John Schumacher,Don Melady,2022-02-03 An essential experience based practical guide for anyone looking to improve the care of older patients in the emergency department *Geriatric Emergencies* Amal Mattu,Shamai Grossman,Peter Rosen,Robert Anderson,Christopher R. Carpenter,Andrew Chang,Jon Mark Hirshon,Ula Hwang,Maura Kennedy,Don Melady,Vaishal Tolia,Scott Wilbur,2016-07-12 The elderly represent the fastest growing segment of the population in developed countries reflected in the patient population presenting to EDs and hospitals These patients more often than not have greater co morbidities more complicated workups and utilize more laboratory and radiologic services This text is designed to teach emergency physicians how best to care for this specific demographic of patients It addresses physiologic changes high risk conditions and atypical presentations associated with elderly patients in the ED that result in frequent misdiagnosis or delays in diagnosis It instructs the readers how best to care for elderly patients in order to minimize morbidity and mortality addressing some of the difficult psychosocial issues that confront health care providers that care for elderly patients such as psychiatric disease and end of life care The utility of this text is not limited to emergency physicians but it should be useful to all health care providers involved in the treatment of elderly patients with acute medical or surgical conditions **Geriatric Emergencies** Lee A. Lindquist,Scott M. Dresden,2019-05-15 Care for older adults in Emergency Departments EDs has historically been focused on acute medical conditions with little emphasis on geriatric specific issues In 2010 emergency departments EDs throughout the nation saw almost 130 million patients 15% of whom were 65 or older The number of older adults who visit an ED has doubled in the last decade and continues to grow rapidly Older adults receiving care in an ED are highly likely to be admitted to the hospital much more so than their younger counterparts Preventing a hospital admission saves older adults from frequently encountered adverse events including hospital acquired delirium functional status impairment cognitive loss and nursing home admission It is unknown how many older adults are hospitalized for reasons other than acute medical illness such as functional decline polypharmacy progressive dementia caregiver stress or unstable living situation These non emergent conditions are rarely addressed during a typical ED visit due to lack of resources significant patient volumes and the need for rapid turnover of care spaces The predominant management strategy of emergency physicians to handle these important but not imminently life threatening geriatric issues is to recommend hospital admission Northwestern has pioneered the Geriatric Emergency Department through the creation of the Geriatric Emergency Department Innovation model GEDI with goals to prevent admissions for older adults by assessing and

meeting their geriatric specific non acute care needs in the ED The GEDI model at Northwestern centers on a multi disciplinary curriculum composed of clinical didactic and practical arms developed by emergency medicine and geriatrics educational experts In this title we will present case studies of older adults seen in the Emergency Department through the GEDI model and discuss means of identifying screening for diagnosing and treating geriatric syndromes seen in the emergent care of the older adult patient In addition there will be a set of concise take home points for each case study that will be easy to commit to memory and implement in clinical care of older adults As the number of seniors seeking emergent care will continue to increase the ED setting must become responsive to geriatric specific needs This book will provide a variety of models detailing how to offer comprehensive state of the art optimal care for managing the full range of geriatric syndromes that regularly present in the emergent care setting **Geriatric Emergency Medicine** Christian

Nickel, Abdelouahab Bellou, Simon Conroy, 2017-12-11 This book discusses all important aspects of emergency medicine in older people identifying the particular care needs of this population which all too often remain unmet The up to date and in depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes in conducting appropriate assessment and in providing timely and adequate care Particular attention is paid to the common pitfalls in emergency management and means of avoiding them Between 1980 and 2013 the number of older patients in emergency departments worldwide doubled Compared with younger patients older people suffer from more comorbidities a higher mortality rate require more complex assessment and diagnostic testing and tend to stay longer in the emergency department This book written by internationally recognized experts in emergency medicine and geriatrics not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field *Geriatric Emergency Care, An Issue of Clinics in Geriatric Medicine, E-Book* Maura Kennedy, Shan Liu, 2023-10-06 In this issue of Clinics in Geriatric Medicine guest editors Drs Maura Kennedy and Shan Liu bring their considerable expertise to the topic of Geriatric Emergency Care Top experts in the field cover critical topics or concepts in geriatric emergency medicine and topics for which there is new research including guidance on geriatricizing the ED and ED observation unit caring for persons with dementia and examining the intersection of DEI and care of an aging population Contains 13 relevant practice oriented topics including the aging process physiologic changes and frailty elder abuse and neglect recognition and management in the emergency department best practices in end of life and palliative care in the ED falls and other trauma in the older adult and more Provides in depth clinical reviews on geriatric emergency care offering actionable insights for clinical practice Presents the latest information on this timely focused topic under the leadership of experienced editors in the field Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews **Geriatric Emergency Medicine** Joseph H. Kahn, Brendan G. Magauran (Jr.), Jonathan S. Olshaker, 2014-01-16
