Power Of Personality In War:

The Power of Personality in War H. von Baron Freytag-Loringhoven, 1955 **The Power of personality in war** Hugo Friedrich von Freytag-Loringhoven, 1955 **The Power of Personality in War** Hugo Friedrich Philipp Johann Freiherr von Freytag-Loringhoven, Art of War Colloquium, Army War College (U.S.), 1938 *The Art and Practice of Military Strategy* George Edward Thibault, 1984 *Professional Journal of the United States Army*, 1956 *The Power of Personality in War* Hugo Friedrich Philipp Johann Freiherr von Freytag-Loringhoven, Oliver Lyman Spaulding, 1938 *Joint Operational Warfare* Milan N. Vego, 2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security But in addition by sustaining animals on natural vegetation and as part of local ecosystems these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes This publication provides a glimpse into the often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with *Humanitarians at War* Gerald Steinacher, 2017 How the International Committee of the Red Cross emerged triumphant from the dark days of World War II escaping its ambiguous wartime record to re affirm its leadership in world humanitarian affairs and help rewrite the rules of war in the Geneva Conventions *Quarterly Review of Military Literature*, 1956 *Military Review*, 2011-07 **The Political Psychology of the Gulf War** Stanley Renshon, 2010-06-15 In these original essays widely respected experts analyze the personal psychologies and public belief systems of the individuals and nations involved in the Gulf War from George Bush and Saddam Hussein to the peoples of the United States Israel and Arab countries Approaching the events of 1990 1991 from the perspectives of psychology history mass communications and political science these scholars examine the dynamic relationship of events behavior and perceptions Part I deals with the psychological and political origins of the war part II focuses on George Bush Saddam Hussein and the nature of their leadership and judgement part III discusses the battle for public perceptions and beliefs waged by both sides part IV analyzes the results of that battle as revealed by the understanding of the U S Israeli and Arab publics and part V deals with the war s consequences A postscript by Stanley Renshon covers military actions in the Gulf in late 1992 and early 1993 **The Handbook of Conflict Resolution** Peter T. Coleman, Morton Deutsch, Eric C. Marcus, 2014-02-28 Praise for The Handbook of Conflict Resolution This handbook is a classic It helps connect the research of academia to the practical realities of peacemaking and peacebuilding like no other It is both comprehensive and deeply informed on topics vital to the field like power gender cooperation emotion and trust It now sits prominently on my bookshelf Leymah Gbowee Nobel Peace Prize Laureate The Handbook of Conflict Resolution offers an astonishing array of insightful

An Introduction to the Causes of War Greg Cashman, Leonard C. Robinson, 2007-03-01 This pioneering book explains the causes of war through a sustained combination of theoretical insights and detailed case studies Using the major theories of international conflict as a guide to examine contemporary examples of the outbreak of war Cashman and Robinson find that while all wars have multiple causes these factors typically combine in identifiable dangerous patterns In assessing and comparing these patterns this is the only undergraduate text to systematically join detailed case studies to the theories and empirical research carried out by political scientists on the causes of war Through the examples of World War I World War II in the Pacific the Six Day War the Indo Pakistani War of 1971 the Iran Iraq War and the Iraq War of 2003 the authors uncover the complex multilevel processes by which disputes between countries evolve into bloody conflicts They emphasize the importance of escalation through conflict spirals between rival countries They also point out the links between war and territorial disputes the underappreciated role of the domestic political environment especially internal political instability and the importance of crucial misperceptions by national leaders The authors identify specific patterns in which disputes escalate the classic rivalry spiral the domestic instability spiral and complex spirals They also find that wars between states of unequal power follow a starkly different pattern than wars between relative equals Ideal for a range of courses in international relations this focused text clearly explains theory and applies it to concrete examples in a way that allows students to fully understand the origins of war Added Case Study

Ethiopian Eritrean War **What Causes War?** Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations **South Asia's Cold War** Rajesh M. Basrur, 2008-04-28 This book is a groundbreaking analysis of the India Pakistan nuclear confrontation as a form of cold war that is a hostile relationship between nuclear rivals Drawing on nuclear rivalries between similar pairs the work examines the rise process and potential end of the Cold War between India and Pakistan **The Relationship between Rhetoric and Terrorist Violence** Allison Smith, 2016-05-06 Studies have demonstrated that choices in the use of language convey information that goes beyond the content of the words themselves In many cases how something is said matters as much as what is said Using techniques collectively referred to as linguistic content analysis researchers have studied topics ranging from how to identify if individuals are lying to whether there are particular characteristics associated with leaders who take their nations to war This book presents findings from a research effort funded by the U S Department of Homeland Security's Science and Technology Directorate which examined whether linguistic content analysis can indicate whether groups will engage in terrorist violence Specifically this project brought together several researchers who have developed manual and automated coding systems to analyse documents issued by Central al Qaeda and al Qaeda in the Arabian Peninsula and two non terrorist comparison groups The intention has been to test whether linguistic content analysis can first distinguish the language of terrorist groups from that of non terrorist groups and second provide indicators of specific terrorist attacks This book was originally published as a Special Issue of Dynamics of Asymmetric Conflict Military Affairs, 1956 **Germany and the Second World War Volume IX/II** Jörg Echternkamp, 2014-03 Volume IX II of this series draws on a range of historical sources to explore the effect that the Second World War had on the people of Germany whether they were practically
