Christopher Isett, Stephen Miller

Origins Of Agriculture In Europe:

The Origins of Agriculture in Europe I. J. Thorpe, 1996 This study takes a look at current ideas on the development of the farming economy and is an extremely valuable resource for students of European prehistory

The Origins of Agriculture in Europe I. J. Thorpe, 2003-09-02 The Origins of Agriculture in Europe takes a look at current ideas in the light of a considerable mass of literature and archaeological evidence examining the transition to agriculture through the comparison of social and economic developments across Europe In this volume I J Thorpe manages to evaluate various alternative explanations in detailed examples whilst also succeeding in addressing the broader theoretical questions which form the nucleus of contemporary debates This clearly written and accessible text is an extremely valuable resource for students of European prehistory

A History of Agriculture in Europe and America Norman Scott Brien Gras, 1925 *The Origins of Agriculture* C. Wesley Cowan, Nancy L. Benco, Patty Jo Watson, 2006-05-18 The eight case studies in this book each a synthesis of available knowledge about the origins of agriculture in a specific region of the globe enable scholars in diverse disciplines to examine humanity's transition to agricultural societies Contributors include Gary W Crawford Robin W Dennell and Jack R Harlan

A History of Agriculture in Europe and America Norman Scott Brien Gras, 1925 A History of Agriculture in Europe and America Norman Scott Brien Gras, 1940 The Origins And Spread Of Agriculture And Pastoralism In Eurasia David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization

Early European Agriculture British Academy. Major Research Project in the Early History of Agriculture, 1982-10-28 First printed in 1982 this is the third and final volume to be published as a result of the British Academy Major Research

Project on the Early History of Agriculture carried out in the Department of Archaeology in Cambridge under the direction of the late Eric Higgs After his death in 1976 the Project was drawn to its conclusion by his associates and this book is effectively a summary of the results of the Project The first two volumes Papers in Economic Prehistory and Palaeoeconomy argued that the development of agriculture was a much more gradual and widespread phenomenon than had been thought previously This book now discusses the origins and early development of prehistoric agriculture within the framework of prehistoric subsistence economies in general Early human economies are viewed in their adaptation to three crucial resource zones the uplands the lowlands and the littorals **Encyclopedia of Environmental Change** John A Matthews, 2013-12-13

Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Land use change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences **Northern Europe** Tamara L. Whitfield, Jens Ivo Engels, Richard C. Hoffmann, Hilde Ibsen, Wybren Verstegen, 2005-08-19 A fascinating handbook providing a rare synthesis of the environmental history of northern Europe from the Paleolithic era to the present day Of interest to students and academics alike this book provides a much needed synthesis of the recent literature on northern Europe s environmental history Beginning with the Paleolithic period and the recolonization of Europe after the Ice Age this book maps out the key environmental trends in the history of the region s environment and its interaction with the human population The book also highlights how dramatic events outside Europe such as the Tambora volcanic eruption in Indonesia in 1815 had dramatic consequences for the region s climate Given the culturally diverse nature of modern Europe a vital aspect of the book is its identification of the common themes that unite the interaction of the region s nation states with the

natural environment Part of ABC CLIO's Nature and Human Societies series the book enables readers to better grasp the extent of humanity's effect on our world **The Western European Loess Belt** Corrie C. Bakels, 2009-07-29 This book deals with the early history of agriculture in a defined part of Western Europe the loess belt west of the river Rhine It is a well illustrated book that integrates existing and new information starting with the first farmers and ending when food production was no longer the chief source of livelihood for the entire population The loess belt was chosen because it is a region with only one type of soil and climate as these are all important factors where farming is concerned Subjects covered are crops crop cultivation livestock and livestock handling the farm and its yard and the farm in connection with other farms Crop plants and animals are described together with their origin New tools such as the plough wheen wagon and scythe are introduced Groundplans of farm buildings the history of the outhouse and the presence or absence of hamlets are presented as well and the impact of farming on the landscape is not forgotten The loess belt was not an island and the world beyond its boundaries was important for new ideas new materials and new people Summarising six millennia of agriculture the thinking in terms of the Western European loess belt as one agricultural cultural unit seems justified **The Origins and Spread of Domestic Plants in Southwest Asia and Europe** Sue Colledge, James Conolly, 2016-06-16 Leading scholars demonstrate the importance of archaeobotanical evidence in the understanding of the spread of agriculture in southwest Asia and Europe

Deforesting the Earth Michael Williams, 2003 Clearing in the deep past Reaching out Europe and the wider world The global forest **The Social History of Agriculture** Christopher Isett, Stephen Miller, 2016-11-09 This innovative text provides a compelling narrative world history through the lens of food and farmers Tracing the history of agriculture from earliest times to the present Christopher Isett and Stephen Miller argue that people rather than markets have been the primary agents of agricultural change Exploring the actions taken by individuals and groups over time and analyzing their activities in the wider contexts of markets states wars the environment population increase and similar factors the authors emphasize how larger social and political forces inform decisions and lead to different technological outcomes Both farmers and elites responded in ways that impeded economic development Farmers when able to trade with towns used the revenue to gain more land and security Elites used commercial opportunities to accumulate military power and slaves The book explores these tendencies through rich case studies of ancient China precolonial South America early modern France England and Japan New World slavery colonial Taiwan socialist Cuba and many other periods and places Readers will understand how the promises and problems of contemporary agriculture are not simply technologically derived but are the outcomes of decisions and choices people have made and continue to make World Prehistory Brian M. Fagan, Nadia Durrani, 2016-04-01 For one semester or quarter courses in World Prehistory Written by one of the leading archaeological writers in the world in a simple jargon free narrative style this brief well illustrated account of the major developments in the human past makes world prehistory uniquely accessible to complete beginners Written by Brian Fagan World Prehistory

covers the entire world not just the Americas or Europe and places major emphasis on both theories and the latest archaeological and multidisciplinary approaches His focus is on four major developments in world prehistory 1 The origins of humanity 2 The appearance and spread of modern humans before and during the late Ice Age including the first settlement of the Americas 3 The beginnings of food production 4 The rise of the first civilizations **A Concise Economic History of the World** Rondo E. Cameron,1993 This classic book offers a broad sweep of economic history from prehistoric times to the present and explores the disparity of wealth among nations Now in its fourth edition A Concise Economic History of the World includes expanded coverage of recent developments in the European Union transition economies and East Asia

Europe's First Farmers T. Douglas Price,2000-09-14 Essays by leading specialists on a central issue of European history the transition to farming The Cambridge World History of Food Kenneth F. Kiple,Kriemhild Coneè Ornelas,2000 A two volume set which traces the history of food and nutrition from the beginning of human life on earth through the present

My European Family Karin Bojs,2017-03-23 The story of Europe and its people told through its genetic legacy An extraordinary book part travel narrative part family history part scientific study Financial Times Karin Bojs grew up in a small broken family At her mother's funeral she felt this more keenly than ever As a science journalist she was eager to learn more about herself her family and the interconnectedness of society After all we're all related And in a sense we are all family My European Family tells the story of Europe and its people through its genetic legacy from the first wave of immigration to the present day weaving in the latest archaeological findings Karin goes deep in search of her genealogy by having her DNA sequenced she was able to trace the path of her ancestors back through the Viking and Bronze ages to the Neolithic and beyond into prehistory even back to a time when Neanderthals ran the European show Travelling to dozens of countries to follow the story she learns about early farmers in the Middle East and flute playing cavemen in Germany and France along with a whole host of other fascinating characters This book looks at genetics from a uniquely pan European perspective with the author meeting dozens of geneticists historians and archaeologists in the course of her research The genes of this seemingly ordinary modern European woman have a truly fascinating story to tell and in many ways it is the true story of Europe At a time when politics is pushing nations apart this book shows that ultimately our genes will always bind us together Winner of the 2015 Swedish August Prize *The Country Life Bulletin* ,1925
