**ICSEDI 2022** Herve Boileau,Lu Wen Feng,Lauric Garbuio,Hilfi Pardi,2023-01-16 This book is the proceeding of the International Conference on Sustainable Engineering Development and Technological Innovation ICSEDI 2022 that was

successfully held on 11-13 October 2022 using an hybrid platform. The conference is themed Sustainable empowerment of innovative solutions through the development of integrated scientific researches to enhance the advanced technological world which represents our belief of how the sustainability is essential in our approach to solve problems through technological innovation. A total of 56 papers were submitted and presented within the sessions of the conference. The papers topics revolve around Informatics Technology, Electrical Technology, Marine Technology, Manufacturing System and Technology, Mechanical Engineering, and also Information Industry and Management. In addition to the technical paper presentations, there were also five keynote speeches featured and eight plenary talks were delivered. Two of the keynote speeches were delivered in person by Professor Selo from Universitas Gajah Mada Indonesia and Professor Goib Wiranto from the National Research and Innovation Agency Indonesia. The rest of the keynote speeches were delivered online by Professor Yvon Kermarrec from IMT Atlantique France, Professor Ian Gibson from University of Twente Netherlands, and Dr Ilham Akbar Habibie from The Association of Indonesian Engineer Indonesia. It was a great pleasure to work with the technical program committee led by Mr Hilfi Pardi who have completed the imperative process of peer review on the technical papers submitted in this conference. We are also very fortunate to have on our side the excellent organizing committee team of the Faculty of Engineering of UMRAH who work very hard to organize and support the conference. Finally, our appreciation to all the authors who have participated in this conference with their amazing achievements and enthusiasm. We firmly believe that ICSEDTI is a suitable platform for researchers, engineers, and developers who are concerned with sustainability in engineering and technological development. We hope in the coming years ICSEDTI will be better in terms of the organization of the conference, the quantity and the quality of the researches submitted, and most importantly the impact on the sustainability of technological innovation.

*Research on Ship Design and Optimization Based on Simulation-Based Design (SBD) Technique* Bao-Ji Zhang, Sheng-Long Zhang, 2018-05-30. Ship optimization design is critical to the preliminary design of a ship. With the rapid development of computer technology, the simulation based design (SBD) technique has been introduced into the field of ship design. Typical SBD consists of three parts: geometric reconstruction, CFD numerical simulation, and optimization. In the context of ship design, these are used to alter the shape of the ship, evaluate the objective function, and to assess the hull form space, respectively. As such, the SBD technique opens up new opportunities and paves the way for a new method for optimal ship design. This book discusses the problem of optimizing ship's hulls, highlighting the key technologies of ship optimization design and presenting a series of hull form optimization platforms. It includes several improved approaches and novel ideas with significant potential in this field.
