## 1

### Supply of Nurses

CNOs must work to show how fulfilling nursing careers can be, and foster creative partnerships with academic programs and institutions that can help produce more nurses.

## 2

### Stabilization of Support Roles

As nursing becomes more and more taxing, it's crucial to have a support team around nurses.

## 3

### Innovation

CNOs are responsible for correctly implementing new technologies, such as virtual care, wearables, and smart room technology, into their programs and strategies.

## 4

### Frontline Nursing Leaders

Retention is difficult in nursing, and it's crucial that frontline nursing leaders be present long-term for their units to help promote teamwork and to maintain a strong workplace culture.

## 5

### Burnout

CNOs should be open and talk about burnout, and validate that it is a real issue. Conduct wellbeing check-ins, provide support, and celebrate wins when they occur.

Seeking Challenge in the Career S. Gayle Baugh, Sherry E. Sullivan, 2018-06-01 The Research in Careers series is

designed in five volumes to provide scholars a unique forum to examine careers issues in today's changing global workplace. What makes this series unique is that the volumes are connected by the use of Mainiero and Sullivan's 2006 Kaleidoscope Career Model (KCM) as the organizing framework and the theme underlying the volumes. In Volume 4 of the Research in Careers series, the authors explore the influence of challenge on career development and career outcomes. The contributors investigate career challenge in different national contexts (e.g., India) and in different career fields (e.g., entrepreneurship, nursing) and for different groups (nurses, Millennials). The outcomes studied include career satisfaction, leadership skills, and occupational expertise. Finally, negative effects of challenge are suggested.

*The Acute-Care Nurse Practitioner* Judy Rashotte, 2013-12-01 From the moment it was first proposed the role of the nurse practitioner has been steeped in controversy In the fields of both nursing and medicine the idea that a nurse practitioner can to some degree serve as a replacement for the physician has sparked heated debates Perhaps for that reason despite the progress of the nurse practitioner movement NPs have been reluctant to speak about themselves and their work and their own vision of their role has thus remained largely invisible Current research is dominated by instrumental and economic modes of discourse and tends to focus on the clinical activities associated with the role Although information about demographics educational preparation position titles reporting relationships and costs of care contribute to our understanding what was missing was an exploration of the lived experience of the nurse practitioner as a means to deepen that understanding as well as our appreciation for their role The Acute Care Nurse Practitioner is based on in depth interviews with twenty six nurse practitioners working in acute care settings within tertiary care institutions all across Canada Employing a hermeneutic approach Rashotte explores the perspectives from which NPs view their reality as they undergo a transformational journey of becoming a journey that is directed both outward into the world

and inward into the self We learn how in their struggle to engage in a meaningful practice that fulfills their goals as nurses their purpose was hindered or achieved In large part the story unfolds in the voices of the NPs themselves but their words are complemented by descriptive passages and excerpts of poetry that construct an animated and powerful commentary on their journey Poised between two worlds NPs make a significant contribution to the work of their colleagues and to the care of patients and families The Acute Care Nurse Practitioner offers an experiential alternative to conventional discourse surrounding this health care provider s role
