did not remain solely in professional and literary hands The mediaeval minstrels and jongleurs who may best be studied in L on Gautier s Introduction to his Epop es Fran aises sang in Court and Camp The poorer less regular brethren of the art harped and played conjuring tricks in farm and grange or at street corners The foreign newer metres took the place of the old alliterative English verse But unprofessional men and women did not cease to make and sing Alfred Tennyson Andrew Lang,2021-12-02 *Reports Made to the Senate and House of Representatives of the State of Illinois* Illinois,1874

Thomas Salmon: Writings on Music Benjamin Wardhaugh,2017-07-05 This is the second volume in a two part set on the writings of Thomas Salmon Salmon 1647 1706 is remembered today for the fury with which Matthew Locke greeted his first foray into musical writing the Essay to the Advancement of Musick 1672 and the near farcical level to which the subsequent pamphlet dispute quickly descended Salmon proposed a radical reform of musical notation involving a new set of clefs which he claimed and Locke denied would make learning and performing music much easier these writings are the subject of Volume I Later in his life Salmon devoted his attention to an exploration of the possible reform of musical pitch He made or renewed contact with instrument makers and performers in London with the mathematician John Wallis with Isaac Newton and with the Royal Society of London through its Secretary Hans Sloane A series of manuscript treatises and a published Proposal to Perform Musick in Perfect and Mathematical Proportions 1688 paved the way for an appearance by Salmon at the Royal Society in 1705 when he provided a demonstration performance by professional musicians using instruments specially modified to his designs This created an explicit overlap between the spaces of musical performance and of experimental performance as well as raising questions about the meaning and the source of musical knowledge similar to those raised in his work on notation Benjamin Wardhaugh presents the first published scholarly edition of Salmon s writings on pitch previously only available mostly in manuscript *New Babylon New Nineveh* Charles Von Onselen,2012-11-15 Available again in a single volume *New Babylon New Nineveh* explores the past struggles of everyday people on the Witwatersrand South Africa 1886 1914 This was a period of extraordinary social political and economic change Charles van Onselen examines a host of practices processes and problems which in many ways make for startling comparisons with modern day South Africa Van Onselen investigates the pervasive but highly problematic use of alcohol and prostitution which were used to control both black and white mine workers by the state and the mine owners This exploitation of the lifestyle of the single miners later gave way to the official encouragement of working class family life This gave rise to the advent of domestic servants and the introduction of a systematic programme of suburbanisation and cheap public transportation We see how not even these developments were able to protect the poorest and weakest South Africans of the time Van Onselen explains how Afrikaner unemployment and an affinity for trade unionism were paralleled by further marginalisation black unemployment and the resultant formation of prison gangs which flourish even to the present day
