**Fodor's Great Britain 2005** Fodor's, 2004-10 A guide to Great Britain including England Wales and Scotland with a chapter on London      **Annual Report and Accounts** Great Britain. Ordnance Survey, 2004      *Communities and Technologies 2005* Peter van den Besselaar, Giorgio de Michelis, Jenny Preece, Carla Simone, 2005-06-06 This book includes 23 papers dealing with the impact of modern information and communication technologies that support a wide variety of communities local communities virtual communities and communities of practice such as knowledge communities and scientific communities The volume is the result of the second multidisciplinary Communities and Technologies Conference a major event in this emerging research field The various chapters discuss how communities are affected by technologies and how understanding of the way that communities function can be used in improving information systems design This state of the art overview will be of interest to computer and information scientists social scientists and practitioners alike      **World Mapping Today** Bob Parry, Chris Perkins, 2011-12-22 No detailed description available for World Mapping Today      The Map Book Peter Barber, 2005-01-01 Chronicles the historical development of maps and mapping from the Bronze Age to the present collecting some 175 maps spanning ten millennia that represent the progress of civilization and technology from military plans that depict enemy positions to the famed London Underground layout to the digitally enhanced renderings of today      *Walk Britain 2006* Ramblers' Association, 2005-12 This text provides a useful information resource for walkers providing details of over 2000 places to stay in beautiful walking country Full colour maps featuring long distance paths are included      **Derelict Stone Buildings of the Black Mountains Massif** Christopher George Leslie Hodges, 2015-07-31 This study provides evidence of a widespread settlement pattern that existed in an upland area of the Eastern Massif of the Black Mountains in South East Wales now sparsely populated and that they can be dated from the late medieval and early post medieval periods respectively      *The UK* Peter Webber, 1998 Resulting from research into the needs of teachers arising from the revised syllabuses for GCSE Geography and focusing on topical issues throughout the UK this is one of a three book series of supplementary topic books providing a range of detailed case studies enquiries and decision making exercises The other two pupils books cover Europe and the world respectively and there are teacher resource packs which correspond to all three      Hillforts: Britain, Ireland and the Nearer Continent Gary Lock, Ian Ralston, 2019-06-27 The Atlas of Hillforts of Britain and Ireland project 2012 2016 compiled a massive database on hillforts by a team drawn from the Universities of Oxford Edinburgh and Cork This volume outlines the history of the project offers preliminary assessments of the online digital Atlas and presents initial research studies using Atlas data      *Representing, Modeling, and Visualizing the Natural Environment* Nick Mount, Gemma Harvey, Paul Aplin, Gary Priestnall, 2008-12-22 The explosion of public interest in the natural environment can to a large extent be attributed to greater public awareness of the impacts of global warming and climate change This has led to increased research interest and funding directed at studies of issues affecting sensitive natural

environments Not surprisingly much of this work has re **The Peatlands of Britain and Ireland** Clifton Bain,2022-02-02 Clifton Bain now completes his trilogy with this look at the Peatlands of Britain and Ireland A source of fuel for many generations they are now a haven for wildlife and plants as well as a storehouse of greenhouse gasses Their social history is one of exploitation and the value of mending and restoring is a major theme of the book Like its predecessors *The Peatlands of Britain and Ireland* will be a sumptuous volume richly illustrated with photographs and with drawings by the wildlife artist Darren Rees *The Rough Guide to Wales* Paul Whitfield,Catherine Le Nevez,Mike Parker,2012-01-01 Suggests lodging food and sightseeing highlights along with travel tips and cultural information *The Right of Access to Open Countryside* Great Britain: National Audit Office,2006-06-09 Introduced under the Countryside and Rights of Way Act 2000 the new right of access commonly known as the right to roam was phased in between September 2004 and October 2005 giving walkers the right to walk on large areas of the English countryside without having to keep to specified paths 865 000 hectares of land around 6.5 per cent of all land in England is in practice open to the public and of this 733 000 hectares is land to which no right of access previously existed The NAO report finds that the right to roam was successfully introduced by the Countryside Agency in conjunction with Defra two months ahead of target with easy access to over 90 per cent of the sites tested There were initial problems with the countryside access website established to provide public information about the scheme relating to the quality of online maps of access land and to the search function but these had begun to improve by April 2006 The cost of implementing the open access programme was almost double the original estimate largely due to a failure to pilot test the implementation of the scheme and a lack of adequate project management In total the cost of implementation is estimated to be 69 million and ongoing running costs are expected to be around 13 million in 2006/07 Although the benefits of the scheme cannot be easily quantified in financial terms the NAO's initial assessment of the new right of access finds that it passed the key test of whether walkers can use it Recommendations made include that in order to improve public transport facilities to enable people on low incomes and from urban areas to have more opportunities to use their new right of access the Agency should explore with local councils the cost effectiveness of diverting weekend bus services past open access land

Making One's Way in the World Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of

communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life
