**Stargazing** Mike D. Reynolds,Michael D. Reynolds,2005-10-25 Many Stargazers Assume They Must Invest Hundreds or even thousands of dollars in equipment before they can enjoy the wonders of the night sky The truth is though that all you need is a simple pair of binoculars This handy guide explains how to choose binoculars and use them to observe everything from comets to solar eclipses Ideal for amateur astronomers of all ages Binocular Stargazing is the perfect way to see the night sky through new eyes Cosmos John R. Gribbin,1997 Stephen Hawking John Gribbin,2016-01-15 Stephen Hawking is

no ordinary scientist Perhaps more than any other scientist he has broadened our basic understanding of the universe His theoretical work on black holes and the origins and nature of the cosmos have been groundbreaking if not downright revolutionary He has also spent much of his adult life confined to a wheelchair a victim of ALS But his physical limitations have done nothing to confine him intellectually or hinder his scientific development Hawking would already be remarkable for his cutting edge work in theoretical physics alone However he has also managed to popularize science unlike any one else

Today he is a household name and achieved almost cult like fame with the release of *A Brief History of Time*. Although this book is steeped in the complexities of cosmology millions of people were eager to learn just some of what he had to offer. Science writers White and Gribbin have painted a compelling portrait of a scientific mind that seemingly knows no bounds. Weaving together clear explanations of Hawking's science with a detailed balanced and sensitive personal history we come to know and appreciate both sides of this incredible man. Includes new updates in Hawking's biography and the recent discovery of the Higgs Boson or God particle.
