The Action Plan for Australian Mammals 2012 Andrew Burbidge, John Woinarski, Peter Harrison, 2014-06-02 The Action Plan for Australian Mammals 2012 is the first review to assess the conservation status of all Australian mammals It complements The Action Plan for Australian Birds 2010 Garnett et al 2011

CSIRO Publishing and although the number of Australian mammal taxa is marginally fewer than for birds the proportion of endemic extinct and threatened mammal taxa is far greater These authoritative reviews represent an important foundation for understanding the current status fate and future of the nature of Australia This book considers all species and subspecies of Australian mammals including those of external territories and territorial seas For all the mammal taxa about 300 species and subspecies considered Extinct Threatened Near Threatened or Data Deficient the size and trend of their population is presented along with information on geographic range and trend and relevant biological and ecological data The book also presents the current conservation status of each taxon under Australian legislation what additional information is needed for managers and the required management actions Recovery plans where they exist are evaluated The voluntary participation of more than 200 mammal experts has ensured that the conservation status and information are as accurate as possible and allowed considerable unpublished data to be included All accounts include maps based on the latest data from Australian state and territory agencies from published scientific literature and other sources The Action Plan concludes that 29 Australian mammal species have become extinct and 63 species are threatened and require urgent conservation action However it also shows that where guided by sound knowledge management capability and resourcing and longer term commitment there have been some notable conservation success stories and the conservation status of some species has greatly improved over the past few decades The Action Plan for Australian Mammals 2012 makes a major contribution to the conservation of a wonderful legacy that is a significant part of Australia s heritage For such a legacy to endure our society must be more aware of and empathetic with our distinctively Australian environment and particularly its marvellous mammal fauna relevant information must be readily accessible environmental policy and law must be based on sound evidence those with responsibility for environmental management must be aware of what priority actions they should take the urgency for action and consequences of inaction must be clear and the opportunity for hope and success must be recognised It is in this spirit that this account is offered

The Biology and Utilization of Shrubs Cyrus McKell, 2012-12-02 The Biology and Utilization of Shrubs brings together the wide range of information about shrubs from many disciplines and world locations The book is organized into seven parts Part I describes the major shrublands found on each of the vegetated continents It provides an overview of the dominant shrubland types as well as the associated features of soil and climate that influence the geographic distribution of major shrub species Part II discusses environmental influences and plant responses Part III considers the range of genetic diversity for important traits and how these may vary in different habitats Part IV discusses the effects of stress on physiological processes of shrubs and the kinds of strategies shrubs employ to meet physiological stress Part V offers evidence to support the claim that the many virtues of shrubs provide a basis for sustaining shrub use for livestock fodder wildlife habitat reclamation and erosion control fuel and naturalized landscaping Part VI outlines methods for collecting and processing seeds from natural stands or from superior genotypes planted in seed production orchards Part

VII describes cultural adaptation to shrub use in a livestock dominated primitive culture followed by a detailed economic analysis of establishing shrub plantations to improve livestock production Arid Lands Charles Hutchinson,2019-04-23 The international conference Arid Lands Today and Tomorrow drew more than 400 participants from over 30 countries to Tucson Arizona for one week in October of 1985 The diversity of presenters disciplines and subject matters addressed contributed to an interesting and informative conference The papers presented in this volume represent the efforts of scientists and other individuals who through their various disciplines are addressing the problems of and opportunities presented by the arid lands of the world A committee of five scientists reviewed for substance relevance and their contribution to the conference the 284 abstracts that were submitted They selected 146 for presentation at the conference and of those papers presented 128 were received for inclusion in the proceedings *Migrants, Minorities & Health* Lara Marks,Michael Worboys,2002-11-01 How has twentieth century medicine dealt with immigrants and minorities The contributors to *Migrants Minorities and Health* have studied a number of different types of migrant and minority groups from different societies around the world in order to examine the complex relations between health issues and ideas of ethnicity and race The collection explores the historical origins and the contemporary power of stereotypical views of immigrants as importers of disease for instance or of minorities as a source of infection in the host society The authors show how ideas of ethnicity and race have shaped and in turn have been influenced by the construction of medical ideas Challenging our common assumptions about migrants minorities and health this collection brings together new perspectives from a variety of disciplines It will make fascinating reading for social historians medical historians and social policy makers **The Paleoanthropology and Archaeology of Big-Game Hunting** John D. Speth,2010-09-08 Since its inception paleoanthropology has been closely wedded to the idea that big game hunting by our hominin ancestors arose first and foremost as a means for acquiring energy and vital nutrients This assumption has rarely been questioned and seems intuitively obvious meat is a nutrient rich food with the ideal array of amino acids and big animals provide meat in large convenient packages Through new research the author of this volume provides a strong argument that the primary goals of big game hunting were actually social and political increasing hunter's prestige and standing and that the nutritional component was just an added bonus Through a comprehensive interdisciplinary research approach the author examines the historical and current perceptions of protein as an important nutrient source the biological impact of a high protein diet and the evidence of this in the archaeological record and provides a compelling reexamination of this long held conclusion This volume will be of interest to researchers in Archaeology Evolutionary Biology and Paleoanthropology particularly those studying diet and nutrition *Resource Managers: North American And Australian Hunter-Gatherers* Nancy M. Williams,Eugene S. Hunn,2019-07-16 As environmental management becomes of increasing concern to both industrial and developing societies it is instructive to look at the fundamental relationship between man and environment as exemplified by

the hunter gatherer cultures in which resource management was and is vital to the very existence of human life The authors of this book look at hunting and gathering societies in Australia and North America searching for the essential as distinct from local manifestations of human environment relations They examine the availability of resources in relation to the requirements of stable and expanding human populations explore the ontological and structural principles of ecological relations in these societies and describe the rationale of geographic boundaries and control of access to resources within and across boundaries A number of current theoretical issues are addressed the use of fire as a tool for environmental management the ecological consequences of seasonal mobility patterns the functional basis for differing forms of control over resources the social organization of production including the symbolism of the sexual division of labor the tactical exercise of jural rights in the use of resources and the ecological consequences of religious beliefs The book concludes with a summary of the case materials in terms of what they contribute to the understanding of hunting gathering as an economic category and to the conflict over management of natural resources where societies of hunter gatherers are encapsulated within industrial societies

Health of People, Places and Planet Colin D. Butler, Jane Dixon, Anthony G. Capon, 2015-07-31 This book has three main goals The first is to celebrate the work of a great public health figure the late A J Tony McMichael 1942 2014 The second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment human institutions and behaviours a broad approach championed by Tony The third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health from a foundation of objective scholarship The book s foreword and 38 chapters were written by people who were inspired by Tony many of whom worked with him at some point in the last 40 years Its structure reflects five major public health domains each of which Tony made major contributions to in an extremely productive academic life occupational health and safety environmental and social epidemiology nutrition and food systems climate change and health and ecosystem change and infectious disease The final section Transformation is dedicated to Tony s desire for public health scientists to propose adaptive and mitigating solutions to the problems they were observing Each section contains at least one key publication involving Tony There is also a selection of artworks from an exhibition which formed part of the conference held to honour Tony at The Australian National University in 2012 This conference formed the first part of Tony s festschrift completed by this book
