what was the role if any of foreign influences on mathematics education etc. The book will be of interest to both researchers in mathematics education and practitioners teachers as well as a broader audience of historians and educators exploring the political aspects of education. **Lehren und Lernen von Mathematik**

sollen Mathematiklernen vom Kindergarten bis zum Studium Aiso Heinze, Meike Grüßing, 2013-09-25 Mathematik als bedeutender Lerninhalt begleitet die meisten Menschen vom Kindesalter bis zur Ausbildung beziehungsweise zum Studium. Eine wesentliche Bedingung für die individuelle Kompetenzentwicklung in diesem Fach ist dabei die Kohärenz der Lernangebote in ihren Inhalten, Zielen und Anforderungen. Inkohärenzen zwischen den einzelnen Bildungseinrichtungen in unserem Bildungssystem stellen eine Herausforderung für die Entwicklung der mathematischen Kompetenzen im Bildungsverlauf jedes Einzelnen dar. In diesem Buch diskutieren über 30 Autorinnen und Autoren aus der Mathematikdidaktik, den Erziehungswissenschaften und der Psychologie die mathematische Kompetenzentwicklung für die einzelnen Bildungsphasen vom Kindergarten bis zur Ausbildung bzw. bis zum Studium sowie für die dazwischen liegenden Übergangsphasen. Wesentliches Ziel ist dabei vor allem die Betrachtung empirischer Ergebnisse aus der Perspektive einer langfristigen Kompetenzentwicklung. Es zeigt sich dabei, dass der Stand der Forschung für die verschiedenen Phasen des Mathematiklernens sehr unterschiedlich ist. Während für den Übergang vom Elementarbereich in den Primarbereich bereits zahlreiche empirische Resultate vorliegen, sind die Übergänge von der Schule in die Ausbildung bzw. in das Studium in Bezug auf das Mathematiklernen nur wenig erforscht.

Learning Strategies in Engineering Mathematics Birgit Griesse, 2017-02-28 Birgit Griesse presents MP2 Math Plus, a support project for first year students in engineering at Ruhr University Bochum that aims at preventing unnecessary drop out. Conceptualisation and development of the project follow a design research approach according to Gravemeijer, Cobb and van den Akker. The interventions focus on learning strategies which are collected in a pre-post design with the aid of the LIST questionnaire by Wild and Schiefele. These and other data are utilised for the evaluation of MP2 Math Plus. The results confirm the adaptations of the project procedures in successive cycles, stress the importance of effort and motivation and assess the success of the project.

Mobile Learning and Mathematics Helen Crompton, John Traxler, 2015-02-11 Mobile Learning and Mathematics provides an overview of current research on how mobile devices are supporting mathematics educators in classrooms across the globe. Through nine case studies, chapter authors investigate the use of mobile technologies over a range of grade levels and mathematical topics while connecting chapters provide a strong foundational background in mobile learning theories, instructional design and learner support. For current educators, Mobile Learning and Mathematics provides concrete ideas and strategies for integrating mobile learning into their mathematics instruction, for example by sharing resources that will help implement Common Core State Standards or by streamlining the process of selecting from the competing and often confusing technology options currently available. A cutting edge research volume, this collection also provides a springboard for educational researchers to conduct further study.

inhaltlichen Fragestellungen und methodischen Zugängen zum Thema bergang Schule Hochschule ab Die Fülle an nachahmenswerten Maßnahmen zur Gestaltung des bergangs ist nicht nur imposant sondern verweist darauf dass die Integration von Einzelmaßnahmen zu einem sinnvollen Gesamtkonzept für Hochschulen eine große institutionelle Herausforderung darstellt Mit der Auswahl und Zusammenstellung der Beiträge wird einerseits zu weiteren interessanten wissenschaftlichen Untersuchungen der bergänge von der Schule an die Hochschulen angeregt andererseits sollen die Beispiele aus der Praxis zur Nachahmung oder Modifikation eigener Maßnahmen inspirieren

Computeralgebra im Mathematikunterricht Bärbel Barzel, 2012 Rechnereinsatz im Mathematikunterricht curricular ist er empfohlen und teilweise sogar verpflichtend Dennoch wird der Rechnereinsatz wie kaum ein anderes Thema sehr kontrovers diskutiert Das gilt insbesondere für Computeralgebra wenn neben der Funktion des Graphenzeichnens auch die Möglichkeit besteht algebraische Ausdrücke zu verarbeiten Für die einen ist der Einsatz solcher Systeme der Schlüssel um mehr Anwendungsbezug und offenere Aufgabenstellungen im Unterricht zu integrieren für die anderen bedeuten sie die große Gefahr dass Mathematik mit Papier und Bleistift verlernt wird Diese Diskussionen werden häufig sehr emotional aufgrund persönlicher Erfahrungen geführt Hier eine fundierte Argumentationsbasis zu gewinnen war Anlass für eine Meta Studie die im Auftrag des Thüringer Kultusministeriums durchgeführt wurde Die Ergebnisse dieser umfassenden Recherche bei der mehr als 200 internationale Forschungsberichte einbezogen wurden werden in diesem Band anhand von Thesen vorgestellt und diskutiert Das Ziel soll sein Gelingensbedingungen für einen erfolgreichen Einsatz im Unterricht abzuleiten
