societies and raises essential questions about the nature of politics and its discontents **Ranking and Resistance** Richard G. Dillon, 1990 Based upon extended anthropological fieldwork and ethnohistorical reconstruction this is a study of the precolonial political system of an acephalous society in West Africa The Meta are a sedentary farming people living in what is now the Republic of Cameroon In the precolonial era the Meta had created a polity that was remarkable for its size its relative peacefulness and the effectiveness of its dispute settlement procedures Located on the fringes of a regional trading network dominated by several strong chiefdoms the Meta polity was also notable for the degree to which ranking had developed in what remained an uncentralized political system A wide range of data including in depth interviews about Meta political concepts remembered case histories of conflict and competition and information on the broader regional network are used to illuminate both the internal dynamics of the Meta polity and the influence of the regional system upon it The author pays particular attention to ranking the impact of trade upon political organization and the development of a consensual polity wide system of conflict resolution *African Political Systems Revisited* Aleksandar Bošković, Günther Schlee, 2022-04-08 Reexamining a classical work of social anthropology *African Political Systems* 1940 edited by Fortes and Evans Pritchard this book looks at the colonial and academic context from which the work arose as well as its reception and its subject matter and looks at how the work can help with analysis of current politics in Africa This book critically reflects upon the history of anthropology It also contributes to a political anthropology which is aware of its antecedents self reflexive as a discipline conscious of pitfalls and biases and able to locate itself in its academic social and political environment

The State and the Tributary Mode of Production John F. Haldon, 1993 In this groundbreaking critique of both traditional and Marxist notions of feudalism and of the pre capitalist state John Haldon considers the configuration of state and social relations in medieval Europe and Mughal India as well as in Byzantium and the Ottoman Empire He argues that a Marxist reading of the pre capitalist state can take account of the autonomy of power relations and avoid economic reductionism while still focusing on the forms of tribute which sustained the ruling power Haldon explores the conflicts to which these gave rise and shows the Ottoman state elite often held to be a clear example of independence from underlying social relations to be deeply enmeshed in economic relationships and the extraction of tribute Haldon argues that feudalism was the specifically European form of a much more widely diffused tributary mode whose characteristic social relations and structural constraints can be seen at work in the Byzantine Ottoman and Mughal empires as well While acknowledging the range of ideological and cultural variation within and between these examples of the tributary mode Haldon denies the thesis that such superstructural variations themselves yielded fundamentally contrasting social relations *Kingship and State Formation in Sweden* Philip Line, 2007 This book is the first treatment in English of the medieval Swedish kingdom in its formative period the twelfth and thirteenth centuries It provides an overview of Scandinavian research on the subject and an analysis of all aspects of kingship and government **State Formation and the Structure of Politics in Mamluk**

Syro-Egypt, 648-741 A.H./1250-1340 C.E. Winslow Williams Clifford, 2013 Winslow Williams Clifford is one of the few historians so far who have addressed the history and culture of the so called Mamluk Sultanate 1250-1517 on the basis of theoretical models. This volume is a posthumous publication of his doctoral thesis submitted in 1995 at the University of Chicago. Through his skillful application of social theory Clifford succeeded in providing highly convincing evidence that the Mamluk rulers did not as was maintained for a long time constitute a static form of oriental despotism but was rather a highly differentiated society. It was primarily based on compliance with a complex system of order that had established itself during the rule of the first sultans.

Sociological Worlds Stephen K. Sanderson, 2013-10-31 This reissue of the now classic *Sociological Worlds* originally published in 1995 attempts to present a comprehensive picture of human social life from the perspective of the comparative historical revolution in sociology and presents some of the best theoretical and empirical work that is now being done by comparative historical sociologists as well as work by their close cousins socio cultural anthropologists. From this perspective readers gain a picture of the major ways in which human societies differ. For this new library edition Professor Sanderson has provided both a new preface and three contributions that did not appear in the original edition.

[The History of Ancient Palestine](#) Gösta Werner Ahlström, 1993 In this magisterial work the history of the peoples of Palestine from the earliest times to Alexander's conquest is thoroughly sifted and interpreted. All available source material textual epigraphic and archeological is considered and the approach taken aims at a dispassionate reconstruction of the major epochs and events by the analysis of social political military and economic phenomena. The book chronologically structured is indispensable for the study of the Hebrew Bible and of the ancient Near East.

Peer Polity Interaction and Socio-political Change Colin Renfrew, John F. Cherry, 1986-05-29 Thirteen leading archaeologists have contributed to this innovative study of the socio political processes notably imitation competition warfare and the exchange of material goods and information that can be observed within early complex societies particularly those just emerging into statehood. The common aim is to explain the remarkable formal similarities that exist between institutions ideologies and material remains in a variety of cultures characterised by independent political centres yet to be brought under the control of a single unified jurisdiction. A major statement of the conceptual approach is followed by ten case studies from a wide variety of times and places including Minoan Crete early historic Greece and Japan the classic Maya the American Mid west in the Hopewellian period Europe in the Early Bronze Age and Early Iron Age and the British Isles in the late Neolithic.

Collective Action in the Formation of Pre-Modern States Richard Blanton, Lane Fargher, 2008 Anthropological archaeology and other disciplines concerned with the formation of early complex societies are undergoing a theoretical shift. Given the need for new directions in theory the book proposes that anthropologists look to political science especially the rational choice theory of collective action. The authors subject collective action theory to a methodologically rigorous evaluation using systematic cross cultural analysis based on a world wide sample of societies.

C. Chirichigno,1993-06-01 This original study concerns itself with the manumission laws of Exodus 20 Deuteronomy 15 and Leviticus 25 It begins with the social background to debt slavery and the socioeconomic factors encouraging the rise of debt slavery in Mesopotamia After a comparative analysis of the Mesopotamian and biblical material Chirichigno examines the social background to debt slavery in Israel the various slave laws in the Pentateuch in order to delimit the chattel slave laws from the debt slave laws and the biblical manumission laws themselves Globalization in Crisis Barry K. Gills,2013-09-13 This book analyses the present global financial and economic crisis the most severe in nearly a century and a wider set of multiple and converging crises with aspects and repercussions that go well beyond the current economic climate Written by some of the world s leading international scholars in the field of Globalization studies and related disciplines this important collection addresses numerous key aspects of the relationship between Globalization and global crises past present and future It sheds new light and understanding on the concept and theory of Globalization and of crisis The authors explore such issues as global finance and financial regulation neoliberal ideology and policy the crisis of globalization the decline of Western hegemony world systemic crisis the moral crisis of Western capitalism environmental and climate change crises world order hyper violence and the international system a crisis of the global modern and a global civilisational and hostpric crisis the rise of the global South the historical dialectics of capital and social responses to crisis the future of capitalism and the prospects for transformative alternatives This book was published as a special issue of Globalizations Managing Intercollective Conflict Anna J. Borgeryd,1999-02 How does the state system measure up to today s realitites when it comes to managing conflict To what extent are efforts to manage conflict successful and for whom Prevailing structures designed to deal with conflict between collectives sovereign states supported by militaries military industry and the United Nations operate mainly on principles that are hundreds of years old Conditions for conflict and its management have changed radically since this state system was constructed There is a risk that institutional inertia produces growing disparity between real world problems and the institutions that are supposed to manage them Realism and legalism are found to form a double ideological support for the state system The study compares the state system s realist and legalist premises to different cases of post cold war intercollective conflict the 1990 91 Gulf War the 1990 95 break up of Yugoslavia and the 1992 Los Angeles riots These cases present important challenges to the pravailing system s premises mismatches between idea and reality that are clearly connected to failures in conflict management In addition findings suggest that the state system not only fails to deal with important aspects of modern day conflict but that it increasingly produces problems that it cannot manage This suggests that the prevailing state system is not in harmony with crucial conflict related aspects of global impact indicating a serious systemic problem *State Building and Development* Arta Ante,2010 In the case of Kosovo in addition to the examination of the structures this study examines the role of actors participating in these processes local and international actors and their potential alliances coalitions and conflicts Beyond these concerns the aspect of security especially the rule of

law is to be considered as the main precondition for undertaking any action in the aforementioned domains From the theoretical methodical perspective this work falls under the category of Policy Analysis

The Origins Of Western Warfare Doyne Dawson, James D Dawson, 2018-02-02 What is the source of the uniquely Western way of war the persistent militarism that has made Europe the site of bloodshed throughout history and secured the dominance of the West over the rest of the world The answer Doyne Dawson persuasively argues in this groundbreaking new book is to be found in the very bedrock of Western civilization ancient Greece and Rome The Origins of Western Warfare begins with an overview of primitive warfare showing how the main motivations of prehistoric combat revenge and honor set the tone for Greek thinking about questions of war and morality These ideas especially as later developed by the Romans ensured the emergence of a distinctive Western tradition of warfare dynamic aggressive and devastatingly successful when turned against non Western cultures Dawson identifies key factors that led Western culture down this particular path First the Greeks argued that war could be justified as an instrument of human and divine justice securing the social and cosmic order Second war was seen as a rational instrument of foreign policy This probably the most original contribution of the Greeks to military thought was articulated as early as the fifth century b c Finally Greek military thought was dominated by the principle of civic militarism in which the ideal state is based upon self governing citizens trained and armed for war The Roman version of civic militarism became thoroughly imperial in spirit and in general the Romans successfully modified these Greek ideas to serve their expansionist policies At the end of antiquity these traditions were passed on to medieval Europe forming the basis for the just war doctrines of the Church Later in early modern Europe they were fully revived systematized and given a basis in natural law to the benefit of absolute monarchs For centuries this neoclassical synthesis served the needs of European elites and echoes of it are still heard in contemporary justifications for war Providing a careful reconsideration of what the classical sources tell us about Western thinking on fundamental questions of war and peace The

Origins of Western Warfare makes a lasting contribution to our understanding of one of the most persistent and troubling aspects of Western culture
