Nutritional Strategies for the Very Low

Birthweight Infant David H. Adamkin, 2009-08-27 The goal of nutritional management in VLBW and ELBW infants is the achievement of postnatal growth at a rate that approximates the intrauterine growth of a normal fetus at the same postconceptional age In reality however growth lags considerably after birth although non nutritional factors are involved nutrient deficiencies are critical in explaining delayed growth This practical clinically oriented pocketbook reviews and summarises all available clinical evidence It enables the reader to implement parenteral or enteral feeding plans with the goals of reducing postnatal weight loss earlier return to birthweight and improved catch up growth Both nutrient balance and growth and the impact on neurodevelopment and health outcomes are evaluated With many tables and algorithms to summarise key data and management strategies *Nutritional Strategies for the Very Low Birthweight Infant* is an invaluable guide for all healthcare professionals caring for premature babies

Nutritional Care of Preterm Infants B. Koletzko, B. Poindexter, R. Uauy, 2014-04-11 Improved conditions of care for premature infants have led to markedly increased survival rates over the last few decades particularly in very low and extremely low birth weight infants Nutritional measures play a central role in the long term outcome health and quality of life of these premature infants In this publication leading experts from all 5 continents present the most recent evidence and critical analyses of nutrient requirements and the practice of nutritional care with the focus on very low birth weight infants to provide guidance for clinical application After the introductory chapters covering nutritional needs and research evidence in a more general manner topics such as amino acids and proteins lipids microminerals and vitamins parenteral and enteral nutrition as well as approaches to various disease conditions are addressed Due to its focus on critical appraisals and recommendations this book is of interest not only for the researcher who wants to keep up to date but also for the clinician faced with premature infants in his practice

Primary Care of the Premature Infant Dara Brodsky, Mary Ann Ouellette, 2008-01-01 Our understanding of the management of diseases in the premature infant has changed dramatically in recent years and it can be quite difficult to remain up to date on changes in this highly scientific field Dr Brodsky and Ms Ouellette have worked together to create a comprehensive reference that covers both the pathophysiology and epidemiology of problems occurring in premature babies in the Neonatal Intensive Care Unit and the management of these problems once the infant has been released from the NICU to a community practice The book emphasizes specific diseases that affect premature infants and focuses on two primary categories background and management in the NICU and management of specific illnesses after discharge from the NICU Find information quickly using an up to date summary of the problems that are likely to affect the premature infant Review helpful guidelines on feeding and growth neurologic outcomes developmental problems retinopathy of prematurity bronchopulmonary dysplasia and much more Use easy to follow management algorithms to help diagnose and manage common issues in premature infants after discharge Make effective decisions about screening immunizations counseling of parents and more Help families deal with the emotional impact of caring for a premature infant Access a list of disease
