auto translation book demonstrates a time series of nutrition improvement in Japan since the introduction of nutrition
sciences to Japan about 150 years ago The chapters present the historical event where nutritional deficiency due to food
shortage was improved in almost a century by the introduction of nutrition policy and practices such as the Nutrition
Improvement Law The book contributed to the construction of a longevity nation by resolving the double burden of
malnutrition which is a mixture of undernutrition and overnutrition and creating a social environment in which sustainable
healthy diets can be accessed This publication is designed mainly for nutrition specialists nutritionists nutrition
administrators medical doctors pharmacists nurses physiotherapists nutrition educators cooks nutrition volunteers health
and nutrition food developers school lunch managers and etc Furthermore students studying nutrition teachers involved in
the education and training of dietitians and general consumers who are interested in nutrition diets and how to improve
malnutrition will find this book useful Through this book dietitians nutrition volunteers and consumers engaged in nutrition
improvement can understand the significance of nutrition improvement and know specific methods Young nutritionists who
will study and research nutrition can learn the importance of nutrition and take pride in nutrition research The government
official who implements nutrition policy can know the concrete method of nutrition policy Today people around the world
understand the importance of nutrition and are gaining international interest However malnutrition has not improved as
much as expected This book is an interesting way for everyone involved in nutrition to learn how to eradicate malnutrition
from the world The translation was done with the help of artificial intelligence machine translation by the service DeepL com
