The Power of Human Rights Thomas Risse, Stephen C. Power, Patronage and International Norms Valerie Freeland, 2024-06-30 Argues that some of the least powerful countries masquerade as rights promoters paradoxically concealing the rights violating effects of their patronage rule

The Promise and Perils of Transnationalization Benjamin Stachursky, 2013 To date most constructivist international relations studies have characterized the influence of transnationalism on domestic forms of activism as uniformly positive In particular transnational interactions are viewed as positive factors for the development and daily impact of gender activism Benjamin Stachursky s book questions the unvarying positive view of transnationalism on domestic forms of activism arguing for a more nuanced analysis that permits an understanding of the enabling and restricting effects of transnationalism Stachursky also challenges the dominant view of civil society as normatively homogenous by illustrating the complex relationships and conflicts that exist between NGOs and other civil society representatives He grounds his theoretical arguments with a comparative case study on women s rights activism in Egypt and Iran which uses semi structured interviews with women s rights activists in the two countries and analysis of documentation by local political and societal actors Looking at the period from the mid 1980s up to present developments such as the Arab Spring Stachursky analyzes the emergence and development of NGO activism in Egypt and Iran the social political and legal context of NGO activism and key domestic debates on the impact and legitimacy of the actors operating in women s rights activism By closely examining the ambivalent relationship between transnationalism and human rights organizations Stachursky proves that transnationalization has both enabling and constraining effects on the domestic legitimacy of women s rights activists and on their ability to create meaningful social and political change

Rethinking the Responsibility to Protect Alexander Reichwein, Mischa Hansel, 2023-05-31 This edited volume critically examines the Responsibility to Protect R2P as a guiding norm in international politics After NATO's intervention in Libya against the backdrop of civil wars in Syria and Yemen and because of the cynical support for R2P by states such as Saudi Arabia this norm is the subject of heavy criticism It seems that the R2P is just political rhetoric an instrument exploited by the powerful states Hence the R2P is being challenged At the same time however institutional settings normative discourses and contestation practices are making it more robust New understandings of responsibility and the politics of protection are creating new normative spaces patterns of legitimacy and norm entrepreneurs thereby reinforcing the R2P This book's goals are to discuss the R2P's roots institutional framework and evolution to reveal its shortcomings and pitfalls and to explore how it is exploited by certain states Further it elaborates on the R2P's strength as a norm Accordingly the contributions presented here discuss various ways in which the R2P is being challenged or confirmed or both at once As the authors demonstrate these developments concern not only diplomatic communication and political practices within international institutions but also to normative discourses Furthermore the book includes chapters that reevaluate the R2P from a normative standpoint e.g. by proposing cosmopolitan standards as a guide for states external behavior Other contributors reassess the historical evidence from U.N. negotiations on the R2P principle and the productive or restrictive role of institutions Discussing new issues relating to the R2P such as global and regional power shifts or foreign policy as

well as the phenomenon of authoritarian interventionism under the R2P umbrella this book will appeal to all IR scholars and students interested in humanitarianism norms and power By analyzing the status quo of the R2P it enriches and broadens the debate on what the R2P currently is and what it ought to be **Struggles for Belonging** Dieter Gosewinkel,2021-11-04

Citizenship was the most important mark of political belonging in Europe in the twentieth century while estate religion party class and nation lost political significance in the century of extremes This is shown by examining the legal institution of citizenship with its deciding influence on the limits of a political community on inclusion and exclusion Citizenship determined a person s protection equality and freedom and thus his or her chances in life and very survival This book recounts the history of citizenship in Europe as the history of European statehood in the twentieth and early twenty first centuries It does so from three vantage points as the development of a legal institution crucial to European constitutionalism as a measure of an individual s opportunities for self fulfilment ranging from freedom to totalitarian subjugation and as a succession of alternating often sharply divergent political regimes considered from the perspective of their inclusivity and exclusivity and its justification The European history of citizenship is discussed in this book on the basis of six selected countries Great Britain France Germany Czechoslovakia Poland and Russia For the first time a joint history of citizenship in Western and Eastern Europe is told here from the heyday of the nation state to our present day which is marked by the crises of the European Union It is the history of a central legal institution that significantly represents and at the same time determines struggles over migration integration and belonging One of the central concerns of this book is what lessons can be learned when it comes to the future chances of European citizenship Rising Powers and South-South Cooperation Kevin Gray,Barry Gills,2018-10-11 This book examines the extent to which a space has opened up in recent years for the so called rising powers of the global South to offer an alternative to contemporary global economic and political governance through emergent forms of South South cooperation In contrast to the Third Worldism of the past the contemporary rising powers share in common the fact that their recent growth owes much to their extensive and increasingly international engagement rather than partial withdrawal from the global economy However they are nonetheless openly critical of the perceived bias towards the global North in the dominant institutions of global governance and seek to alter the global status quo to enhance the influence of the global South Contributions to this volume address the question of whether such engagement particularly on a South South basis can be categorised as a win win relationship or whether we are already seeing the emergence of new forms of competitive rivalry and neo dependency in action What kind of theoretical approaches and conceptual tools do we need to best answer such questions To what extent do new groupings such as BRICS suggest a real alternative to the dominance of the West and of the neoliberal economic globalization paradigm What possible alternatives exist within contemporary forms of South South cooperation This book was originally published as a special edition of Third World Quarterly *The Onset of Global Governance* Eric K. Leonard,2017-03-02 Assessing the formation

Rights Anja Mihr, Mark Gibney, 2014-07-21 The SAGE Handbook of Human Rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance. The Handbook will take an interdisciplinary approach combining work in such traditional fields as law, political science and philosophy with such non-traditional subjects as climate change, demography, economics, geography, urban studies, mass communication and business and marketing. In addition, one of the aspects of mainstreaming is the manner in which human rights has come to play a prominent role in popular culture and there will be a section on human rights in art, film, music and literature. Not only will the Handbook provide a state-of-the-art analysis of the discipline that addresses the history and development of human rights standards and its movements, mechanisms and institutions, but it will seek to go beyond this and produce a book that will help lead to prospective thinking.

The EU's Human Rights Dialogue with China Katrin Kinzelbach, 2014-10-03 The European Union uses a confidential institutionalized Dialogue to raise human rights concerns with China, but little is publicly known about its set-up, its substance, its development over time and its impact. This book provides the first detailed reconstruction and assessment of the EU's responses to human rights violations in China from 1995 to the present day. Using classified documents in the EU's historical archives and interviews with diplomats, officials and human rights experts in Europe, China and the United States, Kinzelbach lifts the veil of secrecy on the EU-China Human Rights Dialogue and provides a rare insight into how the European Union and China conduct quiet diplomacy on human rights. The book reconstructs the evolution of the Dialogue and the EU's internal debate on the merits of quiet diplomacy and draws comparisons with the approach of other actors, notably that of the United States. In doing so, the EU's relative impact is concluded to be tenuous, if not counter-productive. The book also chronicles and analyzes numerous human rights concerns that were raised in the period, ranging from structural issues to individual cases. This ground-breaking in-depth case study will be of interest to students and scholars of international politics, human rights, international law, EU politics, especially the EU's Common Foreign and Security Policy and Chinese politics.

Norm Dynamics in Multilateral Arms Control Harald Müller, Carmen Wunderlich, 2013-04-01 This volume comprehensively covers a range of issues related to dynamic norm change in the current major international arms control regimes related to nuclear, biological and chemical weapons, small arms and light weapons, cluster munitions and antipersonnel mines. Arms control policies of all of the key established and rising state actors are considered, as well as those of nonaligned countries, nongovernmental organizations and international governing bodies. Recent studies on multilateral arms control tend to focus mostly on structure, by which opportunities and constraints for action are created. This volume pays equal attention to agency through which opportunities and constraints to produce change or maintain the status quo are handled. In addition, and in greater depth than in recent studies, the volume acknowledges the force of moral and ethical impulses alongside such factors as political, legal and technological change in the evolution of arms control norms. The volume begins with a look at the structure of regimes at the conflicts residing in

these structures and at the dynamic processes in which these conflicts are worked out The impact of extrinsic factors on norm dynamics is considered next including technological change and shifts in attitudes and power structures Essays on the role of agency in driving norm change conclude the volume with a particular focus on norm entrepreneurship and the importance of acknowledging the competing justice claims surrounding norm change efforts Contributors Una Becker Jakob Alexis Below Marco Fey Giorgio Franceschini Andrea Hellmann Gregor Hofmann Friederike Klinke Daniel M ller Harald M ller Franziska Pl mmer Carsten Rauch Judith Reuter Elvira Rosert Annette Schaper Hans Joachim Schmidt Tabea Seidler Diekmann Simone Wisotzki Carmen Wunderlich

Risk and Securitization in Japan Piers R. Williamson, 2013-11-26 Since the early 1990s there has been an emphasis in international relations theory on the shift from a Cold War rationality of threat to a post Cold War rationality of risk However in Risk and Securitization in Japan 1945 1960 Piers R Williamson argues that this assumption of a shift in rationality stems from a fundamental failure to distinguish between the concepts of threat and risk By clarifying the concepts of threat and risk this book challenges the prevailing hypothesis of a shift from threat to risk with the end of the Cold War and in doing so presents a new explanatory model of risk that can be applied to Japan and elsewhere In turn it proposes that a full comprehension of the concept of risk can generate new understandings of political processes that would otherwise remain obscured Williamson demonstrates how this can be done proffering a new perspective on Japanese security discourse especially the controversy between on the one hand early Japanese governments prime ministers Diet members and those Japanese who drafted the Japanese proposal for the new constitution and on the other hand intellectuals peace movement activists proponents of unarmed neutrality and the US Japan security treaty Including extensive archival material in the form of speeches public statements and government documents this book will be of huge interest to students and scholars of Japanese politics international relations and history alike

Governance Reform in Africa Jerome Bachelard, 2013-07-24 Poor governance is increasingly recognized as the greatest impediment to economic development in Sub Saharan Africa Currently some impressive governance reforms are underway in many countries This includes cases such as Nigeria formerly the most corrupt country in the world according to Transparency International Yet other countries such as Chad are still in reform deadlock To account for these differences this book examines governance reform in Sub Saharan Africa based on an analysis of international and domestic pressures and counter pressures It develops a four phase model explaining why governance reforms advance in some instances whilst in others governance reforms stagnate or even relapse No study has sought to systematically examine the political forces both

international and domestic behind the successful conduct of governance reform in Sub Saharan Africa Yet coordination collaboration and mutual support between international and domestic actors is critical to push individual governments onto the path of reform This book shows that while international and domestic pro reform pressures are important an analysis of anti reform pressures is also necessary to explain incomplete or failed reform The main theoretical arguments are structured around four hypotheses The hypotheses are theoretically generated and tested over four case studies Madagascar Kenya Nigeria and Chad On this basis the good governance socialization process is inductively developed in the concluding chapter This model illustrates how governance practices can evolve positively and negatively in all countries of Sub Saharan Africa based on the nature and relative strength of international and domestic pressures and counter pressures
