**Societies and Military Power** Stephen Peter Rosen, 2019-05-15 A work with broad implications for theories of comparative strategic behavior and civil military relations *Societies and Military Power* uses the long history of the armies of India as a basis for analyzing whether the character of a given society affects the amount of military power that can be generated by the armies that emerge from that society By examining the changing relationship between ruling elites in the Indian subcontinent and their armed forces the book shows that divisions within society are mirrored within the military even within the contemporary professional military Stephen Peter Rosen explores the proposition that cultural explanations don't sufficiently account for changes in military power whereas social structure does He suggests also that the dynamics of civil military relations in a non Western setting are not explicable without social structural insight He concludes that the comparative study of strategic behavior and military organization has lacked a sound foundation which the social structural explanation offered in this book begins to provide

*The Internet, Power and Society* Marcus Leaning, 2009-08-30 An exciting challenge to how the internet and ICT have been understood in academia and popular culture and shows how important cultural assumptions are in how we understand technology *The Internet Power and Society* argues that the way in which we view technology such as the internet owes much to older historic views of the media and to issues in contemporary society Such perspectives are deeply rooted in a Western view of technology and the book concludes by offering a radically new perspective as to how the internet can change a society that is truly global in its application An original approach to ICT and the Internet that challenges the orthodoxy Very topical subject matter the book addresses many of the issues regarded of key import in high level political discussions such as the World Summit on the Information Society the current understanding of ICT and how to move beyond this interpretation An approach that moves the debate forward and offers a truly global way of understanding the Internet and ICT

*Power and Law in International Society* Mark Klamberg, 2015-04-24 When studying international law there is often a risk of focusing entirely on the content of international rules i.e. regimes and ignoring why these regimes exist and to what extent the rules affect state behavior Similarly international relations studies can focus so much on theories based on the distribution of power among states that it overlooks the existence and relevance of the rules of international law Both approaches hold their dangers The overlooking of international relations risk assuming that states actually follow international law and discounting the specific rules of international law makes it difficult for readers to understand the impact of the rules in more than a superficial manner This book unifies international law and international relations by

exploring how international law and its institutions may be relevant and influence the course of international relations in international trade protection of the environment human rights international criminal justice and the use of force As a study on the intersection of power and law this book will be of great interest and use to scholars and students of international law international relations political science international trade and conflict resolution Environment, Power, and Society for the Twenty-first Century Howard Thomas Odum,2007 Through this method Odum reveals the similarities between human economic and social systems and the ecosystems of the natural world In the process we discover that our survival and prosperity are regulated as much by the laws of energetics as are systems of the physical and chemical world Also includes information on agriculture animals available energy biomass capitalism civilization consumption cycles diversity earth economy ecosystems empower alternative energy environment evolution fossil fuels fuels growth information kinetic energy energy laws matter metabolism microcosm models of energy systems nations nature organic matter organization overgrowth oxygen photosynthesis power production pulses ratios respiration self organization society solar energy storage structure sustainability systems networks transpiration waste work yields etc **Elites and Power in British Society** Philip Stanworth,Anthony Giddens,1974-05-23 Compilation of conference papers on social stratification in the UK with special reference to the ruling class examines the origins of the Elite in the fields of politics civil service education economy the Church etc and gives information on the transmission of wealth between generations and the interconnections between land ownership income and political power etc Diagrams and statistical tables Conference held in Cambridge 1973 mar *Race, Power and Social Segmentation in Colonial Society* Brian L. Tool,Warren J. Samuels,1989-01-01 This volume of selections from the Journal of Economic Issues carries the institutional economics analysis of the acquisition and use of economic power into new and critically significant subject areas law and economics the public control of economic power and international implications of public and private use of power to influence the flow of real income on a global scale Its particular interest is the possession and use of corporate power especially in relation to the state as a representative of society The Power of Civil Society in the Middle East and North Africa Ibrahim Natil,Chiara Pierobon,Lilian Tauber,2019-05-24 This book investigates the power of civil society in the Middle East and North Africa MENA in the context of the post Arab Spring era as well as more long standing challenges and constraints in the region In recent years local civil society actors have faced significant challenges from social conservatism conflict violence and the absence of democracy and exclusive political systems Over the course of the book the authors investigate how the sector has succeeded in achieving its

own objectives despite these shifting conditions the restrictive political environment and the complexity of the socio cultural and economic context Structured around the three themes of peace building development and change the book also addresses challenges faced by civil society organizations linked to ethnic linguistic and cultural diversities as well as religious salient differences that are crucial markers of social and political identity Case studies are drawn from the Palestinian Occupied Territories Jordan Iran Nigeria Niger Egypt and Morocco and particular effort has been made to showcase original research from contributors who are from the region This book will be of particular interest to researchers working on development peace building conflict resolution civil society and politics within the MENA region *Civil Society, Peace, and Power* David Cortright, Melanie Greenberg, Laurel Stone, 2016-10-12 Civil society plays an increasingly powerful role in the global landscape emerging as key actors in preventing and managing conflict and building more peaceful and sustainable societies The multiple case studies featured in this volume illustrate the growth of civil society involvement in national regional and international peacebuilding policy The focus is on multi stakeholder systems based approaches to peacebuilding and human security that involve diverse civil society groups NGOs religious organizations media etc government agencies intergovernmental organizations and security forces This unique comprehensive approach encompasses diverse stakeholders seeking to understand the drivers of conflict and the possibilities for working together to build peace The book illustrates how the involvement of civil society can result in better informed more inclusive more accountable government decision making and more effective peacebuilding policies Importantly a number of the case studies provide a gender perspective on peacebuilding and civil society issues voicing and giving attention to women s perspectives without being focused only on gender issues Further authors from the Global South offer the perspectives of those directly immersed in ongoing struggles for justice and peace *Society, Power, and Land in Northeastern Zimbabwe, ca. 1560–1960* Admire Mseba, 2024-11-12 A little over two decades ago Zimbabwe undertook its Fast Track Land Reform Programme Critics saw it as nothing more than an assault on human and property rights for political expedience by a ruling elite that was fast losing its power In contrast those sympathetic to the land reform program saw it as fundamental to the righting of colonialism s historical wrongs Yet rural displacements at the hands of state actors or of those closely connected to them continue As in the past the continuing land conflicts are mostly understood as the result of the actions of an authoritarian state that exploits its control of land for the political and economic benefit of those who inhabit it These explanations share one thing in common each understands the country s perpetual land questions in terms of the actions or inactions of the colonial or the postcolonial state This book refocuses attention on how regimes of power rooted in kinship gender generation and status have individually and in combination informed access to land in precolonial northeastern Zimbabwe It then examines how these regimes of power interacted with colonial policies to inform the African experience in colonial Zimbabwe Further the book places land and the ability to ensure its fecundity at the center of the making and moderation of precolonial

political power and how this power was impacted by the imposition of colonial rule Tracing the dynamics of land and power from precolonial times together with their entanglement with colonial policies is important for this relationship is almost always neglected by both scholars and policymakers drawn to the high drama of colonial and postcolonial politics of land This oversight has real consequences on our understandings of landed inequalities and how they are addressed When Zimbabwe's postcolonial state focused on colonially induced racialized land inequalities its land reform efforts left older forms of landed inequalities based on gender generation and ideas of belonging intact The book which details these inequalities reminds Zimbabweans and others that if the quest for equity espoused in postcolonial land reforms is to be meaningful it must be attentive to both colonially induced inequalities and those enduring disparities that predated were deepened by and outlived colonial rule At the same time Zimbabweans who now live with a postcolonial state that is increasingly centralizing power over land may well learn from past societies creative efforts to limit the authority of their leaders **POWER SOCIETY AND RELIGION** Rafiq Y. Aliyev, 2013-02-27 The book is dedicated to very urgent and important issue of today relationship of power society and religion Following his five year work experience as chairman of the State Committee of the Republic of Azerbaijan for the Work with Religious Associations the author tries to argue the view that these three vital components of public life not only interact but they are also interdependent and intercorporated The author thinks that their deep laid relations represent logical bases in maintenance of the balance of power in society as whole **The United States and Great Power Responsibility in International Society** Wali Aslam, 2013-07-24 This book evaluates American foreign policy actions from the perspective of great power responsibility with three case studies Operation Iraqi Freedom American drone strikes in Pakistan and the post 9 11 practice of extraordinary rendition This book argues that the US invasion of Iraq in 2003 American drone attacks in Pakistan and the practice of extraordinary rendition are the examples of irresponsible actions undertaken by the U S acting as a great power in international society Focusing on a major theoretical approach of International Relations the English School this book considers the responsibilities of great powers in international society It points to three obligations of great powers to act according to the norm of legality to act according to the norm of legitimacy and to adhere to the principles of prudence The author applies the criteria of legality legitimacy and prudence to analyse the three foreign policy endeavours of the U S and developing a normative framework clarifies the implications for future U S foreign policy This book will be of strong interest to students and scholars of international relations international relations theory American politics foreign policy studies international law South Asian studies and Middle Eastern studies **Reports of the Chief Registrar of Friendly Societies, for the Year Ending** Registry of Friendly Societies (Great Britain), 1918 *Journal of the Engineers' Club of Philadelphia and Affiliated Societies*, 1916 *The Law Reports*, 1896 **Ideal Power**, 1911 **Journal of the Medical Society of New Jersey** Medical Society of New Jersey, 1922 Includes the society's Annual reports **Report to the Board of Agriculture and Fisheries of an Enquiry Into Agricultural Credit and**
