Nurses Work The Sacred And The Profane:

Nurses' Work Zane Robinson Wolf, 1988 Based on a doctoral dissertation Nursing rituals in an adult acute care hospital and ethnography Preface *A Contemporary Nursing Process* Rozzano C. Locsin, Marguerite Purnell, Marguerite J. Purnell, 2009-04-10 This book speaks against thinking that we can only understand nursing from a traditional logical empirical approach suggesting we need a contemporary process for exploring nursing I can't agree more Journal of Christian Nursing Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens Challenging the structure of the traditional nursing process the book considers nursing as reflective and thoughtful Doody's *A Contemporary Nursing Process* re-envision the practice of nursing by configuring caring in terms of the person the nurse cares for Locsin and Purnell stress the importance of knowing the patient and differentiating the person from the disease This text addresses this highly relevant issue and provides a wealth of insight on how to care for the patient on a personal level while still professionally administering clinical treatment Chapters discuss How to appreciate persons as participants in their care rather than as objects of care The ideal of care versus the practical demands of care Technological advancements shaping human life and nursing The consequences of not knowing the patient on a personal level **Anthropology of Nursing** Karen Holland, 2019-09-09 This book aims to introduce nurses and other healthcare professionals to how anthropology can help them understand nursing as a profession and as a culture Drawing on key anthropological concepts the book facilitates the understanding and critical consideration of nursing practice as seen across a wide range of health care contexts and which impacts the delivery of appropriate care for service users Considering the fields in which nurses work the book argues that in order for nurses to optimize their roles as deliverers of patient care they must not only engage with the realities of the cultural world of the patient but also that of their own multi-professional cultural environment The only book currently in the field on anthropology of nursing this book will be a valuable resource for nursing students at all academic levels especially where they can pursue specific modules in the subject as well as those other students pursuing medical anthropology courses As well as this it will be an essential text for those postgraduate students who wish to consider alternative world views from anthropology and their application in nursing and healthcare in addition to their undertaking ethnographic research to explore nursing in all its fields of practice **Nursing Power and Social Judgement** Martin Johnson, 2018-08-20 First published in 1997 this work makes a substantial reexamination of the social processes behind the labelling of patients in hospital care Taking an interpretive perspective the author analyzes the social construction of patient labels identifying strategies for and the consequences of giving and receipt of good and bad labels He shows how the rich data of truly participant observation in the tradition of reflexive ethnography can powerfully illuminate the experiences and actions of both patients and their nurses It is a critical analysis of key work in this field Professor Johnson demonstrates the

redundancy of trait theories of social judgment offering a more complex and negotiated reality in which patient labels form a part of a rich web of unequal power relations between nurses and their clients **In the Field** Renee C. Fox, 2017-07-05 *In the Field* by Renee C Fox is a narrative account of the author's life as a sociologist. It is not a memoir in the conventional sense; rather, it is an ethnographic autobiography. Drawing on a vast reservoir of notes and documents that chronicle the span of her career, this work also focuses on the places Fox's field research has carried her. Propelled by a conviction to move beyond the boundaries of herself and of her native land, Fox has done first-hand research in Europe, Central Africa, and China, as well as in the United States. The majority of her research has centered on health, illness, and medicine. Other recurrent themes that pervade her work include training for uncertainty, the allocation of scarce resources, the relationship between self and others, detachment and concern, the particular and the universal, the harm that can result from intended good, and the questions posed by illness and accident, pain and suffering, and death. It is Fox's commitment as a teacher and mentor of generations of students that lies at the heart of this book. This volume will inspire new generations of social researchers.

Communication, Relationships and Care Sheila Barrett, Carol Komaromy, Martin Robb, Anita Rogers, 2004-03-01 Communication and relationships have become an increasing focus of attention in debates about the future of health and social care. People working in care services are being encouraged to improve communication processes to develop more participatory relationships with service users and to work more closely in partnership with other professionals. This Reader provides a comprehensive collection of literature that aims to enable those involved in care services as workers, carers, or service users to reflect on their everyday interactions and to situate them in wider contexts. Including new material from the frontline of research and practice, as well as some classic readings, this wide-ranging volume emphasises the need to see interpersonal communication as embedded in relationships and to take account of issues of power and diversity, as well as the emotional dimension of care work. Covering both health and social care, the Reader is divided into four sections focusing on concepts and contexts, analysing aspects of communication, the person in the process, communication and relationships in organisations. *Communication, Relationships and Care* will be an essential resource for students of social work, nursing, health, and social policy, and for all involved in health and social care services, whether as professionals, carers, or service users. It is a set book for the Open University's second-level undergraduate course *Communication and Relationships in Health and Social Care* K205.
