Core Values in American Life Arthur Neal,2017-09-29 What values do Americans hold dear What happens when real world situations cause those values to conflict To better understand the intellectual map of how American society works Arthur G Neal and Helen Youngelson Neal analyze values prominent in American word and deed These values appear in our nation s formal documents rights and privileges prominently emphasized in the US Constitution and inscribed on the Statue of Liberty They have shaped the historical destiny and indeed include those values most extensively propagated by the general population Using these criteria the authors identify individualism the pursuit of happiness freedom consumerism materialism equality of opportunity technology mastery of the environment quality of marriage and national unity as the core American values Core values provide the raw materials for the construction of contemporary society as a moral community wherever that community is located Such values are clusters of ideas that are central to self identities they generate a sense of collective belonging and membership As such core values define the existing social order and advance a set of ideas for depicting a desirable future The analysis presented here helps us understand contemporary conflicts inherent in the American value system and the problems confronted by Americans as they try to live within the limitations and contradictions of value systems The Color of COVID-19 Sharon A. Navarro,Samantha L. Hernandez,2022-06-16 The COVID 19 pandemic has disproportionately affected communities of color while highlighting the prevalence of structural racism in the United States This crucial collection of essays written by leading scholars from the fields of communications political science health philosophy and geography explores the manifold ways in which the COVID 19 pandemic has impacted upon Black Latinx and Indigenous communities and the way we see race relations in the United States The COVID 19 pandemic has exposed the

significance of U S health inequalities which the World Health Organization defines as avoidable and unfair It has also highlighted structural racism specifically institutions practices values customs and policies that differentially allocate resources and opportunities so as to increase inequity among racial groups Navarro and Hernandez therefore argue that the COVID 19 pandemic has unleashed a race war in America that has further marginalized communities of color by limiting access to resources by different racial and ethnic minorities particularly women within these communities Moreover the systemic policies of the past that upheld or failed to address the unequal social conditions affecting Blacks Latinxs and other minorities have now been magnified with COVID 19 The volume concludes by offering recommendations to prevent future humanitarian crises from exacerbating racial divisions and having a disproportionate impact upon ethnic minorities This timely volume will be of great interest to those interested in the study of race and the social impacts of the COVID 19 pandemic in the United States **The Quality of American Life** Angus Campbell, Philip E. Converse, Willard L.

Rodgers, 1976-03-25 Considers how Americans define the quality of their life experiences as expressed in their perceptions evaluations and satisfactions Based on research conducted by the Institute for Social Research at the University of Michigan the book uses data which are representative of the national population eighteen years of age and older and employs the major social characteristics of class age education and income The authors cover such topics as the residential environment the experience of work marriage and family life and personal resources and competence They also report on the situation of women and the quality of the life experience of black people *American Anti-Nuclear Activism, 1975-1990* K.

Harvey, 2014-10-28 Looking at national peace organizations alongside lesser known protest collectives this book argues that anti nuclear activists encountered familiar challenges common to other social movements of the late twentieth century

Life, 1915 *Civil Repair* Jeffrey C. Alexander, 2024-10-25 This book challenges the pessimism that has so marked and impoverished social theorizing about modern life Modernity has often been dark and debilitating but it has also generated hope for a better life and extraordinary reforms and liberations from the creation of hopeful democracies in the face of dangerous dictatorships to feminist transformations of patriarchy struggles against imperialism and racial domination and the stubborn but persistent reconstruction of pivotal institutions Jeffrey Alexander theorizes these radical reforms as civil repairs as efforts to make real the utopian promises of the civil sphere Ideal civil spheres make stirring commitments to social solidarity equality and individual autonomy Real civil spheres are rent by anti civil hierarchies of class gender race and religion Contradictions between real and ideal civil spheres generate social movements for justice which are not only about challenging power but making new and more solidarizing meanings Civil repair is at once symbolic and institutional It offers a new way to conceptualize progressive social change
