

The background of the book cover is a detailed illustration in a medieval manuscript style. It depicts a busy workshop or market scene. In the foreground, a man in a blue tunic and a woman in a red dress are engaged in a transaction. The man is holding a small object, possibly a coin or a piece of goods, while the woman looks on. In the background, other figures are visible, including a man in a red tunic and a woman in a blue dress. There are also various objects and structures, such as a large wooden barrel, a small table, and a building with a thatched roof. The overall color palette is muted, with earthy tones and some brighter colors for the clothing.

Modelling The Middle Ages The History And Theory Of Englands Economic Development:

Modelling the Middle Ages John Hatcher (historicus.),2002 **Modelling the Middle Ages** John Hatcher,Mark Bailey,2001 This book surveys the most influential theoretical approaches adopted for the study of medieval economy and society It offers an accessible introduction to medieval economic history an up to date critique of established models and a succinct treatise on historiographical method **A Cultural History of the Human Body in the Medieval Age** Linda Kalof,2012-03-01 The Christian Jewish and Muslim communities of medieval Western Europe conceived of the human body in manifold ways The body was not a fixed or unmalleable mass of flesh but an entity that changed its character depending on its age its interactions with its environment and its diet For example a slave would have been marked by her language her name her religion or even by a sign burned onto her skin not by her color alone Covering the period from 500 to 1500 and using sources that range across the full spectrum of medieval literary scientific medical and artistic production this volume explores the rich variety of medieval views of both the real and the metaphorical body A Cultural History of the Human Body in the Medieval Age presents an overview of the period with essays on the centrality of the human body in birth and death health and disease sexuality beauty and concepts of the ideal bodies marked by gender race class and age cultural representations and popular beliefs and the self and society *The Economy of Medieval Wales, 1067-1536* Matthew Frank Stevens,2019-10-01 This book surveys the economy of Wales from the first Norman intrusions of 1067 to the Act of Union of England and Wales in 1536 Key themes include the evolution of the agrarian economy the foundation and growth of towns the adoption of a money economy English colonisation and economic exploitation the collapse of Welsh social structures and rise of economic individualism the disastrous effect of the Glynd r rebellion and ultimately the alignment of the Welsh economy to the English economy Comprising four chapters a narrative history is presented of the economic history of Wales 1067 1536 and the final chapter tests the applicability in a Welsh context of the main theoretical frameworks that have been developed to explain long term economic and social change in medieval Britain and Europe **The Origin of Capitalism in England, 1400-1600** Spencer Dimmock,2014-06-05 Incorporating original archival research and a series of critiques of recent accounts of economic development in pre modern England in *The Origin of Capitalism in England 1400 1600* Spencer Dimmock has produced a challenging and multi layered account of a historical rupture in English feudal society which led to the first sustained transition to agrarian capitalism and consequent industrial revolution Genuinely integrating political social and economic themes Spencer Dimmock views capitalism broadly as a form of society rather than narrowly as an economic system He firmly locates its beginnings with conflicting social agencies in a closely defined historical context rather than with evolutionary and transhistorical commercial developments and will thus stimulate a thorough reappraisal of current orthodoxies on the transition to capitalism **Roles of the Sea in Medieval England** Richard Gorski,2012 A fresh assessment of seaborne activity around England in the later middle ages offering a fresh perspective on its rich maritime

heritage England's relationship with the sea in the later Middle Ages has been unjustly neglected a gap which this volume seeks to fill The physical fact of the kingdom's insularity made the seas around England fundamentally important to its development within the British Isles and in relation to mainland Europe At times they acted as barriers but they also and more often served as highways of exchange transport and communication and it is this aspect which the essays collected here emphasise Mindful that the exploitation of the sea required specialist technology and personnel and that England's maritime frontiers raised serious issues of jurisdiction security and international diplomacy the chapters explore several key roles performed by the sea during the period c 1200 c 1500 Foremost among them is war the infrastructure logistics politics and personnel of English seaborne expeditions are assessed most notably for the period of the Hundred Years War What emerges from this is a demonstration of the sophisticated but not infallible methods of raising and using ships men and material for war in a period before England possessed a permanent navy The second major facet of England's relationship with the sea was the generation of wealth this is addressed in its own right and as an intrinsic aspect of warfare and piracy RICHARD GORSKI is Philip Nicholas Memorial Lecturer in Maritime History at the University of Hull Contributors Richard Gorski Richard W Unger Susan Rose Craig Lambert David Simpkin Tony K Moore Marcus Pitcaithly Tim Bowly Ian Friel

Mortality, Trade, Money and Credit in Late Medieval England (1285-1531) Pamela Nightingale, 2020-07-21 The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians Topics include the relative roles played by money and credit in financing the economy whether credit could compensate for shortages of coin and whether it could counteract the devastating mortality of the Black Death Drawing on a detailed analysis of the Statute Merchant and Staple records the articles chart the chronological and geographical changes in the economy from the late thirteenth to the early sixteenth centuries This period started with the triumph of English merchants over alien exporters in the early 1300s and concluded in the early 1500s with cloth exports overtaking wool in value The articles assess how these changes came about as well as the degree to which both political and economic forces altered the pattern of regional wealth and enterprise in ways which saw the northern towns decline and London rise to be the undisputed financial as well as the political capital of England *The Medieval Clothier* John S. Lee, 2018 A clear and accessibly written guide to the medieval cloth making trade in England Cloth making became England's leading industry in the late Middle Ages clothiers coordinated its different stages in some cases carrying out the processes themselves and found markets for their finished cloth selling to merchants drapers and other traders While many clothiers were of only modest status or jacks of all trades a handful of individuals amassed huge fortunes through the trade becoming the multi millionaires of their day This book offers the first recent survey of this hugely important and significant trade and its practitioners examining the whole range of clothiers across different areas of England and exploring their impact within the industry and in their wider communities Alongside the mechanics of the trade it considers clothiers as entrepreneurs and early capitalists employing workers and

even establishing early factories it also looks at their family backgrounds and their roles as patrons of church rebuilding and charitable activities It is completed with extracts from clothiers wills and a gazetteer of places to visit making the book invaluable to academics students and local historians alike JOHN S LEE is a Research Associate at the Centre for Medieval Studies at the University of York The Oxford Handbook of Early Modern European History, 1350-1750 Hamish Scott,2015-07-23 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam *Medieval Statistics* Mark Casson,John S. Lee,2024-12-26 This book is the first to systematically examine the sources of medieval statistics It will be useful as a handbook for researchers in financial and cultural history as a history of financial record keeping and as a review of recent research into medieval finance and accounting based on statistical sources Medieval statistics provide a unique window on the past Medieval documents produced by royal governments monastic and ecclesiastical institutions urban boroughs and legal cases for debt recovery provide a mine of useful information on economic life and financial affairs They show that medieval administration was far more numerate and far more sophisticated than is usually recognized This book provides a comprehensive review of the key sources written by leading experts in the field The strengths and weaknesses of each source are reviewed using original documents for illustration and discussing examples from the recent literature The book is mainly concerned with English statistics as they have survived particularly well in both state and private records but which showcase the potential of digital technology in enabling systematic study of medieval primary sources where large databases can now be compiled from original manuscripts This edited volume will be a valuable tool for those working in financial cultural and political history as it seeks to analyse the various ways in which medieval life was documented numerically and the ways in which this information was used within existing power structures World of the Small Farmer Patricia Croot,2017-06-01 This detailed and original study of early modern agrarian society in the Somerset Levels examines the small landholders in a group of sixteen contiguous parishes in the area known as Brent Marsh These were farmers with lifehold tenures and a mixed

agricultural production whose activities and outlook are shown to be very different from that of the small peasant farmers of so many general histories Patricia Croot challenges the idea that small farmers failed to contribute to the productivity and commercialization of the early modern economy While the emergence of large capitalist farms was an important development these added to the production of existing small cultivators rather than replacing them The idea that only large scale specialized farmers were involved in agricultural progress or that their contribution alone was enough to account for the great increase in food production by the late 17th century is questioned small farmers continued to make a living contributed to the market and survived alongside the new bigger farms Croot s in depth study not only adds to our knowledge of agrarian society generally but shows that far from being backward and interested primarily in subsistence farming small producers in this area sought profit in making the best use of their resources however limited being flexible in their production and growing new or unusual crops The main land tenures copy and lease for lives are also covered in detail contributing to current debates on landholding and sub tenancy The author shows the uses to which lifehold tenures could be put resulting in the increasing financial strength of copyholders and their dominance in local society The effects of the tenure and profits of farming can be seen in the way that families were provided for as well as in the roles that women played and the responsibility they had in economic and social life while the wider interests of the inhabitants are shown in their religious and political engagement in events of the 17th century Patricia Croot s meticulous study is a valuable contribution to English agrarian history and in particular to the history of this under researched region *Decision-Making in Medieval Agriculture* David Stone,2005-09-29 This fascinating and important book uses a wealth of contemporary sources to reconstruct the mental world of medieval farmers and by doing so argues that these key figures in the Middle Ages have been unfairly stereotyped David Stone overturns the traditional view of medieval countrymen as economically backward and instead reveals that agricultural decision making was as rational in the fourteenth century as in modern times Investigating agricultural mentalities first at a local level and then for England as a whole Dr Stone argues that human action shaped the course of the rural economy to a much greater extent than has hitherto been appreciated and challenges the commonly held view that the medieval period was dominated by ecological and economic crises Focusing in particular on responses to commercial forces and the adoption of agricultural technology this book has significant implications for our understanding of agricultural development throughout the last thousand years *Introduction to Medieval Europe 300-1500* Wim Blockmans,Peter Hoppenbrouwers,2017-11-03 Introduction to Medieval Europe 300 1500 provides a comprehensive survey of this complex and varied formative period of European history covering themes as diverse as barbarian migrations the impact of Christianisation the formation of nations and states the emergence of an expansionist commercial economy the growth of cities the Crusades the effects of plague and the intellectual and cultural life of the Middle Ages The book explores the driving forces behind the formation of medieval society and the directions in which it developed and changed In doing

this the authors cover a wide geographic expanse including Western interactions with the Byzantine Empire and the Islamic World This third edition contains a wealth of new features that help to bring this fascinating era to life including In the book A number of new maps and images to further understanding of the period Clear signposting and extended discussions of key topics such as feudalism and gender Expanded geographic coverage into Eastern Europe and the Middle East On the companion website An updated comparative and interactive timeline highlighting surprising synchronicities in medieval history and annotated links to useful websites A list of movies television series and novels related to the Middle Ages accompanied by introductions and commentaries Assignable discussion questions and the maps plates figures and tables from the book available to download and use in the classroom Clear and stimulating the third edition of Introduction to Medieval Europe is the ideal companion to studying Europe in the Middle Ages at undergraduate level

Social Mobility in Medieval Italy (1100-1500) Sandro Carocci, Isabella Lazzarini, Autori Vari, 2021-07-27T12:14:00+02:00 This volume aims to investigate the complex theme of social mobility in medieval Italy both by comparing Italian research to contemporary international studies in various European contexts and by analysing a broad range of themes and specific case studies Medieval social mobility as a European phenomenon in fact still awaits a systematic analysis and has seldom been investigated iuxta propria principia in social political and economic history The essays in the book deal with a number of crucial problems how is social mobility investigated in European and Mediterranean contexts How did classic mobility channels such as the Church officialdom trade the law the lordship or diplomacy contribute to shaping the many variables at play in late medieval societies and to changing and challenging inequality How did movements and changes in social spaces become visible and what were their markers What were the dynamics at the heart of the processes of social mobility in the many territorial contexts of the Italian peninsula

Agrarian Change and Crisis in Europe, 1200-1500 Harilaos Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region

The Routledge Handbook of Medieval Rural Life Miriam

Müller,2021-10-26 The Routledge Handbook of Medieval Rural Life brings together the latest research on peasantry in medieval Europe The aim is to place peasants as small scale agricultural producers firmly at the centre of this volume as people with agency immense skill and resilience to shape their environments cultures and societies This volume examines the changes and evolutions within village societies across the medieval period over a broad chronology and across a wide geography Rural structures families and hierarchies are examined alongside tool use and trade as well as the impact of external factors such as famine and the Black Death The contributions offer insights into multidisciplinary research incorporating archaeological as well as landscape studies alongside traditional historical documentary approaches across widely differing local and regional contexts across medieval Europe This book will be an essential reference for scholars and students of medieval history as well those interested in rural cultural and social history **The Long Road to the**

Industrial Revolution Jan Luiten van Zanden,2009-06-17 Why did the Industrial Revolution happen in Western Europe Was it a sudden acceleration of the European economy or should we look at specific institutions arising in Western Europe since the Middle Ages This book puts these big questions of European economic history in a global perspective deals with the institutions that developed in Europe and measures their relative efficiency over time and compared with other parts of Eurasia It traces the growth of human capital in the centuries between 1000 and 1800 in comparison with China Japan and India It also demonstrates how important the European Marriage Pattern was for understanding Europe s past The result is a new synthesis of the origins of the Industrial Revolution England and its Rulers Michael T. Clanchy,2014-03-04 This is an updated and expanded edition of a classic introduction to medieval England from the reign of William the Conqueror to Edward I Includes a new chapter on family and gender roles revisions throughout to enhance the narrative flow and further reading sections containing the most up to date sources Offers engaging and clear discussion of the key political economic social and cultural issues of the period by an esteemed scholar and writer Illustrates themes with lively pertinent examples and important primary sources Assesses the reigns of key Norman Angevin and Plantagenet monarchs as well as the British dimension of English history the creation of wealth the rise of the aristocracy and more Magna Carta and the England of King John Janet Senderowitz Loengard,2010 Magna Carta marked a watershed in the relations between monarch and subject and as such has long been central to English constitutional and political history This volume uses it as a springboard to focus on social economic legal and religious institutions and attitudes in the early thirteenth century What was England like between 1199 and 1215 And no less important how was King John perceived by those who actually knew him The essays here analyse earlier Angevin rulers and the effect of their reigns on John s England the causes and results of the increasing baronial fear of the king the managerial revolution of the English church and the effect of the ius commune on English common law They also examine the burgeoning economy of the early thirteenth century and its effect on English towns the background to discontent over the royal forests which eventually led to the Charter of the Forest the effect of Magna Carta

on widows and property and the course of criminal justice before 1215 The volume concludes with the first critical edition of an open letter from King John explaining his position in the matter of William de Briouze Contributors Janet S Loengard Ralph V Turner John Gillingham David Crouch David Crook James A Brundage John Hudson Barbara Hanawalt James Masschaele *Reflections: 50 Years of Medieval Archaeology, 1957-2007: No. 30* Roberta Gilchrist, Andrew Reynolds, 2018-12-13 This volume celebrates the 50th anniversary of the Society for Medieval Archaeology established in 1957 presenting reflections on the history development and future prospects of the discipline The papers are drawn from a series of conferences and workshops that took place in 2007 08 in addition to a number of contributions that were commissioned especially for the volume They range from personal commentaries on the history of the Society and the growth of the subject see papers by David Wilson and Rosemary Cramp to historiographical regional and thematic overviews of major trends in the evolution and current practice of medieval archaeology All the publications are fully refereed with the aim of publishing at the highest academic level reports on sites of national and international importance and of encouraging the widest debate The series objectives are to cover the broadest chronological and geographical range and to assemble a series of volumes which reflect the changing intellectual and technical scope of the discipline
